founder 创始人 (Noun)

eg: The founder started the company in a garage.
创始人在车库里创办了公司。

colleague 同事 (Noun)

eg: I'll ask my colleague to cover.
我让同事来顶替。

teammate 队友 (Noun)

eg: My teammate is helping me debug it.
我的队友在帮我调试。

workmate 同事 (Noun)

eg: My workmate is a big rugby fan.
我的同事是个橄榄球迷。

coworker 同事 (Noun)

eg: A coworker left a note on my desk.
一位同事在我桌上留了张字条。

peer 同级同事 (Noun)

eg: Get a peer to review it.
找个同级同事来评审。

mentor 导师 (Noun)

eg: My mentor gave me great advice.
我的导师给了我很好的建议。

mentee 被指导者 (Noun)

eg: I'm mentoring a junior mentee.
我在指导一位初级新人。

intern 实习生 (Noun)

eg: Our intern fixed her first bug today.
我们的实习生今天修了第一个bug。

graduate 应届毕业生 (Noun)

eg: We hired two graduates this year.
今年我们招了两名应届毕业生。

junior 初级的 (Adjective)

eg: He's a junior developer, but learns fast.
他是初级开发者，但学得很快。

senior 高级的 (Adjective)

eg: She's a senior engineer with ten years' experience.
她是有十年经验的高级工程师。

intermediate 中级的 (Adjective)

eg: We need an intermediate .NET developer.
我们需要一名中级.NET开发者。

lead 负责人 (Noun)

eg: Sam is the lead on this project.
山姆是这个项目的负责人。

contractor 外包人员 (Noun)

eg: The contractor starts on Monday.
外包人员周一入职。

consultant 顾问 (Noun)

eg: We've hired a security consultant.
我们请了一位安全顾问。

vendor 供应商 (Noun)

eg: The vendor sent us a quote.
供应商给我们发了报价。

supplier 供应商 (Noun)

eg: Our supplier delivered the laptops today.
我们的供应商今天送来了笔记本。

client 客户 (Noun)

eg: The client wants a change to the report.
客户想改一下报告。

customer 客户；用户 (Noun)

eg: A customer has reported a problem.
有客户反馈了一个问题。

end user 最终用户 (Noun)

eg: Think about the end user first.
先想想最终用户。

partner 合作伙伴 (Noun)

eg: We're working with a partner on this.
我们在这件事上和一家合作伙伴合作。

proposal 提案 (Noun)

eg: I'll write up a proposal for the client.
我来给客户写份提案。

quote 报价 (Noun)

eg: Can you send me a quote for the licences?
你能给我发份许可证报价吗？

invoice 发票 (Noun)

eg: I've submitted the invoice for April.
我已经提交了四月的发票。

budget 预算 (Noun)

eg: We're over budget on cloud costs.
我们的云成本超预算了。

cost 成本 (Noun)

eg: What's the cost of the extra storage?
额外存储的成本是多少？

GST 商品及服务税 (Noun)

eg: Is that price including GST?
这个价格含商品及服务税吗？

purchase order 采购订单 (Noun)

eg: We need a purchase order for the licences.
我们需要为许可证开采购订单。

approval 批准 (Noun)

eg: I'm waiting on approval from finance.
我在等财务的批准。

approve 批准 (Verb)

eg: The manager approved my request.
经理批准了我的申请。

sign off 签字确认 (Phrase)

eg: Can you sign off on the design?
你能对设计签字确认吗？

sign-off 签字确认 (Noun)

eg: We need sign-off before we deploy.
部署前我们需要签字确认。

green light 绿灯；批准 (Noun)

eg: We got the green light from the board.
我们得到了董事会的批准。

buy-in 支持；认同 (Noun)

eg: We need buy-in from the whole team.
我们需要整个团队的认同。

consensus 共识 (Noun)

eg: Let's reach a consensus before we move on.
我们先达成共识再继续。

decision 决定 (Noun)

eg: Who makes the final decision?
谁做最终决定？

trade-off 权衡 (Noun)

eg: There's a trade-off between speed and quality.
速度和质量之间需要权衡。

pros and cons 优缺点 (Phrase)

eg: Let's list the pros and cons.
我们列一下优缺点。

option 选项 (Noun)

eg: Option two seems the safest.
方案二看起来最稳妥。

recommend 建议；推荐 (Verb)

eg: I'd recommend we wait a week.
我建议我们等一周。

suggest 建议 (Verb)

eg: Can I suggest a different approach?
我能提个不同的方法吗？

propose 提议 (Verb)

eg: I propose we move standup to ten.
我提议把站会挪到十点。

agree 同意 (Verb)

eg: I agree, that makes sense.
我同意，这有道理。

disagree 不同意 (Verb)

eg: I respectfully disagree with that.
我恭敬地表示不同意。

concern 担忧 (Noun)

eg: I have a concern about the timeline.
我对时间线有些担忧。

raise a concern 提出顾虑 (Phrase)

eg: Don't be afraid to raise a concern.
别怕提出顾虑。

push back 反驳；提出异议 (Phrase)

eg: You should push back on that deadline.
你应该对那个截止日期提出异议。

challenge 挑战 (Noun)

eg: Legacy code is our biggest challenge.
遗留代码是我们最大的挑战。

feedback 反馈 (Noun)

eg: I'd love your feedback on this design.
我很想听听你对这个设计的反馈。

constructive 建设性的 (Adjective)

eg: Please keep the feedback constructive.
请保持反馈有建设性。

input 意见；输入 (Noun)

eg: We'd appreciate your input on the plan.
我们希望听取你对计划的意见。

thoughts 想法 (Noun)

eg: Any thoughts on the new layout?
对新布局有什么想法吗？

suggestion 建议 (Noun)

eg: That's a good suggestion, thanks.
这是个好建议，谢谢。

clarify 澄清 (Verb)

eg: Can you clarify what you mean by that?
你能澄清一下这是什么意思吗？

clarification 说明 (Noun)

eg: I need clarification on the requirements.
我需要对需求作出说明。

confirm 确认 (Verb)

eg: Can you confirm the deadline?
你能确认一下截止日期吗？

confirmation 确认 (Noun)

eg: I'll send a confirmation email.
我会发一封确认邮件。

assume 假设 (Verb)

eg: I assumed the API was already live.
我以为接口已经上线了。

assumption 假设 (Noun)

eg: That's a risky assumption.
那是个有风险的假设。

misunderstanding 误解 (Noun)

eg: It was just a misunderstanding.
只是一场误会。

miscommunication 沟通失误 (Noun)

eg: It was a miscommunication between teams.
这是团队之间的沟通失误。

expectation 期望 (Noun)

eg: Let's manage the client's expectations.
我们来管理客户的期望。

realistic 现实的 (Adjective)

eg: Is that timeline realistic?
那个时间线现实吗？

ambitious 雄心勃勃的 (Adjective)

eg: That's an ambitious goal for one sprint.
对一个迭代来说这是个雄心勃勃的目标。

achievable 可实现的 (Adjective)

eg: I think the goal is achievable.
我认为这个目标可以实现。

feasible 可行的 (Adjective)

eg: Is it feasible to finish by Friday?
周五前完成可行吗?

priority one 头号优先级 (Noun)

eg: The outage is priority one.
故障是头号优先级。

top priority 最高优先级 (Noun)

eg: Security is our top priority.
安全是我们的最高优先级。

nice to have 锦上添花的需求 (Phrase)

eg: Dark mode is a nice to have.
深色模式是锦上添花的需求。

must have 必备项 (Phrase)

eg: Login is a must have.
登录是必备功能。

quick win 速赢 (Noun)

eg: Let's grab a few quick wins first.
我们先拿几个速赢项目。

low-hanging fruit 易得的成果 (Noun)

eg: Let's pick off the low-hanging fruit.
我们先把容易的搞定。

big picture 大局 (Noun)

eg: Let's think about the big picture.
我们想想大局。

bottleneck 瓶颈 (Noun)

eg: The approval step is the bottleneck.
审批环节是瓶颈。

workaround 变通方案 (Noun)

eg: Here's a temporary workaround.
这里有个临时变通办法。

stopgap 权宜之计 (Noun)

eg: It's a stopgap until the real fix lands.
这是正式修复上线前的权宜之计。

band-aid 治标的办法 (Noun)

eg: That fix is just a band-aid.
那个修复只是治标不治本。

quick fix 快速修复 (Noun)

eg: We need a quick fix for the login page.
我们需要快速修复登录页面。

proper fix 彻底修复 (Noun)

eg: We'll schedule a proper fix next sprint.
我们下个迭代安排彻底修复。

hotfix 紧急修复 (Noun)

eg: We pushed a hotfix this morning.
我们今天早上推了个紧急修复。

patch 补丁 (Noun)

eg: The vendor released a security patch.
供应商发布了安全补丁。

release 发布 (Noun)

eg: The release is scheduled for Thursday.
发布定在周四。

ship 发布; 交付 (Verb)

eg: We're aiming to ship on Friday.
我们目标周五发布。

go live 上线 (Phrase)

eg: We go live at midnight.
我们午夜上线。

go-live 上线日 (Noun)

eg: The go-live date is the fifteenth.
上线日期是十五号。

launch 上线; 发布 (Noun)

eg: The launch went smoothly.
上线很顺利。

rollout 逐步推出 (Noun)

eg: The rollout starts with ten percent of users.
逐步推出从百分之十的用户开始。

freeze 冻结 (Noun)

eg: There's a code freeze from Thursday.
周四开始代码冻结。

code freeze 代码冻结 (Noun)

eg: We're in a code freeze until the audit's done.
审计完成前我们处于代码冻结期。

change request 变更申请 (Noun)

eg: Please raise a change request.
请提交变更申请。

change window 变更窗口 (Noun)

eg: The change window is Sunday at two.
变更窗口在周日两点。

maintenance window 维护窗口 (Noun)

eg: We'll patch the servers in the maintenance window.
我们在维护窗口给服务器打补丁。

downtime 停机时间 (Noun)

eg: There'll be about ten minutes of downtime.
大约有十分钟停机时间。

uptime 正常运行时间 (Noun)

eg: Our uptime was ninety-nine point nine percent.
我们的正常运行时间是99.9%。

SLA 服务水平协议 (Noun)

eg: We must meet the SLA.
我们必须满足服务水平协议。

kpi 关键绩效指标 (Noun)

eg: What KPIs are we tracking?
我们在跟踪哪些关键绩效指标?

okr 目标与关键结果 (Noun)

eg: Our OKRs are set for the quarter.
我们本季度的OKR已经定了。

metric 指标 (Noun)

eg: Which metric matters most here?
这里最重要的指标是哪个?

report 报告 (Noun)

eg: I'll send you the weekly report.
我会给你发周报。

status update 状态更新 (Noun)

eg: Here's a quick status update.
这是一个简短的状态更新。

progress 进展 (Noun)

eg: We've made good progress this week.
这周我们进展不错。

outcome 结果 (Noun)

eg: What was the outcome of the meeting?
会议的结果是什么?

summary 摘要 (Noun)

eg: Can you send me a short summary?
你能发我一份简短摘要吗?

overview 概览 (Noun)

eg: Here's a quick overview of the system.
这是系统的简要概览。

highlight 亮点 (Noun)

eg: The highlight was the new dashboard.
亮点是新的仪表盘。

lowlight 不足之处 (Noun)

eg: The lowlight was the flaky test suite.
不足之处是那些不稳定的测试。

win 成就 (Noun)

eg: Let's celebrate the team's wins.
我们来庆祝团队的成就。

shout-out 点名表扬 (Noun)

eg: A big shout-out to Emma for the fix.
特别点名表扬艾玛的修复。

kudos 赞誉 (Noun)

eg: Kudos to the team for the great work.
向团队的出色工作致敬。

recognition 认可 (Noun)

eg: Everyone deserves recognition for the launch.
大家都应为这次上线得到认可。

appreciate 感激 (Verb)

eg: I really appreciate your help.
我真的很感激你的帮助。

thank you 谢谢 (Phrase)

eg: Thank you for staying back to help.
谢谢你留下来帮忙。

apologise 道歉 (Verb)

eg: I apologise for the delay.
我为延误道歉。

sorry 抱歉的 (Adjective)

eg: Sorry, I missed your message.
抱歉，我错过了你的消息。

my bad 我的错 (Phrase)

eg: My bad, I forgot to attach the file.
我的错，我忘了附文件。

oops 哎呀 (Interjection)

eg: Oops, I sent that to the wrong channel.
哎呀，我发错频道了。

no dramas 没问题 (Phrase)

eg: Can you redo it? No dramas.
你能重做吗? 没问题。

developer 开发者 (Noun)

eg: Our developers are working on the API.
我们的开发人员正在做接口。

engineer 工程师 (Noun)

eg: She's a software engineer at a startup.
她是一家初创公司的软件工程师。

programmer 程序员 (Noun)

eg: He's a self-taught programmer.
他是自学成才的程序员。

coder 写代码的人 (Noun)

eg: We need a solid coder for this project.
这个项目我们需要一位扎实的程序员。

full-stack 全栈的 (Adjective)

eg: We're hiring a full-stack developer.
我们在招一名全栈开发者。

backend 后端 (Noun)

eg: I mostly work on the backend.
我主要做后端。

frontend 前端 (Noun)

eg: The frontend is built with React.
前端是用React做的。

code 代码 (Noun)

eg: Can you take a look at my code?
你能看看我的代码吗？

codebase 代码库 (Noun)

eg: The codebase is pretty large.
代码库相当大。

source code 源代码 (Noun)

eg: The source code is on GitHub.
源代码在GitHub上。

script 脚本 (Noun)

eg: I wrote a script to automate the report.
我写了个脚本来自动生成报告。

program 程序 (Noun)

eg: The program crashes on startup.
程序启动时崩溃。

application 应用程序 (Noun)

eg: The application is running in production.
应用程序正在生产环境运行。

app 应用 (Noun)

eg: Have you tried the new app?
你试过新应用了吗？

software 软件 (Noun)

eg: We build software for local councils.
我们为地方政府开发软件。

system 系统 (Noun)

eg: The legacy system is a nightmare.
遗留系统简直是噩梦。

platform 平台 (Noun)

eg: We're migrating to a new platform.
我们正在迁移到新平台。

tool 工具 (Noun)

eg: That's a handy tool for debugging.
那是个调试的好用工具。

library 库 (Noun)

eg: We use a library for date handling.
我们用一个库处理日期。

package 包 (Noun)

eg: Install the package with NuGet.
用NuGet安装这个包。

framework 框架 (Noun)

eg: Which framework are you using?
你在用哪个框架？

module 模块 (Noun)

eg: I'll split it into separate modules.
我把它拆成独立的模块。

component 组件 (Noun)

eg: Reuse the button component.
复用那个按钮组件。

class 类 (Noun)

eg: Create a new class for the customer.
为客户创建一个新类。

object 对象 (Noun)

eg: The object is null at that point.
在那一点上对象是空的。

method 方法 (Noun)

eg: Add a method to validate the email.
添加一个验证邮箱的方法。

function 函数 (Noun)

eg: That function is too long.
那个函数太长了。

variable 变量 (Noun)

eg: Rename the variable to something clearer.
把变量改个更清楚的名字。

constant 常量 (Noun)

eg: Store the URL in a constant.
把网址存成常量。

parameter 参数 (Noun)

eg: Pass the ID as a parameter.
把ID作为参数传进去。

argument 实参 (Noun)

eg: The method takes two arguments.
这个方法接受两个参数。

return 返回 (Verb)

eg: The function returns a list of users.
这个函数返回用户列表。

value 值 (Noun)

eg: What value does it return?
它返回什么值?

type 类型 (Noun)

eg: Check the type before casting.
转换前先检查类型。

string 字符串 (Noun)

eg: Convert the number to a string.
把数字转换成字符串。

integer 整数 (Noun)

eg: The ID is an integer.
ID是个整数。

boolean 布尔值 (Noun)

eg: Set the flag to a boolean.
把标志设为布尔值。

array 数组 (Noun)

eg: Loop through the array.
遍历这个数组。

list 列表 (Noun)

eg: Add the item to the list.
把这项加到列表里。

dictionary 字典 (Noun)

eg: Use a dictionary for quick lookups.
用字典快速查找。

loop 循环 (Noun)

eg: There's an infinite loop in the code.
代码里有个无限循环。

iterate 迭代; 遍历 (Verb)

eg: Iterate over each order.
遍历每个订单。

condition 条件 (Noun)

eg: Add a condition to skip empty rows.
加个条件跳过空行。

statement 语句 (Noun)

eg: That statement throws an error.
那条语句报错了。

expression 表达式 (Noun)

eg: Simplify that expression.
把那个表达式简化一下。

operator 运算符 (Noun)

eg: Check the operator precedence.
检查运算符优先级。

syntax 语法 (Noun)

eg: There's a syntax error on line ten.
第十行有语法错误。

semantic 语义的 (Adjective)

eg: That's a semantic difference, not a syntax one.
那是语义上的区别, 不是语法上的。

compile 编译 (Verb)

eg: It won't compile on my machine.
它在我机器上编译不了。

compiler 编译器 (Noun)

eg: The compiler is complaining about a missing bracket.
编译器在报缺了个括号。

build 构建 (Noun)

eg: The build takes about five minutes.
构建大约要五分钟。

runtime 运行时 (Noun)

eg: It's a runtime error, not a compile error.
这是运行时错误, 不是编译错误。

execute 执行 (Verb)

eg: Execute the script as admin.
以管理员身份执行脚本。

run 运行 (Verb)

eg: Run the tests before you push.
推送前先跑测试。

debug 调试 (Verb)

eg: I'll debug it after lunch.
午饭后我来调试。

debugger 调试器 (Noun)

eg: Attach the debugger to the process.
把调试器附加到进程上。

breakpoint 断点 (Noun)

eg: Set a breakpoint on line forty.
在第四十行设个断点。

step through 单步执行 (Phrase)

eg: Step through the code to see what happens.
单步执行代码看看会怎样。

stack trace 堆栈跟踪 (Noun)

eg: Paste the stack trace into the ticket.
把堆栈跟踪贴到工单里。

exception 异常 (Noun)

eg: An unhandled exception crashed the service.
未处理的异常让服务崩溃了。

throw 抛出 (Verb)

eg: The method throws an exception when input's null.
输入为空时该方法抛出异常。

catch 捕获 (Verb)

eg: Catch the exception and log it.
捕获异常并记录日志。

try catch 异常捕获结构 (Noun)

eg: Wrap it in a try catch.
把它包在try catch里。

error handling 错误处理 (Noun)

eg: We need better error handling here.
这里需要更好的错误处理。

null 空值 (Noun)

eg: We're getting a null reference exception.
我们遇到了空引用异常。

undefined 未定义的 (Adjective)

eg: The variable is undefined at that point.
那一点上变量是未定义的。

bug 缺陷 (Noun)

eg: I've found a nasty bug in the checkout.
我在结账环节发现了个讨厌的bug。

glitch 小故障 (Noun)

eg: It's just a minor glitch.
只是个小故障。

issue 问题 (Noun)

eg: Is that a known issue?
这是已知问题吗？

defect 缺陷 (Noun)

eg: We logged it as a defect.
我们把它记为缺陷。

fix 修复 (Verb)

eg: I'll fix it in the next commit.
我在下一次提交里修复它。

resolve 解决 (Verb)

eg: We resolved the issue this morning.
我们今天早上解决了这个问题。

troubleshoot 排查故障 (Verb)

eg: I'll troubleshoot the network first.
我先排查网络故障。

root cause 根本原因 (Noun)

eg: We found the root cause of the crash.
我们找到了崩溃的根本原因。

reproduce 复现 (Verb)

eg: Can you reproduce the bug?
你能复现这个bug吗？

repro steps 复现步骤 (Noun)

eg: Please add repro steps to the ticket.
请在工单里加上复现步骤。

edge case 边界情况 (Noun)

eg: That's an edge case we missed.
那是我们漏掉的边界情况。

corner case 极端情况 (Noun)

eg: Corner cases are hard to test.
极端情况很难测试。

hack 临时凑合的做法 (Noun)

eg: It's a hack, but it works.
这是个凑合的做法，但能用。

kludge 拙劣的临时方案 (Noun)

eg: That kludge needs to go.
那个拙劣的方案该扔了。

spaghetti code 面条式代码 (Noun)

eg: The old module is total spaghetti code.
旧模块简直是一团面条式代码。

clean code 整洁代码 (Noun)

eg: Clean code is easy to read.
整洁的代码易于阅读。

readable 可读的 (Adjective)

eg: Keep the code readable.
保持代码可读。

maintainable 可维护的 (Adjective)

eg: We want the solution to be maintainable.
我们希望解决方案易于维护。

scalable 可扩展的 (Adjective)

eg: Is the design scalable?
这个设计可扩展吗？

robust 健壮的 (Adjective)

eg: We need a more robust solution.
我们需要更健壮的方案。

elegant 优雅的 (Adjective)

eg: That's an elegant solution.
这是个优雅的方案。

messy 杂乱的 (Adjective)

eg: The code's a bit messy.
代码有点乱。

hacky 临时凑合的 (Adjective)

eg: That solution feels hacky.
那个方案感觉是临时凑合的。

legacy 遗留的 (Adjective)

eg: We're stuck with legacy code.
我们被遗留代码困住了。

technical debt 技术债 (Noun)

eg: We've built up a lot of technical debt.
我们累积了很多技术债。

refactor 重构 (Verb)

eg: We should refactor this class.
我们应该重构这个类。

refactoring 重构 (Noun)

eg: The refactoring took two sprints.
这次重构花了两个迭代。

rewrite 重写 (Verb)

eg: We might have to rewrite the whole module.
我们可能得重写整个模块。

cleanup 清理 (Noun)

eg: Let's do a quick cleanup of unused code.
我们快速清理一下没用的代码。

optimise 优化 (Verb)

eg: We need to optimise the query.
我们需要优化这个查询。

optimisation 优化 (Noun)

eg: Performance optimisation is next sprint.
性能优化在下个迭代。

performance 性能 (Noun)

eg: The performance is terrible on mobile.
移动端性能很糟。

efficiency 效率 (Noun)

eg: Let's improve the efficiency of the batch job.
我们来提高批处理作业的效率。

latency 延迟 (Noun)

eg: Latency is high during peak hours.
高峰期延迟很高。

throughput 吞吐量 (Noun)

eg: Throughput doubled after the fix.
修复后吞吐量翻了一倍。

memory leak 内存泄漏 (Noun)

eg: There's a memory leak in the service.
服务里有内存泄漏。

cache 缓存 (Noun)

eg: Clear the cache and try again.
清除缓存再试一次。

caching 缓存机制 (Noun)

eg: Caching cut the load time in half.
缓存让加载时间减半。

thread 线程 (Noun)

eg: The task runs on a separate thread.
这个任务在单独的线程上运行。

async 异步的 (Adjective)

eg: Make that call async.
把那个调用改成异步。

asynchronous 异步的 (Adjective)

eg: Asynchronous code can be tricky.
异步代码可能有点棘手。

concurrency 并发 (Noun)

eg: Concurrency issues are hard to spot.
并发问题很难发现。

race condition 竞态条件 (Noun)

eg: We've got a race condition in the queue.
队列里有个竞态条件。

deadlock 死锁 (Noun)

eg: The two processes ended up in a deadlock.
两个进程陷入了死锁。

callback 回调 (Noun)

eg: Pass a callback to handle the result.
传个回调来处理结果。

promise 承诺对象 (Noun)

eg: The promise never resolves.
这个promise一直没完成。

await 等待 (Verb)

eg: Don't forget to await the call.
别忘了await这个调用。

event 事件 (Noun)

eg: The button click event isn't firing.
按钮点击事件没有触发。

listener 监听器 (Noun)

eg: Add a listener for the change event.
为变更事件添加一个监听器。

handler 处理程序 (Noun)

eg: Write a handler for the error.
为这个错误写个处理程序。

middleware 中间件 (Noun)

eg: The auth is handled in middleware.
认证在中间件里处理。

plugin 插件 (Noun)

eg: Try that plugin for linting.
试试那个代码检查插件。

extension 扩展 (Noun)

eg: Install the extension in VS Code.
在VS Code里装这个扩展。

snippet 代码片段 (Noun)

eg: Can you share a snippet of the code?
你能分享一段代码吗？

boilerplate 样板代码 (Noun)

eg: There's too much boilerplate here.
这里样板代码太多了。

template 模板 (Noun)

eg: Start from the project template.
从项目模板开始。

scaffold 生成脚手架 (Verb)

eg: I'll scaffold a new project.
我来生成个新项目的脚手架。

stub 桩代码 (Noun)

eg: Put a stub in for now.
先放个桩代码。

mock 模拟 (Verb)

eg: We mock the database in tests.
我们在测试里模拟数据库。

placeholder 占位符 (Noun)

eg: Use a placeholder until the design's ready.
设计好之前先用占位符。

TODO 待办注释 (Noun)

eg: I left a TODO in the code.
我在代码里留了个TODO。

comment 注释 (Noun)

eg: Add a comment explaining why.
加条注释解释原因。

documentation 文档 (Noun)

eg: The documentation is out of date.
文档过时了。

docs 文档 (Noun)

eg: Check the docs first.
先看看文档。

README 说明文件 (Noun)

eg: Update the README with the setup steps.
把安装步骤更新到README里。

spec 规格说明 (Noun)

eg: Where's the spec for this feature?
这个功能的规格说明在哪？

specification 规范 (Noun)

eg: The specification is very detailed.
规范非常详细。

requirement 需求 (Noun)

eg: The requirements changed again.
需求又变了。

naming convention 命名规范 (Noun)

eg: Follow the naming convention.
遵循命名规范。

coding standard 编码规范 (Noun)

eg: We follow the team's coding standards.
我们遵循团队的编码规范。

best practice 最佳实践 (Noun)

eg: That's not best practice.
那不是最佳实践。

design pattern 设计模式 (Noun)

eg: Use a factory design pattern here.
这里用个工厂设计模式。

architecture 架构 (Noun)

eg: The architecture needs a rethink.
架构需要重新考虑。

abstraction 抽象 (Noun)

eg: Too much abstraction makes it hard to read.
过度抽象让代码难读。

encapsulation 封装 (Noun)

eg: Encapsulation keeps the logic private.
封装让逻辑保持私有。

inheritance 继承 (Noun)

eg: Avoid deep inheritance chains.
避免过深的继承链。

polymorphism 多态 (Noun)

eg: Polymorphism lets us swap implementations.
多态让我们能替换实现。

interface 接口 (Noun)

eg: Define an interface for the service.
为这个服务定义一个接口。

abstract class 抽象类 (Noun)

eg: The base is an abstract class.
基类是个抽象类。

implementation 实现 (Noun)

eg: The implementation is straightforward.
实现很简单。

implement 实现 (Verb)

eg: We'll implement it next sprint.
我们下个迭代实现它。

inject 注入 (Verb)

eg: Inject the service through the constructor.
通过构造函数注入这个服务。

dependency injection 依赖注入 (Noun)

eg: We use dependency injection everywhere.
我们到处都用依赖注入。

constructor 构造函数 (Noun)

eg: Set the default in the constructor.
在构造函数里设置默认值。

instance 实例 (Noun)

eg: Create a new instance of the class.
创建这个类的一个新实例。

singleton 单例 (Noun)

eg: The logger is a singleton.
日志记录器是个单例。

enum 枚举 (Noun)

eg: Use an enum for the status.
用枚举表示状态。

generic 泛型的 (Adjective)

eg: Write a generic method for that.
为此写个泛型方法。

lambda Lambda表达式 (Noun)

eg: A lambda keeps it short.
用lambda能让代码简短。

LINQ LINQ查询 (Noun)

eg: I'll use LINQ to filter the list.
我用LINQ来过滤列表。

namespace 命名空间 (Noun)

eg: Put it in the right namespace.
把它放进正确的命名空间。

assembly 程序集 (Noun)

eg: Reference the assembly in the project.
在项目中引用这个程序集。

NuGet NuGet包管理器 (Noun)

eg: Update the NuGet packages.
更新NuGet包。

C# C#语言 (Noun)

eg: Most of our backend is in C#.
我们大部分后端是用C#写的。

dotnet .NET平台 (Noun)

eg: We're upgrading to the latest dotnet.
我们要升级到最新的.NET。

ASP.NET ASP.NET框架 (Noun)

eg: The API runs on ASP.NET Core.
接口跑在ASP.NET Core上。

Entity Framework 实体框架 (Noun)

eg: We use Entity Framework for data access.
我们用实体框架做数据访问。

Razor Razor模板 (Noun)

eg: The page is built with Razor.
这个页面是用Razor做的。

Blazor Blazor框架 (Noun)

eg: We built the admin site with Blazor.
我们用Blazor做了管理站点。

Visual Studio Visual Studio开发环境 (Noun)

eg: Open the solution in Visual Studio.
在Visual Studio里打开解决方案。

VS Code VS Code编辑器 (Noun)

eg: I prefer VS Code for front-end work.
前端工作我更喜欢用VS Code。

IDE 集成开发环境 (Noun)

eg: Which IDE do you use?
你用哪个集成开发环境？

editor 编辑器 (Noun)

eg: My editor autocompletes it.
我的编辑器会自动补全。

terminal 终端 (Noun)

eg: Run it in the terminal.
在终端里运行。

command line 命令行 (Noun)

eg: I mostly use the command line.
我主要用命令行。

shell 命令行外壳 (Noun)

eg: Drop into a shell and check the logs.
进入命令行看看日志。

bash Bash外壳 (Noun)

eg: A quick bash script will do it.
一个简单的bash脚本就能搞定。

PowerShell PowerShell (Noun)

eg: I automate it with PowerShell.
我用PowerShell自动化它。

Python Python语言 (Noun)

eg: We use Python for data scripts.
我们用Python写数据脚本。

Java Java语言 (Noun)

eg: The old system is written in Java.
旧系统是用Java写的。

JavaScript JavaScript语言 (Noun)

eg: The site uses vanilla JavaScript.
这个网站用的是原生JavaScript。

TypeScript TypeScript语言 (Noun)

eg: We migrated the frontend to TypeScript.
我们把前端迁移到了TypeScript。

Node.js Node.js运行环境 (Noun)

eg: The API runs on Node.js.
接口跑在Node.js上。

SQL SQL语言 (Noun)

eg: I'll write a SQL query for that.
我来写个SQL查询。

Golang Go语言 (Noun)

eg: The tool is written in Golang.
这个工具是用Go写的。

Rust Rust语言 (Noun)

eg: Some services are being rewritten in Rust.
有些服务正在用Rust重写。

Ruby Ruby语言 (Noun)

eg: The old app was written in Ruby.
旧应用是用Ruby写的。

PHP PHP语言 (Noun)

eg: The website is still on PHP.
这个网站仍然用PHP。

Swift Swift语言 (Noun)

eg: Our iOS app is in Swift.
我们的iOS应用是用Swift写的。

Kotlin Kotlin语言 (Noun)

eg: The Android app uses Kotlin.
安卓应用用的是Kotlin。

regex 正则表达式 (Noun)

eg: I wrote a regex to match the postcodes.
我写了个正则来匹配邮编。

JSON JSON格式 (Noun)

eg: The API returns JSON.
接口返回JSON。

XML XML格式 (Noun)

eg: The old service still uses XML.
旧服务还在用XML。

YAML YAML格式 (Noun)

eg: Check the YAML config file.
检查一下YAML配置文件。

CSV CSV文件 (Noun)

eg: Export the data as a CSV.
把数据导出为CSV。

Markdown Markdown格式 (Noun)

eg: Write the notes in Markdown.
用Markdown写笔记。

parse 解析 (Verb)

eg: The parser fails to parse the date.
解析器解析不了这个日期。

serialise 序列化 (Verb)

eg: Serialise the object to JSON.
把对象序列化为JSON。

deserialise 反序列化 (Verb)

eg: Deserialise the response into a model.
把响应反序列化成模型。

encode 编码 (Verb)

eg: Encode the URL properly.
正确地编码这个网址。

decode 解码 (Verb)

eg: Decode the token to check the claims.
解码令牌检查声明。

format 格式化 (Verb)

eg: Format the date as day-month-year.
把日期格式化成日-月-年。

validate 验证 (Verb)

eg: Validate the input before saving.
保存前验证输入。

validation 验证 (Noun)

eg: We need better validation on the form.
表单需要更好的验证。

sanitise 清洗 (Verb)

eg: Sanitise the user input.
清洗用户输入。

convert 转换 (Verb)

eg: Convert the file to PDF.
把文件转换成PDF。

transform 转换 (Verb)

eg: Transform the data before loading.
加载前先转换数据。

map 映射 (Verb)

eg: Map the fields to the new schema.
把字段映射到新的模式。

filter 过滤 (Verb)

eg: Filter out inactive users.
过滤掉不活跃的用户。

sort 排序 (Verb)

eg: Sort the results by date.
按日期排序结果。

search 搜索 (Noun)

eg: The search is really slow.
搜索很慢。

query 查询 (Noun)

eg: That query takes forever.
那个查询慢得要命。

lookup 查找 (Noun)

eg: Do a lookup by email.
按邮箱做个查找。

random 随机的 (Adjective)

eg: Generate a random token.
生成一个随机令牌。

unique 唯一的 (Adjective)

eg: Each ID must be unique.
每个ID必须唯一。

default 默认值 (Noun)

eg: What's the default timeout?
默认超时时间是多少？

optional 可选的 (Adjective)

eg: That field is optional.
那个字段是可选的。

required 必填的 (Adjective)

eg: The email is required.
邮箱是必填的。

deprecated 已弃用的 (Adjective)

eg: That method is deprecated.
那个方法已被弃用。

obsolete 过时的 (Adjective)

eg: The old API is obsolete.
旧接口已过时。

breaking change 破坏性变更 (Noun)

eg: That's a breaking change for clients.
这对客户端是个破坏性变更。

backwards compatible 向后兼容 (Phrase)

eg: The update is backwards compatible.
这次更新是向后兼容的。

version 版本 (Noun)

eg: Which version are you running?
你在运行哪个版本？

upgrade 升级 (Verb)

eg: We need to upgrade the framework.
我们需要升级这个框架。

downgrade 降级 (Verb)

eg: We had to downgrade the package.
我们不得不降级这个包。

install 安装 (Verb)

eg: Install the dependencies first.
先安装依赖。

uninstall 卸载 (Verb)

eg: Uninstall and reinstall the tool.
卸载后重新安装这个工具。

configure 配置 (Verb)

eg: Configure the app to use the new URL.
把应用配置为使用新网址。

configuration 配置 (Noun)

eg: The configuration lives in a JSON file.
配置放在一个JSON文件里。

setting 设置 (Noun)

eg: Change the setting in the admin panel.
在管理面板里改这个设置。

environment variable 环境变量 (Noun)

eg: Set it as an environment variable.
把它设成环境变量。

flag 标志；开关 (Noun)

eg: Wrap it behind a feature flag.
把它放在功能开关后面。

feature flag 功能开关 (Noun)

eg: We'll roll it out behind a feature flag.
我们用功能开关来灰度发布。

toggle 开关 (Noun)

eg: Add a toggle to turn it off.
加个开关可以关掉它。

hardcode 硬编码 (Verb)

eg: Don't hardcode the password.
不要把密码硬编码。

hardcoded 硬编码的 (Adjective)

eg: There's a hardcoded URL in the code.
代码里有个硬编码的网址。

magic number 魔法数字 (Noun)

eg: Replace that magic number with a constant.
把那个魔法数字换成常量。

log 日志 (Noun)

eg: Check the log for errors.
查看日志里的错误。

logging 日志记录 (Noun)

eg: We need more logging around that call.
那个调用周围需要更多日志。

trace 追踪 (Noun)

eg: Look at the trace to see where it fails.
看追踪信息找出在哪失败。

output 输出 (Noun)

eg: The output looks wrong.
输出看起来不对。

console 控制台 (Noun)

eg: Print it to the console.
把它打印到控制台。

print 打印 (Verb)

eg: Print the value to check it.
把这个值打印出来检查一下。

Git Git版本控制 (Noun)

eg: Are you comfortable with Git?
你熟悉Git吗？

GitHub GitHub平台 (Noun)

eg: The repo is on GitHub.
仓库在GitHub上。

GitLab GitLab平台 (Noun)

eg: We host our code on GitLab.
我们的代码托管在GitLab上。

Bitbucket Bitbucket平台 (Noun)

eg: Our old repos are on Bitbucket.
我们的旧仓库在Bitbucket上。

repo 代码仓库 (Noun)

eg: Clone the repo and have a look.
克隆一下仓库看看。

repository 代码仓库 (Noun)

eg: The repository is private.
这个仓库是私有的。

clone 克隆 (Verb)

eg: Clone the repo to your machine.
把仓库克隆到你的机器上。

fork 派生 (Verb)

eg: Fork the repo and make your changes.
派生这个仓库然后做修改。

branch 分支 (Noun)

eg: Create a new branch for the feature.
为这个功能创建一个新分支。

main 主分支 (Noun)

eg: Merge it into main.
把它合并到主分支。

master 主干分支 (Noun)

eg: The old repo still uses master.
旧仓库仍然使用master分支。

develop 开发分支 (Noun)

eg: Branch off develop for new features.
新功能从develop分支拉出去。

feature branch 功能分支 (Noun)

eg: Keep the feature branch small.
保持功能分支小一点。

check out 切换（分支） (Phrase)

eg: Check out the release branch.
切换到发布分支。

commit 提交 (Noun)

eg: Please write a clear commit message.
请写一条清晰的提交信息。

commit message 提交信息 (Noun)

eg: The commit message should explain why.
提交信息应该解释原因。

stage 暂存 (Verb)

eg: Stage the changes before you commit.
提交前先暂存改动。

push 推送 (Verb)

eg: I'll push my changes now.
我现在推送我的改动。

pull 拉取 (Verb)

eg: Pull the latest changes first.
先拉取最新改动。

fetch 获取 (Verb)

eg: Fetch from origin to see what's new.
从远程获取一下看有什么新东西。

merge 合并 (Verb)

eg: I'll merge it after the review.
评审后我来合并。

merge conflict 合并冲突 (Noun)

eg: I've got a merge conflict in the config file.
配置文件里有个合并冲突。

conflict 冲突 (Noun)

eg: Resolve the conflict and push again.
解决冲突后再推送。

rebase 变基 (Verb)

eg: Rebase your branch onto main.
把你的分支变基到main上。

squash 压缩提交 (Verb)

eg: Squash the commits before merging.
合并前把提交压缩一下。

cherry-pick 挑选提交 (Verb)

eg: I'll cherry-pick that fix into the release.
我把那个修复挑到发布分支里。

revert 回退 (Verb)

eg: Revert the commit, it broke the build.
回退这个提交，它把构建搞坏了。

reset 重置 (Verb)

eg: Reset your branch to the remote.
把你的分支重置到远程状态。

stash 暂存工作区 (Verb)

eg: Stash your changes and switch branches.
先暂存你的改动再切换分支。

diff 差异 (Noun)

eg: Have a look at the diff.
看看差异。

history 历史记录 (Noun)

eg: Check the git history for that file.
看看那个文件的git历史。

blame 追溯责任 (Verb)

eg: Use git blame to see who changed it.
用git blame看是谁改的。

tag 标签 (Noun)

eg: We tagged the release as version two.
我们给这次发布打了个二版本标签。

remote 远程仓库 (Noun)

eg: Add a new remote for the fork.
为这个派生添加个新远程仓库。

origin 远程源 (Noun)

eg: Push to origin.
推送到origin。

upstream 上游 (Noun)

eg: Sync your fork with upstream.
把你的派生仓库和上游同步。

gitignore 忽略文件 (Noun)

eg: Add the folder to .gitignore.
把这个文件夹加进.gitignore。

submodule 子模块 (Noun)

eg: The shared code is a submodule.
共享代码是个子模块。

monorepo 单体仓库 (Noun)

eg: We keep all services in a monorepo.
我们把所有服务放在一个单体仓库里。

version control 版本控制 (Noun)

eg: Everything should be in version control.
所有东西都应该纳入版本控制。

pull request 拉取请求 (Noun)

eg: I've opened a pull request.
我开了一个拉取请求。

PR 拉取请求 (Noun)

eg: Can you review my PR?
你能审一下我的PR吗？

draft PR 草稿PR (Noun)

eg: I'll open it as a draft PR first.
我先把它作为草稿PR打开。

review 评审 (Verb)

eg: I'll review it this arvo.
我今天下午评审它。

code review 代码评审 (Noun)

eg: Code review is part of the process.
代码评审是流程的一部分。

reviewer 评审者 (Noun)

eg: Add two reviewers to the PR.
给PR加两个评审者。

request changes 要求修改 (Phrase)

eg: I had to request changes on that PR.
我不得不对那个PR要求修改。

nitpick 吹毛求疵的意见 (Noun)

eg: Just a nitpick, but the variable name's unclear.
只是个小意见，变量名不太清楚。

nit 小毛病 (Noun)

eg: Nit: missing a space here.
小毛病：这里少了个空格。

LGTM 看起来不错 (Phrase)

eg: LGTM, merging now.
看起来不错，现在合并。

looks good to me 我觉得没问题 (Phrase)

eg: Looks good to me, nice work.
我觉得没问题，干得漂亮。

ship it 发出去吧 (Phrase)

eg: All checks passed, ship it.
所有检查通过，发吧。

thumbs up 点赞 (Noun)

eg: Give it a thumbs up if you agree.
同意的话点个赞。

comment thread 评论串 (Noun)

eg: Resolve the comment thread once it's fixed.
修好后把评论串标记为已解决。

inline comment 行内评论 (Noun)

eg: I left an inline comment on line twenty.
我在第二十行留了个行内评论。

pair programming 结对编程 (Noun)

eg: Let's do some pair programming on this.
我们结对编程处理这个。

pairing 结对 (Noun)

eg: I'm pairing with Emma this arvo.
今天下午我和艾玛结对。

mob programming 集体编程 (Noun)

eg: We did a mob programming session on Friday.
我们周五搞了场集体编程。

knowledge sharing 知识分享 (Noun)

eg: We run a knowledge sharing session monthly.
我们每月办一次知识分享。

brown bag 午餐分享会 (Noun)

eg: There's a brown bag session on testing today.
今天有场关于测试的午餐分享会。

lightning talk 闪电演讲 (Noun)

eg: I'm giving a lightning talk about Docker.
我要做一个关于Docker的闪电演讲。

CI 持续集成 (Noun)

eg: The CI is failing on main.
主分支上的持续集成失败了。

CD 持续交付 (Noun)

eg: CD deploys it automatically.
持续交付会自动部署。

CI/CD 持续集成与交付 (Noun)

eg: Our CI/CD pipeline runs on every commit.
我们的CI/CD流水线在每次提交时运行。

continuous integration 持续集成 (Noun)

eg: We rely on continuous integration.
我们依赖持续集成。

continuous delivery 持续交付 (Noun)

eg: Continuous delivery speeds up releases.
持续交付加快了发布速度。

continuous deployment 持续部署 (Noun)

eg: We practise continuous deployment.
我们实践持续部署。

pipeline 流水线 (Noun)

eg: The pipeline failed at the test stage.
流水线在测试阶段失败了。

job 工作；作业 (Noun)

eg: The nightly job didn't run.
夜间作业没有运行。

step 步骤 (Noun)

eg: Add a step to run the linter.
加一步运行代码检查。

trigger 触发 (Verb)

eg: Push a commit to trigger the build.
推一个提交来触发构建。

artefact 构建产物 (Noun)

eg: The build artefact is stored in the feed.
构建产物存在制品库里。

artifact 构建产物 (Noun)

eg: Download the artifact from the pipeline.
从流水线下载构建产物。

build server 构建服务器 (Noun)

eg: The build server is out of disk space.
构建服务器磁盘满了。

runner 运行器 (Noun)

eg: The runner picked up the job.
运行器接了这个作业。

agent 代理；构建代理 (Noun)

eg: Our agents are running on Azure.
我们的构建代理跑在Azure上。

Jenkins Jenkins工具 (Noun)

eg: Jenkins runs our nightly builds.
Jenkins运行我们的夜间构建。

GitHub Actions GitHub Actions (Noun)

eg: We moved our CI to GitHub Actions.
我们把CI迁到了GitHub Actions。

Azure DevOps Azure DevOps (Noun)

eg: Tickets and pipelines are in Azure DevOps.
工单和流水线都在Azure DevOps里。

Octopus Deploy Octopus部署工具 (Noun)

eg: We deploy with Octopus Deploy.
我们用Octopus Deploy部署。

Terraform Terraform工具 (Noun)

eg: The infrastructure is defined in Terraform.
基础设施是用Terraform定义的。

Ansible Ansible工具 (Noun)

eg: We use Ansible to configure the servers.
我们用Ansible配置服务器。

infrastructure as code 基础设施即代码 (Noun)

eg: Infrastructure as code makes rollbacks easier.
基础设施即代码让回滚更容易。

IaC 基础设施即代码 (Noun)

eg: We're moving everything to IaC.
我们把所有东西都迁到基础设施即代码。

DevOps 开发运维 (Noun)

eg: We're building a DevOps culture.
我们在建设开发运维文化。

SRE 站点可靠性工程 (Noun)

eg: Our SRE team is on call this week.
我们的站点可靠性团队这周值班。

deploy 部署 (Verb)

eg: We deploy to production every Thursday.
我们每周四部署到生产环境。

deployment 部署 (Noun)

eg: The deployment went smoothly.
部署很顺利。

redeploy 重新部署 (Verb)

eg: Let's redeploy the last known good build.
我们重新部署上一个已知正常的构建。

rollback 回滚 (Noun)

eg: We did a rollback after the errors.
出错后我们做了回滚。

roll back 回滚 (Phrase)

eg: Roll back the release, please.
请回滚这次发布。

roll forward 向前修复 (Phrase)

eg: We'll roll forward with a patch.
我们用补丁向前修复。

release notes 发布说明 (Noun)

eg: I'll write up the release notes.
我来写发布说明。

changelog 变更日志 (Noun)

eg: Add it to the changelog.
把它加进变更日志。

semver 语义化版本 (Noun)

eg: We follow semver for versioning.
我们遵循语义化版本号。

environment 环境 (Noun)

eg: Which environment is it failing in?
它在哪个环境失败？

dev 开发环境 (Noun)

eg: It works fine in dev.
它在开发环境正常。

test environment 测试环境 (Noun)

eg: Deploy it to the test environment.
把它部署到测试环境。

staging 预发布环境 (Noun)

eg: Try it in staging first.
先在预发布环境试。

UAT 用户验收测试 (Noun)

eg: The client is running UAT this week.
客户这周在做用户验收测试。

prod 生产环境 (Noun)

eg: Don't touch prod without approval.
未经批准别碰生产环境。

production 生产环境 (Noun)

eg: The bug only appears in production.
这个bug只在生产环境出现。

sandbox 沙盒 (Noun)

eg: Try it in the sandbox first.
先在沙盒里试。

local 本地的 (Adjective)

eg: It works on my local machine.
它在我的本地机器上正常。

works on my machine 在我机器上能跑 (Phrase)

eg: It works on my machine, honestly.
说真的，它在我机器上能跑。

smoke test 冒烟测试 (Noun)

eg: Run a smoke test after the deploy.
部署后跑一次冒烟测试。

health check 健康检查 (Noun)

eg: The health check endpoint is green.
健康检查接口是绿的。

canary 金丝雀发布 (Noun)

eg: We'll do a canary release first.
我们先做金丝雀发布。

blue-green 蓝绿部署的 (Adjective)

eg: We use blue-green deployments.
我们使用蓝绿部署。

zero downtime 零停机 (Phrase)

eg: We aim for zero downtime deployments.
我们目标是零停机部署。

container 容器 (Noun)

eg: The app runs in a container.
应用运行在容器里。

Docker Docker容器 (Noun)

eg: Run it locally with Docker.
用Docker在本地运行。

Dockerfile Docker构建文件 (Noun)

eg: Update the Dockerfile to use the new image.
更新Dockerfile使用新镜像。

image 镜像 (Noun)

eg: Push the image to the registry.
把镜像推到镜像仓库。

registry 镜像仓库 (Noun)

eg: The registry is down.
镜像仓库挂了。

Kubernetes Kubernetes编排 (Noun)

eg: We run everything on Kubernetes.
我们所有服务都跑在Kubernetes上。

k8s Kubernetes缩写 (Noun)

eg: The k8s cluster needs an upgrade.
k8s集群需要升级。

cluster 集群 (Noun)

eg: The cluster has three nodes.
这个集群有三个节点。

pod Pod (容器组) (Noun)

eg: The pod keeps restarting.
这个Pod一直在重启。

Helm Helm包管理 (Noun)

eg: Deploy it with a Helm chart.
用Helm chart部署它。

orchestration 编排 (Noun)

eg: Container orchestration is a big topic.
容器编排是个大话题。

scale 扩缩容 (Verb)

eg: We can scale it up if needed.
需要时我们可以扩容。

autoscale 自动扩缩容 (Verb)

eg: The service autoscales under load.
服务在负载下自动扩缩容。

replica 副本 (Noun)

eg: Run three replicas for redundancy.
为冗余起见运行三个副本。

load balancer 负载均衡器 (Noun)

eg: The load balancer spreads the traffic.
负载均衡器分散流量。

reverse proxy 反向代理 (Noun)

eg: Nginx acts as a reverse proxy.
Nginx充当反向代理。

Nginx Nginx服务器 (Noun)

eg: Nginx is serving the static files.
Nginx在提供静态文件。

Apache Apache服务器 (Noun)

eg: The old site runs on Apache.
旧网站跑在Apache上。

IIS IIS服务器 (Noun)

eg: The app is hosted on IIS.
应用托管在IIS上。

service 服务 (Noun)

eg: The service restarted itself.
服务自己重启了。

microservice 微服务 (Noun)

eg: We're splitting it into microservices.
我们要把它拆成微服务。

monolith 单体应用 (Noun)

eg: The monolith is hard to deploy.
单体应用很难部署。

serverless 无服务器的 (Adjective)

eg: The function runs serverless.
这个函数是无服务器运行的。

Lambda function Lambda函数 (Noun)

eg: A Lambda function handles the upload.
一个Lambda函数处理上传。

cron job 定时任务 (Noun)

eg: A cron job runs the backup nightly.
一个定时任务每晚运行备份。

scheduler 调度器 (Noun)

eg: The scheduler triggers the report.
调度器触发报告生成。

queue 队列 (Noun)

eg: The queue is backing up.
队列在积压。

message queue 消息队列 (Noun)

eg: We use a message queue for emails.
我们用消息队列发邮件。

topic 主题 (Noun)

eg: Publish the event to the topic.
把事件发布到这个主题。

publish 发布 (Verb)

eg: Publish the message to the bus.
把消息发布到总线。

subscribe 订阅 (Verb)

eg: The service subscribes to order events.
该服务订阅订单事件。

event-driven 事件驱动的 (Adjective)

eg: Our system is event-driven.
我们的系统是事件驱动的。

webhook 网络钩子 (Noun)

eg: Set up a webhook to notify Slack.
设置一个webhook通知Slack。

monitoring 监控 (Noun)

eg: We need better monitoring.
我们需要更好的监控。

monitor 监控 (Verb)

eg: We monitor the CPU usage closely.
我们密切监控CPU使用率。

alert 告警 (Noun)

eg: An alert fired at three this morning.
今天凌晨三点触发了一个告警。

alerting 告警机制 (Noun)

eg: Tune the alerting so it's less noisy.
调一下告警，让它别那么吵。

noisy 嘈杂的；误报多的 (Adjective)

eg: The alerts are too noisy.
告警太吵了，误报太多。

dashboard 仪表盘 (Noun)

eg: Check the dashboard for spikes.
看看仪表盘上有没有峰值。

Grafana Grafana工具 (Noun)

eg: The Grafana board shows the latency.
Grafana看板显示了延迟。

Prometheus Prometheus监控 (Noun)

eg: Prometheus scrapes the metrics.
Prometheus抓取指标。

Datadog Datadog监控 (Noun)

eg: Datadog flagged the slow endpoint.
Datadog标出了那个慢接口。

Splunk Splunk日志工具 (Noun)

eg: Search the Splunk logs for the error.
在Splunk日志里搜一下这个错误。

ELK ELK日志栈 (Noun)

eg: Our logs go into the ELK stack.
我们的日志进ELK栈。

observability 可观测性 (Noun)

eg: Observability is a priority this year.
可观测性是今年的重点。

telemetry 遥测 (Noun)

eg: We collect telemetry from the app.
我们从应用收集遥测数据。

spike 突增 (Noun)

eg: There's a spike in errors at noon.
中午错误有个突增。

threshold 阈值 (Noun)

eg: The CPU crossed the threshold.
CPU超过了阈值。

baseline 基线 (Noun)

eg: Compare it against the baseline.
和基线对比一下。

benchmark 基准测试 (Noun)

eg: Run a benchmark before and after.
前后各跑一次基准测试。

profiling 性能剖析 (Noun)

eg: Profiling showed the slow method.
性能剖析找出了慢的方法。

load test 负载测试 (Noun)

eg: We ran a load test last night.
我们昨晚做了负载测试。

stress test 压力测试 (Noun)

eg: Let's stress test the checkout.
我们对结账流程做压力测试。

capacity planning 容量规划 (Noun)

eg: We're doing capacity planning for summer.
我们在为夏季做容量规划。

runbook 运维手册 (Noun)

eg: Follow the runbook for this alert.
按这个告警的运维手册操作。

playbook 应对手册 (Noun)

eg: The security playbook lists all steps.
安全应对手册列出了所有步骤。

on-call rota 值班轮值表 (Noun)

eg: You're on the on-call rota this weekend.
你这个周末在值班轮值表上。

pager 呼叫器 (Noun)

eg: My pager went off at two in the morning.
凌晨两点我的呼叫器响了。

escalate 升级上报 (Verb)

eg: Escalate it to the senior engineer.
把它升级给高级工程师。

escalation 升级上报 (Noun)

eg: We need an escalation path.
我们需要一条升级上报路径。

triage 分诊 (Verb)

eg: Let's triage the bugs on Monday.
我们周一给bug分诊。

incident 事件；故障 (Noun)

eg: We have a major incident right now.
我们现在有个重大故障。

outage 服务中断 (Noun)

eg: The outage lasted about an hour.
服务中断持续了约一小时。

degraded 降级的 (Adjective)

eg: The service is running in a degraded state.
服务处于降级状态。

post-mortem 事后复盘 (Noun)

eg: We'll hold a post-mortem tomorrow.
我们明天开事后复盘会。

blameless 不追责的 (Adjective)

eg: We run blameless post-mortems.
我们开不追责的事后复盘。

war room 应急指挥室 (Noun)

eg: Everyone jump into the war room channel.
大家都进应急指挥频道。

bridge call 应急通话 (Noun)

eg: Join the bridge call for the outage.
加入处理故障的应急通话。

MTTR 平均修复时间 (Noun)

eg: MTTR has dropped this quarter.
本季度平均修复时间下降了。

failover 故障转移 (Noun)

eg: Failover kicked in automatically.
故障转移自动启动了。

redundancy 冗余 (Noun)

eg: We need more redundancy in the network.
网络里需要更多冗余。

backup 备份 (Noun)

eg: Take a backup before the upgrade.
升级前先做个备份。

restore 恢复 (Verb)

eg: We restored the data from last night's backup.
我们用昨晚的备份恢复了数据。

disaster recovery 灾难恢复 (Noun)

eg: Our disaster recovery plan needs testing.
我们的灾难恢复计划需要测试。

DR 灾难恢复 (Noun)

eg: We run a DR test twice a year.
我们每年做两次灾备演练。

RPO 恢复点目标 (Noun)

eg: Our RPO is fifteen minutes.
我们的恢复点目标是十五分钟。

RTO 恢复时间目标 (Noun)

eg: The RTO is one hour.
恢复时间目标是一小时。

cloud 云 (Noun)

eg: We're moving everything to the cloud.
我们要把所有东西迁到云上。

AWS 亚马逊云 (Noun)

eg: Our workloads run on AWS.
我们的工作负载跑在AWS上。

Azure 微软云 (Noun)

eg: We host the app on Azure.
我们把应用托管在Azure上。

GCP 谷歌云 (Noun)

eg: A few services still run on GCP.
有几个服务仍然跑在GCP上。

region 区域 (Noun)

eg: Host it in the closest region for lower latency.
托管在最近的区域以降低延迟。

data centre 数据中心 (Noun)

eg: The data centre is offsite.
数据中心在异地。

hosting 托管 (Noun)

eg: The hosting costs keep rising.
托管成本不断上涨。

host 托管 (Verb)

eg: We host our sites on Azure.
我们把网站托管在Azure上。

provision 开通；分配资源 (Verb)

eg: I'll provision a new VM this arvo.
我今天下午开通一台新虚拟机。

provisioning 资源配置 (Noun)

eg: Provisioning takes about ten minutes.
资源配置大约需要十分钟。

virtual machine 虚拟机 (Noun)

eg: Spin up a virtual machine for testing.
开一台虚拟机做测试。

VM 虚拟机 (Noun)

eg: The VM is out of memory.
这台虚拟机内存不足了。

spin up 启动；创建 (Phrase)

eg: Can you spin up a test environment?
你能创建一个测试环境吗？

tear down 拆除；销毁 (Phrase)

eg: Tear down the environment after testing.
测试后销毁这个环境。

shut down 关闭 (Phrase)

eg: Shut down the servers over summer.
夏天期间关闭服务器。

power off 关机 (Phrase)

eg: Please power off the machine.
请把机器关掉。

reboot 重启 (Verb)

eg: Try rebooting the router.
试试重启路由器。

restart 重启 (Verb)

eg: Restart the service and see.
重启服务看看。

server 服务器 (Noun)

eg: The server's not responding.
服务器没响应。

rack 机架 (Noun)

eg: The new server is in rack four.
新服务器在四号机架。

server room 机房 (Noun)

eg: The server room is freezing.
机房冷得要命。

on-premise 本地部署的 (Adjective)

eg: We still have some on-premise servers.
我们还有一些本地部署的服务器。

on-prem 本地部署的 (Adjective)

eg: The database is still on-prem.
数据库仍然是本地部署。

hybrid 混合的 (Adjective)

eg: We run a hybrid setup.
我们运行混合架构。

storage 存储 (Noun)

eg: We're running low on storage.
我们存储快不够了。

disk 磁盘 (Noun)

eg: The disk is almost full.
磁盘快满了。

SSD 固态硬盘 (Noun)

eg: Swap it for an SSD.
换成固态硬盘。

hard drive 硬盘 (Noun)

eg: The hard drive has failed.
硬盘坏了。

volume 存储卷 (Noun)

eg: Attach a new volume to the server.
给服务器挂个新存储卷。

bucket 存储桶 (Noun)

eg: Upload the files to the S3 bucket.
把文件上传到S3存储桶。

blob 二进制大对象 (Noun)

eg: The images are stored as blobs.
图片以二进制大对象存储。

file share 文件共享 (Noun)

eg: Put it on the file share.
把它放到文件共享里。

shared drive 共享盘 (Noun)

eg: Save it on the shared drive.
保存到共享盘上。

SharePoint SharePoint (Noun)

eg: The docs are on SharePoint.
文档在SharePoint上。

OneDrive OneDrive网盘 (Noun)

eg: I'll put it in my OneDrive.
我把它放进我的OneDrive。

Google Drive 谷歌网盘 (Noun)

eg: Share the folder on Google Drive.
在谷歌网盘上共享这个文件夹。

Dropbox Dropbox网盘 (Noun)

eg: The client sent it via Dropbox.
客户通过Dropbox发来的。

network 网络 (Noun)

eg: The network is really slow today.
今天网络特别慢。

connection 连接 (Noun)

eg: The connection keeps dropping.
连接一直断。

connectivity 连通性 (Noun)

eg: We've got a connectivity issue.
我们有个连通性问题。

bandwidth 带宽 (Noun)

eg: We're maxing out our bandwidth.
我们的带宽被占满了。

speed 速度 (Noun)

eg: What's the internet speed like?
网速怎么样？

router 路由器 (Noun)

eg: Restart the router first.
先重启路由器。

switch 交换机 (Noun)

eg: One of the switches is down.
有一台交换机挂了。

modem 调制解调器 (Noun)

eg: The modem's lights are all red.
调制解调器的灯全是红的。

access point 无线接入点 (Noun)

eg: Add another access point in the meeting room.
会议室再加一个无线接入点。

ethernet 以太网 (Noun)

eg: Plug in an ethernet cable for a faster link.
插根网线连接更快。

cable 线缆 (Noun)

eg: Someone tripped over the cable.
有人被线缆绊倒了。

port 端口 (Noun)

eg: Which port is it running on?
它运行在哪个端口？

IP address IP地址 (Noun)

eg: What's the server's IP address?
服务器的IP地址是什么？

DNS 域名系统 (Noun)

eg: It's probably a DNS issue.
多半是DNS问题。

domain 域名 (Noun)

eg: We need to renew the domain.
我们需要续费域名。

subdomain 子域名 (Noun)

eg: Set up a subdomain for staging.
为预发布环境设置个子域名。

URL 网址 (Noun)

eg: Can you send me the URL?
你能把网址发给我吗?

hostname 主机名 (Noun)

eg: Check the hostname of the machine.
检查这台机器的主机名。

SSL SSL加密 (Noun)

eg: The site's SSL has expired.
网站的SSL过期了。

TLS 传输层安全 (Noun)

eg: We enforce TLS on all traffic.
我们对所有流量强制使用TLS。

certificate 证书 (Noun)

eg: The certificate expires next week.
证书下周到期。

cert 证书 (Noun)

eg: Renew the cert before Friday.
周五前续一下证书。

HTTPS 安全超文本协议 (Noun)

eg: Force everything over HTTPS.
强制所有流量走HTTPS。

firewall 防火墙 (Noun)

eg: The firewall is blocking the connection.
防火墙拦截了这个连接。

proxy 代理 (Noun)

eg: Are you behind a proxy?
你在代理后面吗?

VPN 虚拟专用网络 (Noun)

eg: Connect to the VPN first.
先连上VPN。

remote access 远程访问 (Noun)

eg: Set up remote access for the contractor.
给外包人员设置远程访问。

remote desktop 远程桌面 (Noun)

eg: I'll log in via remote desktop.
我通过远程桌面登录。

RDP 远程桌面协议 (Noun)

eg: Open RDP to the server.
用RDP连到服务器。

SSH 安全外壳协议 (Noun)

eg: I'll SSH into the box.
我SSH登录到这台机器。

SFTP 安全文件传输 (Noun)

eg: Upload it via SFTP.
通过SFTP上传。

FTP 文件传输协议 (Noun)

eg: They still use FTP, believe it or not.
信不信由你，他们还在用FTP。

latency spike 延迟突增 (Noun)

eg: There was a latency spike around noon.
中午前后延迟突增。

packet loss 丢包 (Noun)

eg: There's some packet loss on the link.
这条链路有些丢包。

traceroute 路由追踪 (Noun)

eg: Run a traceroute to see where it stops.
跑个traceroute看在哪断的。

subnet 子网 (Noun)

eg: Put it in a separate subnet.
把它放到单独的子网里。

VLAN 虚拟局域网 (Noun)

eg: The guest wifi is on its own VLAN.
访客无线网在单独的VLAN上。

LAN 局域网 (Noun)

eg: It's only accessible on the LAN.
它只能在局域网内访问。

WAN 广域网 (Noun)

eg: The WAN link is down.
广域网链路断了。

gateway 网关 (Noun)

eg: Check the default gateway.
检查一下默认网关。

DHCP 动态主机配置 (Noun)

eg: DHCP assigns the addresses.
DHCP分配地址。

NAT 网络地址转换 (Noun)

eg: NAT is hiding the internal IPs.
NAT隐藏了内部IP。

CDN 内容分发网络 (Noun)

eg: Serve the images through a CDN.
通过CDN提供图片。

edge 边缘节点 (Noun)

eg: We cache the content at the edge.
我们在边缘节点缓存内容。

laptop 笔记本电脑 (Noun)

eg: My laptop's battery is dying.
我的笔记本电池快没电了。

desktop 台式机 (Noun)

eg: I'm on the desktop in the office.
我在办公室用的是台式机。

workstation 工作站 (Noun)

eg: The workstation needs more RAM.
这台工作站需要更多内存。

screen 屏幕 (Noun)

eg: The screen keeps flickering.
屏幕一直闪烁。

keyboard 键盘 (Noun)

eg: My keyboard's sticky keys are annoying.
我键盘的按键发黏，很烦。

mouse 鼠标 (Noun)

eg: The mouse isn't working.
鼠标不动了。

trackpad 触控板 (Noun)

eg: The trackpad's a bit jumpy.
触控板有点跳。

headset 耳麦 (Noun)

eg: Grab a headset for the call.
通话拿个耳麦。

headphones 耳机 (Noun)

eg: I'll put my headphones on to focus.
我戴上耳机集中注意力。

webcam 网络摄像头 (Noun)

eg: The webcam's not detected.
检测不到网络摄像头。

microphone 麦克风 (Noun)

eg: Check your microphone settings.
检查一下你的麦克风设置。

speaker 扬声器 (Noun)

eg: The speaker's crackling.
扬声器有杂音。

projector 投影仪 (Noun)

eg: The projector's not connecting.
投影仪连不上。

dock 扩展坞 (Noun)

eg: Plug the laptop into the dock.
把笔记本插到扩展坞上。

HDMI HDMI接口 (Noun)

eg: Have you got an HDMI cable?
你有HDMI线吗？

USB USB接口 (Noun)

eg: Use a USB stick to transfer it.
用个U盘传输它。

adapter 转接器 (Noun)

eg: I need a USB-C adapter.
我需要个USB-C转接器。

charger 充电器 (Noun)

eg: Anyone got a spare charger?
谁有备用充电器？

battery 电池 (Noun)

eg: The battery only lasts two hours.
电池只能用两小时。

printer 打印机 (Noun)

eg: The printer's jammed again.
打印机又卡纸了。

scanner 扫描仪 (Noun)

eg: Use the scanner to send it through.
用扫描仪扫过去。

phone 手机 (Noun)

eg: My phone's out of battery.
我手机没电了。

mobile 手机；移动设备 (Noun)

eg: Can you check it on mobile?
你能在手机上看看吗？

tablet 平板 (Noun)

eg: We're testing on a tablet.
我们在平板上测试。

device 设备 (Noun)

eg: Which device are you using?
你在用哪个设备？

hardware 硬件 (Noun)

eg: We need to upgrade our hardware.
我们需要升级硬件。

peripheral 外设 (Noun)

eg: Order some peripherals for the new starters.
给新人订些外设。

CPU 处理器 (Noun)

eg: The CPU is maxed out.
CPU满载了。

GPU 显卡 (Noun)

eg: We need a GPU for the model training.
模型训练我们需要显卡。

RAM 内存 (Noun)

eg: The machine only has eight gigs of RAM.
这台机器只有8G内存。

memory 内存 (Noun)

eg: It's running out of memory.
它内存快耗尽了。

processor 处理器 (Noun)

eg: The processor is really old.
这个处理器很旧了。

firmware 固件 (Noun)

eg: Update the router firmware.
更新路由器固件。

driver 驱动程序 (Noun)

eg: Update the printer driver.
更新打印机驱动。

BIOS 基本输入输出系统 (Noun)

eg: Press F2 to enter the BIOS.
按F2进入BIOS。

boot 启动 (Verb)

eg: The machine won't boot.
机器启动不了。

crash 崩溃 (Verb)

eg: The app crashes on startup.
应用启动时崩溃。

hang 卡住 (Verb)

eg: The page just hangs.
页面就是卡住了。

lag 卡顿 (Noun)

eg: There's a lot of lag on the call.
通话卡顿很厉害。

slow 慢的 (Adjective)

eg: The system's slow this morning.
今天早上系统很慢。

sluggish 迟缓的 (Adjective)

eg: My machine feels sluggish.
我的机器感觉迟缓。

overheating 过热的 (Adjective)

eg: The laptop's overheating.
笔记本过热了。

Windows Windows系统 (Noun)

eg: Most of our machines run Windows.
我们大多数机器跑Windows。

macOS macOS系统 (Noun)

eg: The design team uses macOS.
设计团队用macOS。

Linux Linux系统 (Noun)

eg: The servers all run Linux.
服务器全都跑Linux。

Ubuntu Ubuntu系统 (Noun)

eg: We use Ubuntu on the build servers.
构建服务器用Ubuntu。

Android 安卓系统 (Noun)

eg: The bug only appears on Android.
这个bug只在安卓上出现。

iOS iOS系统 (Noun)

eg: We need to support iOS as well.
我们也需要支持iOS。

operating system 操作系统 (Noun)

eg: Which operating system are you on?
你用哪个操作系统？

OS 操作系统 (Noun)

eg: Update your OS to the latest version.
把操作系统更新到最新版本。

update 更新 (Noun)

eg: There's an update waiting for your laptop.
你的笔记本有个更新待安装。

updates 更新 (Noun)

eg: Install the updates tonight.
今晚安装更新。

patching 打补丁 (Noun)

eg: Patching happens on the first Sunday.
打补丁在每月第一个周日进行。

security update 安全更新 (Noun)

eg: Apply the security update straight away.
马上应用安全更新。

reinstall 重装 (Verb)

eg: I had to reinstall Windows.
我不得不重装Windows。

helpdesk 服务台 (Noun)

eg: Log a ticket with the helpdesk.
在服务台提个工单。

help desk 服务台 (Noun)

eg: The help desk is open until five.
服务台开到五点。

IT support IT支持 (Noun)

eg: Call IT support if it's still broken.
如果还是坏的就联系IT支持。

service desk 服务台 (Noun)

eg: The service desk got a lot of calls today.
服务台今天接了很多电话。

sysadmin 系统管理员 (Noun)

eg: Ask the sysadmin to reset it.
让系统管理员重置它。

administrator 管理员 (Noun)

eg: You'll need administrator rights.
你需要管理员权限。

admin 管理员 (Noun)

eg: Ask the admin to add you.
让管理员把你加进去。

account 账号 (Noun)

eg: Your account has been locked.
你的账号被锁了。

username 用户名 (Noun)

eg: What's your username?
你的用户名是什么？

password 密码 (Noun)

eg: I forgot my password.
我忘记密码了。

locked out 被锁在外面 (Phrase)

eg: I'm locked out of my account.
我的账号被锁了，登不进去。

log in 登录 (Phrase)

eg: I can't log in this morning.
今天早上我登不进去。

login 登录 (Noun)

eg: The login page won't load.
登录页面加载不出来。

log out 登出 (Phrase)

eg: Log out and log back in.
先登出再重新登录。

sign in 登录 (Phrase)

eg: Sign in with your work email.
用工作邮箱登录。

sign up 注册 (Phrase)

eg: Sign up for the trial account.
注册试用账号。

credentials 凭据 (Noun)

eg: Your credentials have expired.
你的凭据过期了。

permission 权限 (Noun)

eg: You don't have permission to see that.
你没有权限查看那个。

access 访问权限 (Noun)

eg: I need access to the repo.
我需要那个仓库的访问权限。

grant 授予 (Verb)

eg: Can you grant me access to the folder?
你能授予我这个文件夹的访问权限吗？

revoke 撤销 (Verb)

eg: We revoked her access on her last day.
她最后一天我们撤销了她的权限。

request access 申请权限 (Phrase)

eg: Request access through the portal.
通过门户申请权限。

onboard 办理入职 (Verb)

eg: We'll onboard the new starter tomorrow.
我们明天为新人办理入职。

new starter 新员工 (Noun)

eg: The new starter's laptop is ready.
新员工的笔记本准备好了。

laptop refresh 笔记本更换周期 (Noun)

eg: The laptop refresh is next quarter.
笔记本更换在下个季度。

asset 资产 (Noun)

eg: Tag every device as an asset.
把每台设备都标记为资产。

inventory 清单 (Noun)

eg: Update the hardware inventory.
更新硬件清单。

licence 许可证 (Noun)

eg: We need to renew the software licence.
我们需要续订软件许可证。

license 许可证 (Noun)

eg: The license expires in June.
许可证六月到期。

subscription 订阅 (Noun)

eg: Cancel the unused subscription.
取消没用的订阅。

seat 席位 (Noun)

eg: We need ten more seats.
我们还需要十个席位。

tenant 租户 (Noun)

eg: The tenant is set up in Azure.
租户在Azure里已经设置好了。

Microsoft 365 微软365 (Noun)

eg: Everyone has a Microsoft 365 account.
每个人都有微软365账号。

Office 365 Office 365 (Noun)

eg: Our email runs on Office 365.
我们邮箱用的是Office 365。

Outlook Outlook邮箱 (Noun)

eg: I'll send it from Outlook.
我用Outlook发。

Teams 微软Teams (Noun)

eg: Ping me on Teams.
在Teams上找我。

Slack Slack (Noun)

eg: Post it in the Slack channel.
发到Slack频道里。

Zoom Zoom会议 (Noun)

eg: Send me the Zoom link.
把Zoom链接发我。

Jira Jira工具 (Noun)

eg: Update the Jira ticket, please.
请更新Jira工单。

Confluence Confluence文档 (Noun)

eg: It's documented in Confluence.
Confluence里有文档。

Trello Trello看板 (Noun)

eg: We track tasks on Trello.
我们在Trello上跟踪任务。

Asana Asana工具 (Noun)

eg: Our marketing team uses Asana.
我们的市场团队用Asana。

Notion Notion笔记 (Noun)

eg: I keep my notes in Notion.
我把笔记放在Notion里。

Figma Figma设计工具 (Noun)

eg: The designs are in Figma.
设计稿在Figma里。

Postman Postman接口工具 (Noun)

eg: Test the endpoint in Postman.
在Postman里测试这个接口。

Swagger Swagger文档 (Noun)

eg: The Swagger docs list all endpoints.
Swagger文档列出了所有接口。

Sentry Sentry错误监控 (Noun)

eg: Sentry caught the exception.
Sentry捕获到了这个异常。

New Relic New Relic监控 (Noun)

eg: New Relic shows the slow query.
New Relic显示了慢查询。

PagerDuty PagerDuty值班系统 (Noun)

eg: PagerDuty woke me at three.
PagerDuty凌晨三点把我叫醒了。

ServiceNow ServiceNow工单系统 (Noun)

eg: Log the request in ServiceNow.
在ServiceNow里登记这个请求。

LastPass LastPass密码管理 (Noun)

eg: The shared logins are in LastPass.
共享登录信息在LastPass里。

password manager 密码管理器 (Noun)

eg: Use a password manager.
请用密码管理器。

API 应用程序接口 (Noun)

eg: The API is returning a 500 error.
接口返回了500错误。

endpoint 接口端点 (Noun)

eg: Which endpoint are you calling?
你在调用哪个端点？

REST REST风格接口 (Noun)

eg: It's a REST API with JSON responses.
这是个返回JSON的REST接口。

RESTful 符合REST风格的 (Adjective)

eg: We're building a RESTful service.
我们在做一个RESTful服务。

GraphQL GraphQL查询语言 (Noun)

eg: We switched the frontend to GraphQL.
我们把前端切换到了GraphQL。

gRPC gRPC协议 (Noun)

eg: Internal services talk over gRPC.
内部服务之间通过gRPC通信。

SOAP SOAP协议 (Noun)

eg: The government system still uses SOAP.
政府系统仍然使用SOAP。

request 请求 (Noun)

eg: The request timed out.
请求超时了。

response 响应 (Noun)

eg: Check the response body.
检查一下响应内容。

payload 请求负载 (Noun)

eg: The payload is too large.
请求负载太大了。

header 请求头 (Noun)

eg: Add the auth header to the request.
在请求里加上认证头。

body 请求体 (Noun)

eg: Put the data in the request body.
把数据放在请求体里。

status code 状态码 (Noun)

eg: What status code are you getting?
你收到的状态码是什么？

timeout 超时 (Noun)

eg: We're hitting a timeout on that call.
那个调用超时了。

retry 重试 (Verb)

eg: The client will retry three times.
客户端会重试三次。

rate limit 速率限制 (Noun)

eg: We've hit the API rate limit.
我们触到了接口速率限制。

throttle 限流 (Verb)

eg: We throttle requests per user.
我们对每个用户限流。

pagination 分页 (Noun)

eg: Add pagination to the results.
给结果加上分页。

token 令牌 (Noun)

eg: The token has expired.
令牌过期了。

bearer token 持有者令牌 (Noun)

eg: Send the bearer token in the header.
在请求头里带上持有者令牌。

API key 接口密钥 (Noun)

eg: Don't commit your API key to Git.
别把接口密钥提交到Git里。

OAuth OAuth授权 (Noun)

eg: We use OAuth for third-party logins.
我们用OAuth做第三方登录。

JWT JSON网络令牌 (Noun)

eg: Decode the JWT and check the claims.
解码JWT检查声明。

claim 声明 (Noun)

eg: The token is missing a claim.
令牌缺少一个声明。

authentication 身份认证 (Noun)

eg: Authentication is failing for some users.
部分用户身份认证失败。

authorisation 授权 (Noun)

eg: Authorisation is handled by roles.
授权由角色处理。

authorization 授权 (Noun)

eg: Check the authorization rules.
检查授权规则。

SSO 单点登录 (Noun)

eg: Staff log in with SSO.
员工使用单点登录。

MFA 多因素认证 (Noun)

eg: MFA is required for all admins.
所有管理员都必须使用多因素认证。

role 角色 (Noun)

eg: Assign the admin role to her.
把管理员角色分配给她。

session 会话 (Noun)

eg: The session expired after ten minutes.
会话在十分钟后过期。

cookie Cookie (Noun)

eg: Clear your cookies and try again.
清除Cookie再试一次。

route 路由 (Noun)

eg: Add a route for the new page.
为新页面加个路由。

controller 控制器 (Noun)

eg: The controller handles the request.
控制器处理请求。

model 模型 (Noun)

eg: Update the model to include the email.
更新模型加入邮箱字段。

repository pattern 仓储模式 (Noun)

eg: We use the repository pattern for data access.
我们用仓储模式做数据访问。

business logic 业务逻辑 (Noun)

eg: Keep the business logic out of the controller.
别把业务逻辑放在控制器里。

layer 层 (Noun)

eg: Add a service layer between them.
在它们之间加一个服务层。

data access 数据访问 (Noun)

eg: The data access layer needs tests.
数据访问层需要测试。

ORM 对象关系映射 (Noun)

eg: The ORM generates the SQL for us.
对象关系映射为我们生成SQL。

database 数据库 (Noun)

eg: The database is running slowly.
数据库运行得很慢。

DB 数据库 (Noun)

eg: Check the DB connection string.
检查数据库连接字符串。

table 表 (Noun)

eg: Add a column to the customer table.
给客户表加一列。

column 列 (Noun)

eg: Which column stores the date?
哪一列存储日期？

row 行 (Noun)

eg: Delete the duplicate row.
删除重复的行。

record 记录 (Noun)

eg: There are ten thousand records in the table.
表里有一万条记录。

field 字段 (Noun)

eg: The field is missing in the response.
响应里缺少这个字段。

schema 模式；结构 (Noun)

eg: We changed the database schema.
我们修改了数据库结构。

migration 迁移 (Noun)

eg: Run the migration on staging first.
先在预发布环境跑迁移。

migrate 迁移 (Verb)

eg: We're migrating the data next week.
我们下周迁移数据。

seed 填充初始数据 (Verb)

eg: Seed the database with test data.
用测试数据填充数据库。

primary key 主键 (Noun)

eg: The ID is the primary key.
ID是主键。

foreign key 外键 (Noun)

eg: Add a foreign key to the orders table.
给订单表加个外键。

index 索引 (Noun)

eg: Add an index to speed up the query.
加个索引加快查询。

constraint 约束 (Noun)

eg: A unique constraint prevents duplicates.
唯一约束防止重复。

relationship 关系 (Noun)

eg: Define the relationship between the tables.
定义这些表之间的关系。

join 连接查询 (Noun)

eg: That join is really slow.
那个连接查询特别慢。

select 查询选取 (Verb)

eg: Select only the columns you need.
只查询你需要的列。

insert 插入 (Verb)

eg: Insert the new record.
插入新记录。

delete 删除 (Verb)

eg: Delete the old records.
删除旧记录。

upsert 插入或更新 (Verb)

eg: We upsert the records nightly.
我们每晚插入或更新这些记录。

WHERE clause WHERE子句 (Noun)

eg: You forgot the WHERE clause.
你忘了WHERE子句。

group by 分组 (Phrase)

eg: Group by month for the report.
按月分组做报告。

aggregate 聚合 (Verb)

eg: Aggregate the sales by region.
按区域聚合销售额。

subquery 子查询 (Noun)

eg: Replace the subquery with a join.
用连接查询替换子查询。

view 视图 (Noun)

eg: Create a view for the report.
为报告创建一个视图。

stored procedure 存储过程 (Noun)

eg: The logic is in a stored procedure.
逻辑在一个存储过程里。

transaction 事务 (Noun)

eg: Wrap it in a transaction.
把它包在事务里。

lock 锁 (Noun)

eg: A lock is blocking the update.
有把锁阻塞了这次更新。

query plan 执行计划 (Noun)

eg: Look at the query plan.
看看执行计划。

slow query 慢查询 (Noun)

eg: We've got a slow query in production.
生产环境里有个慢查询。

SQL Server SQL Server数据库 (Noun)

eg: We're on SQL Server 2019.
我们用的是SQL Server 2019。

Postgres PostgreSQL数据库 (Noun)

eg: Our new services use Postgres.
我们的新服务用Postgres。

MySQL MySQL数据库 (Noun)

eg: The old site runs on MySQL.
旧网站跑在MySQL上。

Oracle Oracle数据库 (Noun)

eg: The legacy system uses Oracle.
遗留系统用的是Oracle。

SQLite SQLite数据库 (Noun)

eg: SQLite is fine for local testing.
SQLite适合本地测试。

MongoDB MongoDB数据库 (Noun)

eg: We store the logs in MongoDB.
我们把日志存在MongoDB里。

NoSQL 非关系型的 (Adjective)

eg: A NoSQL database suits this use case.
这个场景适合非关系型数据库。

Redis Redis缓存 (Noun)

eg: Redis handles the session cache.
Redis处理会话缓存。

Elasticsearch Elasticsearch搜索 (Noun)

eg: Search is powered by Elasticsearch.
搜索由Elasticsearch驱动。

Cosmos DB Cosmos数据库 (Noun)

eg: We store documents in Cosmos DB.
我们在Cosmos DB里存文档。

DynamoDB DynamoDB数据库 (Noun)

eg: Orders are saved in DynamoDB.
订单存在DynamoDB里。

Kafka Kafka消息系统 (Noun)

eg: Events flow through Kafka.
事件通过Kafka流转。

RabbitMQ RabbitMQ消息队列 (Noun)

eg: RabbitMQ delivers the notifications.
RabbitMQ发送通知。

data 数据 (Noun)

eg: We need more data to decide.
我们需要更多数据才能决定。

dataset 数据集 (Noun)

eg: The dataset has two million rows.
这个数据集有两百万行。

big data 大数据 (Noun)

eg: We don't really need big data here.
这里我们其实不需要大数据。

data warehouse 数据仓库 (Noun)

eg: Load it into the data warehouse.
把它加载到数据仓库。

data lake 数据湖 (Noun)

eg: Raw files land in the data lake.
原始文件落进数据湖。

data model 数据模型 (Noun)

eg: The data model needs cleaning up.
数据模型需要整理。

data quality 数据质量 (Noun)

eg: Data quality is our biggest issue.
数据质量是我们最大的问题。

data pipeline 数据管道 (Noun)

eg: The data pipeline runs overnight.
数据管道在夜里运行。

ETL 抽取转换加载 (Noun)

eg: The ETL job failed last night.
昨晚ETL作业失败了。

import 导入 (Verb)

eg: Import the spreadsheet into the system.
把电子表格导入系统。

export 导出 (Verb)

eg: Export the results to Excel.
把结果导出到Excel。

extract 提取 (Verb)

eg: Extract the data from the PDF.
从PDF里提取数据。

load 加载 (Verb)

eg: Load the file into the database.
把文件加载到数据库。

batch 批处理 (Noun)

eg: The batch runs at midnight.
批处理在午夜运行。

stream 数据流 (Noun)

eg: We process the events as a stream.
我们把事件当作数据流处理。

real-time 实时的 (Adjective)

eg: The dashboard shows real-time data.
仪表盘显示实时数据。

live 实时的；上线的 (Adjective)

eg: Is the data live or cached?
数据是实时的还是缓存的？

replication 复制 (Noun)

eg: Replication is lagging behind.
复制落后了。

duplicate 重复的 (Adjective)

eg: There are duplicate entries in the list.
列表里有重复条目。

dedupe 去重 (Verb)

eg: Dedupe the customer list.
给客户名单去重。

clean 清洗 (Verb)

eg: We need to clean the data first.
我们需要先清洗数据。

messy data 脏数据 (Noun)

eg: The messy data breaks our reports.
脏数据搞坏了我们的报告。

missing 缺失的 (Adjective)

eg: A few values are missing.
有几个值缺失了。

corrupt 损坏的 (Adjective)

eg: The file is corrupt.
文件损坏了。

integrity 完整性 (Noun)

eg: We need to protect data integrity.
我们需要保护数据完整性。

audit trail 审计追踪 (Noun)

eg: Keep an audit trail of every change.
保留每次变更的审计追踪。

audit log 审计日志 (Noun)

eg: Check the audit log for the change.
在审计日志里查这次变更。

Excel Excel表格 (Noun)

eg: Send me the report in Excel.
把报告用Excel发给我。

spreadsheet 电子表格 (Noun)

eg: It's all in a spreadsheet at the moment.
目前都在一个电子表格里。

sheet 工作表 (Noun)

eg: Check the second sheet.
看看第二个工作表。

pivot table 数据透视表 (Noun)

eg: Make a pivot table of the sales.
做个销售数据透视表。

formula 公式 (Noun)

eg: The formula's returning an error.
公式返回了错误。

macro 宏 (Noun)

eg: A macro automates the monthly report.
一个宏自动生成月报。

Power BI Power BI工具 (Noun)

eg: The dashboards are in Power BI.
仪表盘在Power BI里。

Tableau Tableau工具 (Noun)

eg: The analysts use Tableau.
分析师用Tableau。

BI 商业智能 (Noun)

eg: The BI team built the reports.
商业智能团队做了这些报告。

analytics 分析 (Noun)

eg: Analytics shows a drop in signups.
数据分析显示注册量下降了。

analysis 分析 (Noun)

eg: Let's do some analysis on the results.
我们对结果做些分析。

analyst 分析师 (Noun)

eg: The analyst is preparing the numbers.
分析师在准备数据。

insight 洞察 (Noun)

eg: The data gave us some useful insights.
数据给了我们一些有用的洞察。

trend 趋势 (Noun)

eg: There's an upward trend in usage.
使用量呈上升趋势。

chart 图表 (Noun)

eg: Add a chart to the report.
在报告里加个图表。

graph 图 (Noun)

eg: The graph shows a steady decline.
图表显示稳步下降。

visualisation 可视化 (Noun)

eg: The visualisation is easy to read.
这个可视化很容易读。

statistic 统计数据 (Noun)

eg: The statistics look promising.
统计数据看起来很有希望。

average 平均值 (Noun)

eg: What's the average response time?
平均响应时间是多少？

median 中位数 (Noun)

eg: The median is more useful here.
这里中位数更有用。

percentage 百分比 (Noun)

eg: What percentage of users are affected?
受影响的用户占百分之多少？

ratio 比率 (Noun)

eg: The ratio of errors is very low.
错误率非常低。

total 总数 (Noun)

eg: What's the total for the month?
这个月的总数是多少？

count 计数 (Noun)

eg: The count doesn't match.
计数对不上。

sum 总和 (Noun)

eg: Calculate the sum of all orders.
计算所有订单的总和。

maximum 最大值 (Noun)

eg: Set the maximum to fifty.
把最大值设为五十。

minimum 最小值 (Noun)

eg: The minimum is ten characters.
最小长度是十个字符。

range 范围 (Noun)

eg: Pick a date range.
选一个日期范围。

sample 样本 (Noun)

eg: Take a small sample first.
先取个小样本。

accuracy 准确性 (Noun)

eg: The model's accuracy is ninety-two percent.
模型准确率是百分之九十二。

precision 精确度 (Noun)

eg: Precision matters in finance.
金融领域精确度很重要。

outlier 异常值 (Noun)

eg: Remove the outliers from the data.
把数据里的异常值去掉。

correlation 相关性 (Noun)

eg: There's a correlation between the two.
两者之间存在相关性。

forecast 预测 (Noun)

eg: Here's the forecast for next quarter.
这是下个季度的预测。

website 网站 (Noun)

eg: The website is down again.
网站又挂了。

web app 网页应用 (Noun)

eg: It's a single-page web app.
这是个单页网页应用。

webpage 网页 (Noun)

eg: The webpage takes ages to load.
这个网页加载得特别慢。

site 网站 (Noun)

eg: Have you seen the new site?
你看过新网站了吗？

homepage 首页 (Noun)

eg: The homepage needs a fresh look.
首页需要焕然一新。

landing page 落地页 (Noun)

eg: We built a landing page for the campaign.
我们为这次活动做了个落地页。

page 页面 (Noun)

eg: Which page has the bug?
哪个页面有这个bug？

browser 浏览器 (Noun)

eg: Does it work in every browser?
它在所有浏览器都能用吗？

Chrome Chrome浏览器 (Noun)

eg: It works fine in Chrome.
它在Chrome里正常。

Firefox Firefox浏览器 (Noun)

eg: It's broken in Firefox.
它在Firefox里坏了。

Safari Safari浏览器 (Noun)

eg: Safari renders it differently.
Safari渲染得不一样。

cross-browser 跨浏览器的 (Adjective)

eg: We need cross-browser testing.
我们需要跨浏览器测试。

HTML 超文本标记语言 (Noun)

eg: Check the HTML for missing tags.
检查HTML里有没有缺失的标签。

CSS 层叠样式表 (Noun)

eg: The CSS is a bit of a mess.
CSS有点乱。

Sass Sass样式语言 (Noun)

eg: We write our styles in Sass.
我们用Sass写样式。

Tailwind Tailwind样式框架 (Noun)

eg: We're using Tailwind for styling.
我们用Tailwind做样式。

Bootstrap Bootstrap框架 (Noun)

eg: The layout uses Bootstrap.
布局用的是Bootstrap。

React React框架 (Noun)

eg: Most of our UI is in React.
我们大部分界面用React做的。

Angular Angular框架 (Noun)

eg: The old dashboard is in Angular.
旧仪表盘是用Angular做的。

Vue Vue框架 (Noun)

eg: The new admin site uses Vue.
新的管理站点用Vue。

Svelte Svelte框架 (Noun)

eg: We're trying Svelte for a small project.
我们在一个小项目里试用Svelte。

Next.js Next.js框架 (Noun)

eg: The marketing site runs on Next.js.
营销网站跑在Next.js上。

jQuery jQuery库 (Noun)

eg: The legacy code still uses jQuery.
遗留代码仍然用jQuery。

npm npm包管理器 (Noun)

eg: Run npm install first.
先运行npm install。

Yarn Yarn包管理器 (Noun)

eg: We use Yarn instead of npm.
我们用Yarn代替npm。

webpack Webpack打包工具 (Noun)

eg: Webpack takes forever to build.
Webpack构建要花很久。

Vite Vite构建工具 (Noun)

eg: Vite made our dev server much faster.
Vite让我们的开发服务器快多了。

bundle 打包文件 (Noun)

eg: The bundle is way too big.
打包文件太大了。

minify 压缩代码 (Verb)

eg: Minify the scripts for production.
为生产环境压缩脚本。

transpile 转译 (Verb)

eg: The code is transpiled to plain JavaScript.
代码被转译成了普通JavaScript。

lint 代码检查 (Verb)

eg: Lint your code before you push.
推送前先做代码检查。

linter 代码检查工具 (Noun)

eg: The linter flagged a few warnings.
代码检查工具报了几个警告。

Prettier Prettier格式化工具 (Noun)

eg: Run Prettier to format the files.
运行Prettier格式化文件。

ESLint ESLint检查工具 (Noun)

eg: ESLint is failing in the pipeline.
ESLint在流水线里失败了。

DOM 文档对象模型 (Noun)

eg: Update the DOM when the data changes.
数据变化时更新DOM。

element 元素 (Noun)

eg: Select the element by its ID.
通过ID选取这个元素。

attribute 属性 (Noun)

eg: Add a class attribute.
加一个class属性。

class name 类名 (Noun)

eg: Use a clear class name.
用个清楚的类名。

selector 选择器 (Noun)

eg: The CSS selector is too specific.
这个CSS选择器太具体了。

style 样式 (Noun)

eg: Apply the style to the header.
把样式应用到页头。

stylesheet 样式表 (Noun)

eg: Link the stylesheet in the head.
在head里引入样式表。

layout 布局 (Noun)

eg: The layout breaks on small screens.
布局在小屏幕上错乱。

grid 网格 (Noun)

eg: Use a grid for the card layout.
卡片布局用网格。

flexbox 弹性盒布局 (Noun)

eg: Flexbox makes it easy to centre.
弹性盒让居中变得容易。

margin 外边距 (Noun)

eg: Add a bit more margin here.
这里多加点外边距。

padding 内边距 (Noun)

eg: The padding is too tight.
内边距太紧了。

border 边框 (Noun)

eg: Add a thin border around the card.
给卡片加一圈细边框。

font 字体 (Noun)

eg: Which font are we using?
我们用哪个字体？

colour 颜色 (Noun)

eg: Let's change the button colour.
我们改一下按钮颜色。

color 颜色 (Noun)

eg: The color contrast is too low.
颜色对比度太低了。

theme 主题 (Noun)

eg: Add a dark theme.
加一个深色主题。

dark mode 深色模式 (Noun)

eg: Users have been asking for dark mode.
用户一直要求深色模式。

icon 图标 (Noun)

eg: Use an icon instead of text.
用个图标代替文字。

logo 标志 (Noun)

eg: Put the logo in the top left.
把标志放在左上角。

banner 横幅 (Noun)

eg: Add a banner for the promotion.
为促销加个横幅。

hero 首屏主视觉 (Noun)

eg: The hero section needs a stronger headline.
首屏主视觉需要更有力的标题。

footer 页脚 (Noun)

eg: Add the privacy link to the footer.
把隐私链接加到页脚。

navbar 导航栏 (Noun)

eg: The navbar collapses on mobile.
导航栏在手机上会折叠。

navigation 导航 (Noun)

eg: The navigation is confusing.
导航很让人困惑。

menu 菜单 (Noun)

eg: Add a drop-down menu.
加一个下拉菜单。

sidebar 侧边栏 (Noun)

eg: The sidebar has the filters.
侧边栏里有筛选器。

tab 标签页 (Noun)

eg: Switch to the second tab.
切换到第二个标签页。

button 按钮 (Noun)

eg: The button isn't clickable.
这个按钮点不了。

link 链接 (Noun)

eg: The link is broken.
链接坏了。

form 表单 (Noun)

eg: The form doesn't submit.
表单提交不了。

input field 输入框 (Noun)

eg: Add an input field for the postcode.
为邮编加个输入框。

dropdown 下拉框 (Noun)

eg: The dropdown shows all the options.
下拉框显示所有选项。

checkbox 复选框 (Noun)

eg: Tick the checkbox to agree.
勾选复选框表示同意。

radio button 单选按钮 (Noun)

eg: Use a radio button for this choice.
这个选择用单选按钮。

toggle switch 切换开关 (Noun)

eg: A toggle switch turns notifications on.
切换开关可以打开通知。

slider 滑块 (Noun)

eg: Use a slider to pick the amount.
用滑块选金额。

modal 弹窗 (Noun)

eg: Show a modal to confirm the deletion.
弹出一个弹窗确认删除。

popup 弹出窗口 (Noun)

eg: The popup is blocking the page.
弹出窗口遮住了页面。

tooltip 提示气泡 (Noun)

eg: Add a tooltip to explain the icon.
加个提示气泡来解释这个图标。

notification 通知 (Noun)

eg: Send a push notification.
发送一条推送通知。

error message 错误提示 (Noun)

eg: The error message isn't very helpful.
这个错误提示不太有用。

loading 加载中 (Noun)

eg: Show a loading spinner.
显示一个加载动画。

spinner 加载转圈 (Noun)

eg: The spinner never stops.
加载转圈一直不停。

scroll 滚动 (Verb)

eg: The page won't scroll on iOS.
页面在iOS上滚动不了。

hover 悬停 (Verb)

eg: The menu opens on hover.
菜单在悬停时展开。

click 点击 (Verb)

eg: Click the button to save.
点按钮保存。

tap 轻点 (Verb)

eg: Tap the icon to open the menu.
点图标打开菜单。

drag 拖动 (Verb)

eg: Drag the card to the next column.
把卡片拖到下一列。

drop 放下 (Verb)

eg: Drop the file here to upload.
把文件放到这里上传。

swipe 滑动 (Verb)

eg: Swipe left to delete.
向左滑动删除。

animation 动画 (Noun)

eg: The animation feels a bit slow.
这个动画感觉有点慢。

transition 过渡 (Noun)

eg: Add a smooth transition.
加个平滑的过渡。

responsive 响应式的 (Adjective)

eg: Make the site responsive.
把网站做成响应式的。

viewport 视口 (Noun)

eg: Set the viewport for mobile.
为手机设置视口。

resolution 分辨率 (Noun)

eg: Check it at a higher resolution.
用更高分辨率检查一下。

pixel 像素 (Noun)

eg: It's off by a few pixels.
它偏了几个像素。

pixel-perfect 像素级精确的 (Adjective)

eg: The client wants it pixel-perfect.
客户想要像素级精确。

accessibility 无障碍 (Noun)

eg: Accessibility is a legal requirement for us.
无障碍对我们是法律要求。

accessible 无障碍的 (Adjective)

eg: Make sure the site is accessible.
确保网站是无障碍的。

screen reader 读屏软件 (Noun)

eg: Test it with a screen reader.
用读屏软件测试一下。

alt text 替代文本 (Noun)

eg: Add alt text to every image.
给每张图片加替代文本。

contrast 对比度 (Noun)

eg: The contrast is too low for readability.
对比度太低，不易阅读。

WCAG 无障碍指南 (Noun)

eg: We aim for WCAG AA compliance.
我们目标符合WCAG AA标准。

keyboard navigation 键盘导航 (Noun)

eg: Support keyboard navigation.
支持键盘导航。

UX 用户体验 (Noun)

eg: The UX of this form is poor.
这个表单的用户体验很差。

UI 用户界面 (Noun)

eg: The UI looks clean and modern.
界面看起来简洁现代。

user experience 用户体验 (Noun)

eg: We're improving the user experience.
我们在改善用户体验。

user interface 用户界面 (Noun)

eg: The user interface needs simplifying.
用户界面需要简化。

usability 易用性 (Noun)

eg: We ran a usability test last week.
我们上周做了易用性测试。

user journey 用户旅程 (Noun)

eg: Map out the user journey.
把用户旅程梳理出来。

user flow 用户流程 (Noun)

eg: Sketch the user flow for signup.
画一下注册的用户流程。

persona 用户画像 (Noun)

eg: Our main persona is a small business owner.
我们的主要用户画像是小企业主。

wireframe 线框图 (Noun)

eg: I'll draw a quick wireframe.
我来画个简单的线框图。

mockup 设计稿 (Noun)

eg: Here's the mockup for the dashboard.
这是仪表盘的设计稿。

prototype 原型 (Noun)

eg: Let's build a quick prototype.
我们快速做个原型。

proof of concept 概念验证 (Noun)

eg: We built a proof of concept in a week.
我们用一周做了个概念验证。

PoC 概念验证 (Noun)

eg: The PoC went down well with the client.
概念验证很受客户欢迎。

MVP 最小可行产品 (Noun)

eg: Let's launch an MVP first.
我们先上线个最小可行产品。

design 设计 (Noun)

eg: I love the design of this page.
我喜欢这个页面的设计。

designer 设计师 (Noun)

eg: Check with the designer about the spacing.
去问设计师间距的事。

design system 设计系统 (Noun)

eg: Follow the design system.
遵循设计系统。

style guide 风格指南 (Noun)

eg: It's in the brand style guide.
品牌风格指南里有。

branding 品牌形象 (Noun)

eg: The branding needs to be consistent.
品牌形象需要保持一致。

brand 品牌 (Noun)

eg: Keep it on brand.
保持品牌一致。

copy 文案 (Noun)

eg: Can we tweak the copy on the button?
我们能改一下按钮上的文案吗？

content 内容 (Noun)

eg: Who's writing the content?
谁来写内容？

CMS 内容管理系统 (Noun)

eg: Editors update the pages in the CMS.
编辑在内容管理系统里更新页面。

WordPress WordPress (Noun)

eg: The blog runs on WordPress.
博客跑在WordPress上。

Shopify Shopify 电商 (Noun)

eg: The shop is built on Shopify.
这个店铺是用Shopify搭的。

SEO 搜索引擎优化 (Noun)

eg: We need to work on our SEO.
我们需要做搜索引擎优化。

traffic 流量 (Noun)

eg: Website traffic doubled after the launch.
上线后网站流量翻了一倍。

conversion 转化 (Noun)

eg: The conversion rate is really low.
转化率非常低。

bounce rate 跳出率 (Noun)

eg: The bounce rate on the homepage is high.
首页跳出率很高。

A/B test A/B测试 (Noun)

eg: We're running an A/B test on the button.
我们在对按钮做A/B测试。

analytics tag 统计代码 (Noun)

eg: Add the analytics tag to every page.
给每个页面加上统计代码。

newsletter 电子通讯 (Noun)

eg: We send a newsletter every month.
我们每个月发一期通讯。

mailing list 邮件列表 (Noun)

eg: Add her to the mailing list.
把她加到邮件列表里。

campaign 营销活动 (Noun)

eg: The campaign starts on Monday.
营销活动周一开始。

social media 社交媒体 (Noun)

eg: The social media team will post it.
社交媒体团队会发布它。

mobile app 手机应用 (Noun)

eg: The mobile app crashes on launch.
手机应用启动时崩溃。

native 原生的 (Adjective)

eg: We're building a native iOS app.
我们在做一个原生iOS应用。

cross-platform 跨平台的 (Adjective)

eg: A cross-platform app saves time.
跨平台应用能节省时间。

React Native React Native (Noun)

eg: The app is built with React Native.
这个应用是用React Native做的。

Flutter Flutter框架 (Noun)

eg: We tried Flutter for the prototype.
我们用Flutter做原型试了试。

App Store 应用商店 (Noun)

eg: The app is waiting for App Store approval.
应用在等App Store审核。

Play Store 谷歌应用商店 (Noun)

eg: It's live on the Play Store.
它已经在Play Store上线了。

push notification 推送通知 (Noun)

eg: Users get a push notification when it ships.
发货时用户会收到推送通知。

offline 离线的 (Adjective)

eg: The app needs to work offline.
应用需要能离线使用。

online 在线的 (Adjective)

eg: Are you online right now?
你现在在线吗?

progressive web app 渐进式网页应用 (Noun)

eg: We built it as a progressive web app.
我们把它做成了渐进式网页应用。

PWA 渐进式网页应用 (Noun)

eg: The PWA installs like a normal app.
这个PWA像普通应用一样安装。

embed 嵌入 (Verb)

eg: Embed the video on the page.
把视频嵌入页面。

iframe 内嵌框架 (Noun)

eg: The map is inside an iframe.
地图在一个iframe里。

widget 小部件 (Noun)

eg: Add a widget for the latest news.
加一个最新消息的小部件。

carousel 轮播 (Noun)

eg: The carousel skips slides.
轮播会跳过幻灯片。

gallery 图库 (Noun)

eg: Build a photo gallery for the case study.
为案例研究做个图库。

thumbnail 缩略图 (Noun)

eg: Generate a thumbnail for each video.
为每个视频生成缩略图。

upload 上传 (Verb)

eg: Upload the file to the portal.
把文件上传到门户。

download 下载 (Verb)

eg: Download the report as a PDF.
把报告下载成PDF。

attachment 附件 (Noun)

eg: I've added the attachment to the email.
我把附件加到邮件里了。

PDF PDF文档 (Noun)

eg: Export it as a PDF.
把它导出成PDF。

print stylesheet 打印样式表 (Noun)

eg: Add a print stylesheet for invoices.
给发票加个打印样式表。

timezone 时区 (Noun)

eg: Display the time in the user's timezone.
按用户时区显示时间。

locale 区域设置 (Noun)

eg: Set the locale to English.
把区域设置为英语。

localisation 本地化 (Noun)

eg: Localisation covers translated text too.
本地化也包括翻译后的文本。

translation 翻译 (Noun)

eg: We need a translation for the error message.
我们需要这条错误提示的翻译。

language 语言 (Noun)

eg: Add a language switcher.
加一个语言切换器。

currency 货币 (Noun)

eg: Show the currency on the invoice.
在发票上显示货币。

checkout 结账 (Noun)

eg: The checkout process is too long.
结账流程太长了。

cart 购物车 (Noun)

eg: The cart empties on refresh.
刷新后购物车被清空了。

payment 支付 (Noun)

eg: The payment failed with an error.
支付出错失败了。

payment gateway 支付网关 (Noun)

eg: We use Stripe as the payment gateway.
我们用Stripe做支付网关。

Stripe Stripe支付 (Noun)

eg: Stripe handles the card payments.
Stripe处理银行卡支付。

PayPal PayPal (Noun)

eg: Add PayPal as a payment option.
把PayPal加为支付选项。

subscription plan 订阅套餐 (Noun)

eg: Users can upgrade their subscription plan.
用户可以升级订阅套餐。

test 测试 (Noun)

eg: The test failed on the build server.
测试在构建服务器上失败了。

testing 测试工作 (Noun)

eg: Testing takes up half the sprint.
测试占了半个迭代。

tester 测试人员 (Noun)

eg: Our tester found three bugs.
我们的测试人员找到了三个bug。

QA 质量保证 (Noun)

eg: QA will sign it off tomorrow.
质量保证团队明天会签字确认。

quality assurance 质量保证 (Noun)

eg: Quality assurance is everyone's job.
质量保证是每个人的责任。

unit test 单元测试 (Noun)

eg: Write a unit test for that method.
为那个方法写个单元测试。

integration test 集成测试 (Noun)

eg: The integration tests take twenty minutes.
集成测试要跑二十分钟。

end-to-end test 端到端测试 (Noun)

eg: We have end-to-end tests for checkout.
我们对结账有端到端测试。

regression 回归问题 (Noun)

eg: That's a regression from last release.
那是上次发布引入的回归问题。

regression test 回归测试 (Noun)

eg: Run the regression tests before release.
发布前跑回归测试。

manual testing 手动测试 (Noun)

eg: Manual testing is still needed here.
这里仍然需要手动测试。

automated test 自动化测试 (Noun)

eg: Automated tests catch most issues.
自动化测试能发现大部分问题。

automation 自动化 (Noun)

eg: Automation saves us hours every week.
自动化每周为我们节省好几个小时。

test case 测试用例 (Noun)

eg: Add a test case for the empty list.
为空列表加个测试用例。

test plan 测试计划 (Noun)

eg: I'll write up the test plan.
我来写测试计划。

test suite 测试套件 (Noun)

eg: The test suite is really slow.
测试套件太慢了。

test data 测试数据 (Noun)

eg: We need realistic test data.
我们需要真实的测试数据。

test coverage 测试覆盖率 (Noun)

eg: Test coverage is at seventy percent.
测试覆盖率是百分之七十。

coverage 覆盖率 (Noun)

eg: Coverage dropped after the merge.
合并后覆盖率下降了。

test-driven 测试驱动的 (Adjective)

eg: We follow test-driven development.
我们遵循测试驱动开发。

TDD 测试驱动开发 (Noun)

eg: TDD keeps the design tidy.
测试驱动开发让设计保持整洁。

BDD 行为驱动开发 (Noun)

eg: We write BDD scenarios in Gherkin.
我们用Gherkin写行为驱动场景。

assertion 断言 (Noun)

eg: The assertion failed on line twelve.
第十二行的断言失败了。

assert 断言 (Verb)

eg: Assert that the response is not null.
断言响应不为空。

expected 预期的 (Adjective)

eg: The expected value was ten, we got nine.
预期值是十，我们得到的是九。

actual 实际的 (Adjective)

eg: The actual result was different.
实际结果不同。

pass 通过 (Verb)

eg: All the tests pass on my machine.
所有测试在我的机器上都通过了。

fail 失败 (Verb)

eg: Two tests fail on the build server.
有两个测试在构建服务器上失败。

passing 通过的 (Adjective)

eg: The build is passing.
构建通过了。

failing 失败的 (Adjective)

eg: The failing test needs a fix.
这个失败的测试需要修复。

flaky 不稳定的 (Adjective)

eg: That test is flaky.
那个测试不稳定。

green 绿色；通过的 (Adjective)

eg: The pipeline's green now.
流水线现在是绿的。

red 红色；失败的 (Adjective)

eg: The build has gone red.
构建变红了。

broken 坏了的 (Adjective)

eg: The build's broken again.
构建又坏了。

skip 跳过 (Verb)

eg: Skip that test for now.
暂时跳过那个测试。

ignore 忽略 (Verb)

eg: Ignore the warning for now.
暂时忽略这个警告。

warning 警告 (Noun)

eg: There are a few warnings in the build.
构建里有几个警告。

error 错误 (Noun)

eg: We're getting a strange error.
我们遇到了个奇怪的错误。

failure 失败 (Noun)

eg: The failure was caused by a timeout.
这次失败是由超时引起的。

crash report 崩溃报告 (Noun)

eg: Send me the crash report.
把崩溃报告发我。

severity 严重程度 (Noun)

eg: What's the severity of this bug?
这个bug的严重程度是什么？

critical 严重的 (Adjective)

eg: It's a critical bug in production.
这是生产环境里的严重bug。

major 主要的 (Adjective)

eg: That's a major issue.
那是个重大问题。

minor 轻微的 (Adjective)

eg: It's a minor cosmetic issue.
这是个轻微的外观问题。

trivial 微不足道的 (Adjective)

eg: The bug is trivial to fix.
这个bug修起来很简单。

cosmetic 外观上的 (Adjective)

eg: It's only a cosmetic problem.
这只是个外观问题。

blocker bug 阻塞性缺陷 (Noun)

eg: That's a blocker bug for the release.
那是发布的阻塞性缺陷。

show-stopper 致命问题 (Noun)

eg: We found a show-stopper this morning.
今天早上我们发现了一个致命问题。

known issue 已知问题 (Noun)

eg: That's a known issue, we're on it.
那是已知问题，我们在处理。

workaround available 有变通方案 (Phrase)

eg: There's a workaround available for now.
目前有变通方案。

intermittent 间歇性的 (Adjective)

eg: It's an intermittent issue.
这是个间歇性问题。

consistent 一致的；稳定的 (Adjective)

eg: The bug is consistent every time.
这个bug每次都稳定出现。

random failure 随机失败 (Noun)

eg: We're seeing random failures in the pipeline.
流水线里出现随机失败。

sporadic 零星的 (Adjective)

eg: The errors are sporadic.
错误是零星出现的。

unexpected 意外的 (Adjective)

eg: We got an unexpected result.
我们得到了意外的结果。

weird 奇怪的 (Adjective)

eg: That's really weird behaviour.
这行为真奇怪。

strange 奇怪的 (Adjective)

eg: It's strange, it worked yesterday.
奇怪，昨天还好好的。

odd 古怪的 (Adjective)

罪魁祸首是缺了个分号。

investigate 调查 (Verb)

eg: I'll investigate the crash.
我来调查这次崩溃。

investigation 调查 (Noun)

eg: The investigation is still ongoing.
调查仍在进行。

diagnose 诊断 (Verb)

eg: Can you help me diagnose the problem?
你能帮我诊断一下问题吗?

isolate 隔离 (Verb)

eg: Let's isolate the problem first.
我们先把问题隔离出来。

narrow down 缩小范围 (Phrase)

eg: Let's narrow down the cause.
我们来缩小原因的范围。

rule out 排除 (Phrase)

eg: We can rule out the network.
我们可以排除网络原因。

hypothesis 假设 (Noun)

eg: My hypothesis is that it's a caching issue.
我的假设是缓存问题。

theory 猜想 (Noun)

eg: What's your theory on this one?
你对这个有什么猜想?

suspect 怀疑 (Verb)

eg: I suspect it's the database.
我怀疑是数据库。

check 检查 (Verb)

eg: Can you check the logs?
你能检查一下日志吗?

verify 验证 (Verb)

eg: Verify the fix in staging.
在预发布环境验证这个修复。

double-check 再次核对 (Verb)

eg: Please double-check the numbers.
请再核对一下数字。

recheck 重新检查 (Verb)

eg: I'll recheck it after lunch.
午饭后我重新检查。

retest 重新测试 (Verb)

eg: Can you retest the login flow?
你能重新测试一下登录流程吗?

confirm fix 确认修复 (Phrase)

eg: QA needs to confirm the fix.
质量保证团队需要确认修复。

sanity check 合理性检查 (Noun)

eg: Do a quick sanity check.
做个快速的合理性检查。

spot check 抽查 (Noun)

eg: I did a spot check on the data.
我对数据做了抽查。

walkthrough 走查 (Noun)

eg: We did a walkthrough of the flow.
我们对流程做了走查。

exploratory testing 探索性测试 (Noun)

eg: Exploratory testing found the bug.
探索性测试发现了这个bug。

user acceptance 用户验收 (Noun)

eg: User acceptance is scheduled for Wednesday.
用户验收排在周三。

beta 测试版 (Noun)

eg: We released a beta to a few users.
我们向少数用户发布了测试版。

alpha 内测版 (Noun)

eg: The alpha is only for staff.
内测版只给员工用。

pilot 试点 (Noun)

eg: We're running a pilot with two schools.
我们在两所学校做试点。

trial 试用 (Noun)

eg: The trial ends in two weeks.
试用两周后结束。

early access 抢先体验 (Noun)

eg: Early access users gave great feedback.
抢先体验用户给了很好的反馈。

soft launch 软上线 (Noun)

eg: We did a soft launch last week.
我们上周做了软上线。

rollout plan 推出计划 (Noun)

eg: Share the rollout plan with support.
把推出计划分享给支持团队。

rollout schedule 推出时间表 (Noun)

eg: The rollout schedule is tight.
推出时间表很紧。

communication 沟通 (Noun)

eg: Good communication saves a lot of time.
良好的沟通能节省大量时间。

email 电子邮件 (Noun)

eg: I'll send you an email.
我给你发封邮件。

inbox 收件箱 (Noun)

eg: My inbox is a disaster.
我的收件箱一团糟。

draft 草稿 (Noun)

eg: I've written a draft of the email.
我写了封邮件草稿。

reply 回复 (Verb)

eg: I'll reply to the client today.
我今天回复客户。

respond 回应 (Verb)

eg: Please respond by Friday.
请在周五前回复。

forward 转发 (Verb)

eg: Can you forward me that email?
你能把那封邮件转发给我吗？

cc 抄送 (Verb)

eg: Cc me on the email.
把我抄送在邮件里。

bcc 密送 (Verb)

eg: Bcc the whole team.
密送给整个团队。

subject line 邮件主题 (Noun)

eg: Use a clear subject line.
用个清楚的邮件主题。

regards 此致（邮件落款） (Noun)

eg: Kind regards, Sam
此致敬礼，山姆

best wishes 祝好 (Phrase)

eg: Best wishes, Emma
祝好，艾玛

hi team 大家好 (Phrase)

eg: Hi team, quick update below.
大家好，下面是个简短更新。

hope you're well 希望你一切都好 (Phrase)

eg: Hope you're well, just checking in.
希望你一切都好，来问候一下。

just checking in 来确认一下 (Phrase)

eg: Just checking in on the ticket.
来确认一下那个工单。

just a reminder 友情提醒 (Phrase)

eg: Just a reminder, the deadline's Friday.
友情提醒，截止日期是周五。

as discussed 如我们讨论的 (Phrase)

eg: As discussed, I've updated the plan.
如我们讨论的，我更新了计划。

as per 按照 (Phrase)

eg: As per your request, I've added the report.
按你的要求，我加了报告。

please find attached 请查收附件 (Phrase)

eg: Please find attached the invoice.
请查收附件里的发票。

attached 附上的 (Adjective)

eg: Attached is the latest version.
附件是最新版本。

let me know 请告诉我 (Phrase)

eg: Let me know if you need anything.
需要什么请告诉我。

get back to you 再回复你 (Phrase)

eg: I'll get back to you tomorrow.
我明天回复你。

in the meantime 与此同时 (Phrase)

eg: In the meantime, use the workaround.
与此同时，先用变通办法。

by the way 顺便说一下 (Phrase)

eg: By the way, the meeting moved to three.
顺便说一下，会议改到三点了。

FYI 供参考 (Phrase)

eg: FYI, the server will be down at six.
供参考，服务器六点会停。

asap 尽快 (Adverb)

eg: Can you send it asap?
你能尽快发过来吗？

EOD 当天结束前 (Noun)

eg: I need it by EOD.
我需要在今天结束前拿到。

ETA 预计完成时间 (Noun)

eg: What's the ETA on the fix?
修复的预计完成时间是什么？

TBC 待确认 (Phrase)

eg: The date is TBC.
日期待确认。

TBD 待定 (Phrase)

eg: The venue is TBD.
地点待定。

WFH 居家办公 (Noun)

eg: I'm WFH tomorrow.
我明天居家办公。

OOO 外出中 (Noun)

eg: She's OOO until Monday.
她外出到周一。

BRB 马上回来 (Phrase)

eg: BRB, grabbing a coffee.
马上回来，去拿杯咖啡。

thx 谢谢 (Interjection)

eg: Report any suspicious email to IT.
发现任何可疑邮件请报告给IT。

social engineering 社会工程 (Noun)

eg: Social engineering is hard to spot.
社会工程很难识别。

DDoS 分布式拒绝服务攻击 (Noun)

eg: We got hit by a DDoS attack.
我们遭到了DDoS攻击。

brute force 暴力破解 (Noun)

eg: Brute force attacks target weak passwords.
暴力破解针对弱密码。

SQL injection SQL注入 (Noun)

eg: Use parameters to prevent SQL injection.
使用参数化查询防止SQL注入。

XSS 跨站脚本 (Noun)

eg: Escape the output to avoid XSS.
转义输出以避免跨站脚本。

CSRF 跨站请求伪造 (Noun)

eg: We added CSRF protection to the form.
我们给表单加了跨站请求伪造防护。

zero-day 零日漏洞 (Noun)

eg: A zero-day was found in the library.
这个库里发现了一个零日漏洞。

penetration test 渗透测试 (Noun)

eg: We booked a penetration test for May.
我们预约了五月的渗透测试。

pen test 渗透测试 (Noun)

eg: The pen test found two issues.
渗透测试发现了两个问题。

vulnerability scan 漏洞扫描 (Noun)

eg: Run a vulnerability scan overnight.
夜里跑一次漏洞扫描。

security audit 安全审计 (Noun)

eg: We passed the security audit.
我们通过了安全审计。

audit 审计 (Noun)

eg: The auditors arrive on Monday.
审计人员周一到。

auditor 审计员 (Noun)

eg: The auditor asked for the access logs.
审计员要了访问日志。

compliance 合规 (Noun)

eg: Compliance is a big part of the job.
合规是这份工作的重要部分。

compliant 合规的 (Adjective)

eg: Our systems are fully compliant.
我们的系统完全合规。

regulation 法规 (Noun)

eg: New regulations come in next year.
新法规明年生效。

policy 政策 (Noun)

eg: Check the company security policy.
查看公司安全政策。

procedure 流程 (Noun)

eg: Follow the incident procedure.
遵循事件处理流程。

standard 标准 (Noun)

eg: We follow the ISO standard.
我们遵循ISO标准。

ISO 27001 信息安全国际标准 (Noun)

eg: We're working towards ISO 27001.
我们在朝ISO 27001努力。

SOC 2 SOC 2审计标准 (Noun)

eg: The client asked for our SOC 2 report.
客户要了我们的SOC 2报告。

privacy 隐私 (Noun)

eg: Privacy is built into the design.
隐私已内置于设计中。

Privacy Act 隐私法 (Noun)

eg: The Privacy Act covers personal information.
隐私法涵盖个人信息。

privacy officer 隐私官 (Noun)

eg: Talk to our privacy officer about that.
这个问题去问我们的隐私官。

privacy policy 隐私政策 (Noun)

eg: Link to the privacy policy in the footer.
在页脚放隐私政策链接。

personal information 个人信息 (Noun)

eg: We store personal information securely.
我们安全地存储个人信息。

PII 个人身份信息 (Noun)

eg: Don't log any PII.
不要记录任何个人身份信息。

sensitive data 敏感数据 (Noun)

eg: Encrypt all sensitive data.
加密所有敏感数据。

confidential 保密的 (Adjective)

eg: This document is confidential.
这份文件是保密的。

NDA 保密协议 (Noun)

eg: Sign the NDA before the meeting.
会议前先签保密协议。

consent 同意 (Noun)

eg: We need the user's consent.
我们需要用户的同意。

opt in 选择加入 (Phrase)

eg: Users must opt in to marketing emails.
用户必须选择加入营销邮件。

opt out 选择退出 (Phrase)

eg: Let users opt out easily.
让用户轻松退出。

retention 保留期限 (Noun)

eg: Our data retention period is seven years.
我们的数据保留期是七年。

anonymise 匿名化 (Verb)

eg: Anonymise the data before sharing it.
共享前先匿名化数据。

mask 遮蔽 (Verb)

eg: Mask the card numbers in the logs.
在日志里遮蔽银行卡号。

redact 涂黑 (Verb)

eg: Redact the names in the report.
把报告里的姓名涂黑。

GDPR 通用数据保护条例 (Noun)

eg: We're GDPR compliant for overseas clients.
我们对海外客户符合GDPR。

NCSC 国家网络安全中心 (Noun)

eg: The NCSC posted a new advisory.
国家网络安全中心发布了新通告。

advisory 通告 (Noun)

eg: A security advisory came out today.
今天发布了一份安全通告。

encryption 加密 (Noun)

eg: Encryption is turned on by default.
加密默认开启。

encrypt 加密 (Verb)

eg: We encrypt data at rest.
我们对静态数据加密。

decrypt 解密 (Verb)

eg: Only the service can decrypt it.
只有该服务能解密它。

hash 哈希 (Verb)

eg: Hash the passwords before saving.
保存前先对密码做哈希。

salt 盐值 (Noun)

eg: Add a salt to each hash.
给每个哈希加盐。

key 密钥 (Noun)

eg: Store the key in a secure vault.
把密钥存在安全保险库里。

secret 机密信息 (Noun)

eg: Don't commit secrets to the repo.
别把机密信息提交到仓库。

vault 保险库 (Noun)

eg: Secrets are kept in the vault.
机密信息存放在保险库里。

Key Vault 密钥保险库 (Noun)

eg: Fetch it from Azure Key Vault.
从Azure密钥保险库获取。

rotate 轮换 (Verb)

eg: Rotate the keys every ninety days.
每九十天轮换一次密钥。

expire 过期 (Verb)

eg: The password expires in a week.
密码一周后过期。

expired 已过期的 (Adjective)

eg: Your certificate has expired.
你的证书已过期。

renew 续期 (Verb)

eg: Renew the certificate today.
今天续一下证书。

strong password 强密码 (Noun)

eg: Use a strong password.
使用强密码。

weak password 弱密码 (Noun)

eg: Weak passwords are a big risk.
弱密码是个大风险。

two-factor 双因素的 (Adjective)

eg: Turn on two-factor authentication.
开启双因素认证。

2FA 双因素认证 (Noun)

eg: Do you have 2FA set up?
你设置了双因素认证吗？

authenticator 验证器 (Noun)

eg: Approve it in the authenticator app.
在验证器应用里批准。

one-time code 一次性验证码 (Noun)

eg: Enter the one-time code.
输入一次性验证码。

biometric 生物识别的 (Adjective)

eg: Laptops use biometric login.
笔记本用生物识别登录。

fingerprint 指纹 (Noun)

eg: Log in with your fingerprint.
用指纹登录。

badge 门禁卡 (Noun)

eg: Tap your badge to get in.
刷门禁卡进去。

swipe card 刷卡 (Noun)

eg: Use your swipe card for the door.
用刷卡进门。

tailgating 尾随进入 (Noun)

eg: Tailgating is a security risk.
尾随进入是个安全风险。

clean desk 桌面清理 (Noun)

eg: We have a clean desk policy.
我们有桌面清理政策。

lock your screen 锁屏 (Phrase)

eg: Always lock your screen when you leave.
离开时一定要锁屏。

least privilege 最小权限 (Noun)

eg: We follow the least privilege principle.
我们遵循最小权限原则。

segregation 隔离 (Noun)

eg: Segregation of duties reduces fraud.
职责分离能减少欺诈。

whitelist 白名单 (Noun)

eg: Add the IP to the whitelist.
把这个IP加进白名单。

allowlist 允许列表 (Noun)

eg: Add the domain to the allowlist.
把域名加进允许列表。

blocklist 封锁列表 (Noun)

eg: The address is on the blocklist.
这个地址在封锁列表里。

blacklist 黑名单 (Noun)

eg: The spam filter uses a blacklist.
垃圾邮件过滤器用黑名单。

block 阻止 (Verb)

eg: Block that IP address.
封掉那个IP地址。

quarantine 隔离 (Verb)

eg: Quarantine the infected laptop.
隔离被感染的笔记本。

contain 遏制 (Verb)

eg: We need to contain the breach.
我们需要遏制这次泄露。

remediate 修复补救 (Verb)

eg: We remediated all high-risk issues.
我们补救了所有高风险问题。

remediation 补救措施 (Noun)

eg: The remediation plan is due Friday.
补救计划周五到期。

forensics 取证 (Noun)

eg: Forensics will review the laptop.
取证团队会审查这台笔记本。

incident response 事件响应 (Noun)

eg: Incident response kicked in quickly.
事件响应很快启动了。

log review 日志审查 (Noun)

eg: We do a weekly log review.
我们每周做一次日志审查。

SIEM 安全信息事件管理 (Noun)

eg: Alerts flow into our SIEM.
告警流入我们的SIEM。

endpoint protection 终端防护 (Noun)

eg: Endpoint protection is installed on all laptops.
所有笔记本都装了终端防护。

antivirus 杀毒软件 (Noun)

eg: The antivirus flagged the file.
杀毒软件标记了这个文件。

patch management 补丁管理 (Noun)

eg: Patch management is often overlooked.
补丁管理常被忽视。

BYOD 自带设备办公 (Noun)

eg: We allow BYOD with a policy.
我们在政策下允许自带设备办公。

MDM 移动设备管理 (Noun)

eg: MDM lets us wipe lost phones.
移动设备管理让我们能清除丢失的手机。

remote wipe 远程清除 (Noun)

eg: We did a remote wipe on the stolen phone.
我们对被偷的手机做了远程清除。

Shadow IT 影子IT (Noun)

eg: Shadow IT is a compliance headache.
影子IT是合规上的头疼事。

third party 第三方 (Noun)

eg: Review the third party's security.
评审一下第三方的安全性。

eg: Supply chain attacks are on the rise.
供应链攻击在增加。

due diligence 尽职调查 (Noun)

eg: We did our due diligence on the vendor.
我们对这个供应商做了尽职调查。

data sovereignty 数据主权 (Noun)

eg: Data sovereignty matters to some of our clients.
数据主权对我们的一些客户很重要。

data residency 数据驻留 (Noun)

eg: Keep the data residency onshore.
把数据驻留在本地。

governance 治理 (Noun)

eg: Data governance needs a clear owner.
数据治理需要明确的负责人。

accountable 负有责任的 (Adjective)

eg: Who's accountable for this system?
这个系统由谁负责？

responsible 负责的 (Adjective)

eg: I'm responsible for the release.
我负责这次发布。

liability 责任 (Noun)

eg: Liability sits with the vendor.
责任在供应商。

insurance 保险 (Noun)

eg: Cyber insurance covers ransomware.
网络保险涵盖勒索软件。

contract 合同 (Noun)

eg: Please review the contract.
请审阅这份合同。

terms and conditions 条款和条件 (Noun)

eg: Read the terms and conditions carefully.
请仔细阅读条款和条件。

agreement 协议 (Noun)

eg: We signed an agreement last week.
我们上周签了协议。

clause 条款 (Noun)

eg: There's a clause about data protection.
有一条关于数据保护的条款。

intellectual property 知识产权 (Noun)

eg: The code is our intellectual property.
代码是我们的知识产权。

IP 知识产权 (Noun)

eg: Who owns the IP for this work?
这项工作的知识产权归谁?

copyright 版权 (Noun)

eg: Check the copyright on the images.
检查一下图片的版权。

open source 开源 (Noun)

eg: We use a lot of open source libraries.
我们用了许多开源库。

opensource licence 开源许可证 (Noun)

eg: Check the opensource licence first.
先检查开源许可证。

proprietary 专有的 (Adjective)

eg: It's proprietary software.
这是专有软件。

trademark 商标 (Noun)

eg: The name is a registered trademark.
这个名字是注册商标。

patent 专利 (Noun)

eg: We filed a patent for the algorithm.
我们为这个算法申请了专利。

legal 法律的 (Adjective)

eg: Ask legal to check the wording.
让法务检查措辞。

lawyer 律师 (Noun)

eg: We'll get our lawyer to look at it.
我们让律师看一下。

legal team 法务团队 (Noun)

eg: The legal team is reviewing the contract.
法务团队正在审阅合同。

liable 有责任的 (Adjective)

eg: We're not liable for third-party outages.
我们对第三方故障不承担责任。

health and safety 健康与安全 (Noun)

eg: Health and safety training is compulsory.
健康与安全培训是必修的。

hazard 隐患 (Noun)

eg: Report any hazard in the office.
办公室里发现任何隐患请报告。

ergonomic 符合人体工学的 (Adjective)

eg: We got ergonomic chairs for everyone.
我们给每个人配了人体工学椅。

fire drill 消防演习 (Noun)

eg: The fire drill's at eleven.
消防演习在十一点。

evacuation 疏散 (Noun)

eg: Follow the evacuation plan.
按疏散方案行动。

earthquake 地震 (Noun)

eg: We had an earthquake drill this morning.
我们今天早上做了地震演习。

drop cover hold 趴下掩护抓牢 (Phrase)

eg: Drop, cover and hold when the ground shakes.
地震时趴下、掩护、抓牢。

emergency 紧急情况 (Noun)

inclusion 包容 (Noun)

eg: Inclusion is part of our values.
包容是我们价值观的一部分。

inclusive 包容的 (Adjective)

eg: We aim for an inclusive workplace.
我们致力于包容的职场。

equal opportunity 平等机会 (Noun)

eg: We're an equal opportunity employer.
我们是平等机会雇主。

gender pay gap 性别薪酬差距 (Noun)

eg: We publish our gender pay gap.
我们公布性别薪酬差距。

union 工会 (Noun)

eg: Some staff are union members.
部分员工是工会成员。

employee 员工 (Noun)

eg: Every employee gets a laptop.
每位员工都有一台笔记本。

staff 员工 (Noun)

eg: Staff are welcome at the barbecue.
员工都欢迎来烧烤。

employer 雇主 (Noun)

eg: My employer offers a flexible schedule.
我的雇主提供灵活的时间安排。

workplace 职场 (Noun)

eg: The workplace is really friendly.
职场氛围非常友好。

culture 文化 (Noun)

eg: The company culture is relaxed.
公司文化很轻松。

values 价值观 (Noun)

eg: Our values guide our decisions.
我们的价值观指导我们的决定。

mission 使命 (Noun)

eg: Our mission is to help small business.
我们的使命是帮助小企业。

vision 愿景 (Noun)

eg: The CEO shared the company vision.
首席执行官分享了公司愿景。

team spirit 团队精神 (Noun)

eg: We have a great team spirit.
我们有很棒的团队精神。

morale 士气 (Noun)

eg: Morale is high after the launch.
上线后士气很高。

motivation 动力 (Noun)

eg: Motivation dips on rainy Mondays.
下雨的周一动力会下降。

motivated 积极的 (Adjective)

eg: She's really motivated to learn.
她学习的积极性很高。

enthusiastic 热情的 (Adjective)

eg: He's enthusiastic about the new tools.
他对新工具很热情。

passionate 充满热情的 (Adjective)

eg: I'm passionate about clean code.
我对整洁代码充满热情。

proactive 积极主动的 (Adjective)

eg: Be proactive and raise it early.
要积极主动，早点提出来。

reliable 可靠的 (Adjective)

eg: She's a reliable team member.
她是位可靠的团队成员。

trustworthy 值得信赖的 (Adjective)

eg: He's trustworthy and honest.
他值得信赖，也很诚实。

collaborative 协作的 (Adjective)

eg: We have a collaborative culture.
我们有协作的文化。

supportive 支持的 (Adjective)

eg: My manager is very supportive.
我的经理非常支持我。

approachable 平易近人的 (Adjective)

eg: The CEO is approachable.
首席执行官平易近人。

friendly 友好的 (Adjective)

eg: Everyone here is friendly.
这里的每个人都很友好。

welcoming 热情好客的 (Adjective)

eg: The team was very welcoming.
团队非常热情友好。

laid-back 随和的 (Adjective)

eg: The office vibe is pretty laid-back.
办公室氛围很随和。

relaxed 轻松的 (Adjective)

eg: It's a relaxed workplace.
这是个轻松的职场。

casual dress 休闲着装 (Noun)

eg: We have casual dress on Fridays.
我们周五可以穿休闲装。

dress code 着装要求 (Noun)

eg: There's no formal dress code.
没有正式的着装要求。

office 办公室 (Noun)

eg: I'm in the office on Tuesdays.
我周二在办公室。

head office 总部 (Noun)

eg: Head office signs off the budget.
总部批准预算。

open plan 开放式的 (Adjective)

eg: It's an open plan office.
这是个开放式办公室。

desk 办公桌 (Noun)

eg: My desk's next to the window.
我的桌子靠窗。

hot desk 共享办公位 (Noun)

eg: We hot desk on Fridays.
我们周五共享办公位。

hot-desking 轮用办公位 (Noun)

eg: Hot-desking saves office space.
轮用办公位节省办公空间。

standing desk 升降桌 (Noun)

eg: I use a standing desk.
我用升降桌。

chair 椅子 (Noun)

eg: This chair is really comfy.
这把椅子很舒服。

cubicle 隔间 (Noun)

eg: Cubicles are rare in modern offices.
现代办公室里很少有隔间。

meeting pod 会议舱 (Noun)

eg: Book the meeting pod for the call.
订会议舱开电话会议。

phone booth 电话亭 (Noun)

eg: I'll take the call in the phone booth.
我去电话亭里接这个电话。

kitchen 厨房 (Noun)

eg: Let's chat in the kitchen.
我们去厨房聊。

kitchenette 小厨房 (Noun)

eg: The kitchenette has a coffee machine.
小厨房里有台咖啡机。

coffee machine 咖啡机 (Noun)

eg: The coffee machine's broken again.
咖啡机又坏了。

lunch break 午休 (Noun)

eg: I take my lunch break at twelve.
我十二点午休。

lunchtime 午饭时间 (Noun)

eg: The walk at lunchtime helps.
午饭时间散步有帮助。

tea room 茶水间 (Noun)

eg: Cake's in the tea room.
蛋糕在茶水间。

breakout space 休息讨论区 (Noun)

eg: We had a chat in the breakout space.
我们在休息讨论区聊了聊。

reception 前台 (Noun)

eg: Leave the parcel at reception.
把包裹放在前台。

receptionist 前台接待 (Noun)

eg: The receptionist signed you in.
前台接待帮你登记了。

visitor 访客 (Noun)

eg: Visitors sign in at the front desk.
访客在前台登记。

sign in book 登记簿 (Noun)

eg: Put your name in the sign in book.
在登记簿上写下名字。

car park 停车场 (Noun)

eg: The car park is full by nine.
停车场九点就满了。

parking 停车 (Noun)

eg: Parking is free after five.
五点后停车免费。

commute 通勤 (Noun)

eg: My commute takes forty minutes.
我通勤要四十分钟。

bus 公交车 (Noun)

eg: I catch the bus to work.
我坐公交上班。

train 火车 (Noun)

eg: The train's delayed again.
火车又晚点了。

bike 自行车 (Noun)

eg: I bike to work most days.
我大多数日子骑车上班。

carpool 拼车 (Verb)

eg: We carpool to save on parking.
我们拼车省停车费。

traffic jam 堵车 (Noun)

eg: A traffic jam made me late.
堵车让我迟到了。

rush hour 高峰期 (Noun)

eg: Avoid rush hour if you can.
尽量避开高峰期。

AI 人工智能 (Noun)

eg: AI is changing how we write code.
人工智能正在改变我们写代码的方式。

artificial intelligence 人工智能 (Noun)

eg: We're exploring artificial intelligence for support.
我们在探索用人工智能做支持。

machine learning 机器学习 (Noun)

eg: The team is learning machine learning.
团队在学习机器学习。

deep learning 深度学习 (Noun)

eg: Deep learning needs a lot of data.
深度学习需要大量数据。

neural network 神经网络 (Noun)

eg: The neural network needs more training.
神经网络还需要更多训练。

algorithm 算法 (Noun)

eg: The algorithm is too slow for big data.
这个算法处理大数据太慢了。

training data 训练数据 (Noun)

eg: We need cleaner training data.
我们需要更干净的训练数据。

predict 预测 (Verb)

eg: The model predicts customer churn.
这个模型预测客户流失。

prediction 预测结果 (Noun)

eg: The prediction was off by ten percent.
预测结果偏差了百分之十。

inference 推理 (Noun)

eg: Inference costs add up quickly.
推理成本很快就累积起来。

deploy model 部署模型 (Phrase)

eg: We deploy the model as an API.
我们把模型部署成接口。

LLM 大语言模型 (Noun)

eg: We built a chatbot with an LLM.
我们用大语言模型做了个聊天机器人。

chatbot 聊天机器人 (Noun)

eg: The chatbot answers common questions.
聊天机器人回答常见问题。

prompt 提示词 (Noun)

eg: Tweak the prompt to get a better answer.
调整提示词以得到更好的回答。

prompt engineering 提示词工程 (Noun)

eg: Prompt engineering is a useful skill.
提示词工程是项有用的技能。

agentic 智能体式的 (Adjective)

eg: We're building an agentic workflow.
我们在做一个智能体式的工作流。

AI agent 人工智能体 (Noun)

eg: The AI agent handles support tickets.
人工智能体处理支持工单。

Copilot 编程助手 (Noun)

eg: Copilot suggests code as I type.
我打字时编程助手会给出代码建议。

assistant 助手 (Noun)

eg: Ask the AI assistant to summarise it.
让AI助手总结一下。

Generative AI 生成式人工智能 (Noun)

eg: Generative AI is everywhere now.
生成式人工智能现在无处不在。

hallucination 幻觉 (错误输出) (Noun)

eg: The model gave us a hallucination.
模型给出了一个幻觉输出。

hallucinate 产生幻觉 (Verb)

eg: LLMs can hallucinate facts.
大语言模型可能会编造事实。

token limit 词元上限 (Noun)

eg: We hit the token limit.
我们触到了词元上限。

context window 上下文窗口 (Noun)

eg: A bigger context window helps.
更大的上下文窗口有帮助。

embedding 向量嵌入 (Noun)

eg: We store embeddings in a vector database.
我们把向量嵌入存在向量数据库里。

vector database 向量数据库 (Noun)

eg: A vector database powers our search.
向量数据库驱动我们的搜索。

RAG 检索增强生成 (Noun)

eg: We use RAG to answer from our docs.
我们用检索增强生成来根据文档回答。

fine-tune 微调 (Verb)

eg: We fine-tuned the model on our data.
我们用自己的数据微调了模型。

open-source model 开源模型 (Noun)

eg: We're trying an open-source model.
我们在试用开源模型。

dataset split 数据集划分 (Noun)

eg: Check the dataset split.
检查一下数据集划分。

overfitting 过拟合 (Noun)

eg: Overfitting is hurting our results.
过拟合正在损害我们的结果。

bias 偏见 (Noun)

eg: We check the model for bias.
我们检查模型是否有偏见。

fairness 公平性 (Noun)

eg: Fairness matters in automated decisions.
自动决策中公平性很重要。

ethics 伦理 (Noun)

eg: AI ethics is part of our policy.
人工智能伦理是我们政策的一部分。

responsible AI 负责任的人工智能 (Noun)

eg: We follow responsible AI guidelines.
我们遵循负责任的人工智能准则。

computer vision 计算机视觉 (Noun)

eg: Computer vision spots defects on the line.
计算机视觉能发现产线上的缺陷。

NLP 自然语言处理 (Noun)

eg: NLP sorts the incoming emails.
自然语言处理给收到的邮件分类。

speech recognition 语音识别 (Noun)

eg: Speech recognition struggles with accents.
语音识别对口音处理不好。

transcription 转录 (Noun)

eg: Use AI for meeting transcription.
用AI做会议转录。

summarise 总结 (Verb)

eg: Summarise the meeting in three lines.
用三行总结一下会议。

translate 翻译 (Verb)

eg: Translate it into French.
把它翻译成法语。

classify 分类 (Verb)

eg: Classify the tickets by topic.
按主题给工单分类。

recommendation 推荐 (Noun)

eg: The recommendation engine works well.
推荐引擎效果很好。

automation script 自动化脚本 (Noun)

eg: The automation script saves us hours.
自动化脚本为我们节省好几个小时。

workflow 工作流 (Noun)

eg: Let's automate that workflow.
我们把那个工作流自动化吧。

bot 机器人 (Noun)

eg: A bot posts the build status.
一个机器人会发布构建状态。

RPA 机器人流程自动化 (Noun)

eg: RPA handles the repetitive data entry.
机器人流程自动化处理重复的数据录入。

no-code 无代码的 (Adjective)

eg: We built the form with a no-code tool.
我们用无代码工具做了这个表单。

low-code 低代码的 (Adjective)

eg: Low-code platforms speed up prototypes.
低代码平台加快原型开发。

IoT 物联网 (Noun)

eg: We built an IoT dashboard for a council.
我们为一个市政府做了个物联网仪表盘。

sensor 传感器 (Noun)

eg: The sensor stopped sending data.
传感器停止发送数据了。

gateway device 网关设备 (Noun)

eg: The gateway device collects readings.
网关设备收集读数。

telemetry data 遥测数据 (Noun)

eg: Telemetry data flows into the cloud.
遥测数据流入云端。

smart city 智慧城市 (Noun)

eg: We worked on a smart city project.
我们做过一个智慧城市项目。

digital twin 数字孪生 (Noun)

eg: A digital twin models the water network.
数字孪生为供水网络建模。

GIS 地理信息系统 (Noun)

eg: The council uses GIS for planning.
市政府用地理信息系统做规划。

geospatial 地理空间的 (Adjective)

eg: We store geospatial data in Postgres.
我们把地理空间数据存在Postgres里。

blockchain 区块链 (Noun)

eg: Blockchain isn't needed for this.
这个场景不需要区块链。

crypto 加密货币 (Noun)

eg: The client doesn't accept crypto.
客户不接受加密货币。

AR 增强现实 (Noun)

eg: We're prototyping an AR app.
我们在做增强现实应用原型。

VR 虚拟现实 (Noun)

eg: The VR demo was impressive.
虚拟现实演示让人印象深刻。

quantum 量子的 (Adjective)

eg: Quantum computing is still early days.
量子计算还处于早期。

5G 第五代移动网络 (Noun)

eg: 5G coverage is patchy in rural areas.
农村地区的5G覆盖不太均匀。

edge computing 边缘计算 (Noun)

eg: Edge computing reduces latency.
边缘计算降低延迟。

drone 无人机 (Noun)

eg: A drone inspects the farm.
一架无人机检查农场。

robot 机器人 (Noun)

eg: A robot picks the orders.
一个机器人拣选订单。

smart 智能的 (Adjective)

eg: We installed smart meters.
我们安装了智能电表。

digital 数字的 (Adjective)

eg: We're going through a digital transformation.
我们在进行数字化转型。

digital transformation 数字化转型 (Noun)

eg: Digital transformation is a long journey.
数字化转型是一段很长的旅程。

modernise 现代化 (Verb)

eg: We're modernising the legacy system.
我们在把遗留系统现代化。

modernisation 现代化 (Noun)

eg: The modernisation project starts next month.
现代化项目下个月启动。

replace 替换 (Verb)

eg: We plan to replace the old server.
我们打算替换旧服务器。

retire 退役 (Verb)

eg: We're retiring the old system in June.
我们六月会让旧系统退役。

decommission 停用 (Verb)

eg: Decommission the old servers.
停用旧服务器。

sunset 逐步淘汰 (Verb)

eg: We'll sunset the old API next year.
我们明年会逐步淘汰旧接口。

proof 证明 (Noun)

eg: We need proof that it works.
我们需要证明它有效。

evidence 证据 (Noun)

eg: The logs are our evidence.
日志是我们的证据。

research 调研 (Noun)

eg: We did some research on vendors.
我们对供应商做了些调研。

evaluate 评估 (Verb)

eg: We're evaluating three tools.
我们在评估三个工具。

evaluation 评估 (Noun)

eg: The evaluation takes two weeks.
评估要花两周。

compare 比较 (Verb)

eg: Let's compare the options side by side.
我们把选项并排比较一下。

comparison 对比 (Noun)

eg: Here's a comparison of the tools.
这是这些工具的对比。

alternative 替代方案 (Noun)

eg: Is there a cheaper alternative?
有更便宜的替代方案吗？

solution 解决方案 (Noun)

eg: We need a long-term solution.
我们需要长期解决方案。

approach 方法 (Noun)

eg: What approach should we take?
我们应该采取什么方法？

technique 技巧 (Noun)

eg: Here's a useful debugging technique.
这是个有用的调试技巧。

concept 概念 (Noun)

eg: Explain the concept in simple terms.
用简单的话解释这个概念。

principle 原则 (Noun)

eg: Keep to the same principle.
遵循同一个原则。

guideline 指南 (Noun)

eg: Follow the API guidelines.
遵循接口指南。

framework model 框架模型 (Noun)

eg: We use a simple framework model.
我们用一个简单的框架模型。

methodology 方法论 (Noun)

eg: Which methodology do you follow?
你们遵循哪种方法论?

agile 敏捷的 (Adjective)

eg: We're an agile team.
我们是个敏捷团队。

waterfall 瀑布模式 (Noun)

eg: The client prefers waterfall.
客户偏好瀑布模式。

lean 精益的 (Adjective)

eg: We run a lean process.
我们采用精益流程。

Scrum 敏捷Scrum (Noun)

eg: We run Scrum with two-week sprints.
我们用两周迭代来运行Scrum。

ITIL IT服务管理框架 (Noun)

eg: Our processes follow ITIL.
我们的流程遵循ITIL。

PRINCE2 PRINCE2项目管理 (Noun)

eg: Government projects often use PRINCE2.
政府项目常用PRINCE2。

PMP 项目管理专业认证 (Noun)

eg: She's PMP certified.
她有项目管理专业认证。

solutions architect 解决方案架构师 (Noun)

eg: The solutions architect designed the system.
解决方案架构师设计了这个系统。

architect 架构师 (Noun)

eg: Ask the architect about this pattern.
去问架构师这个模式的事。

business analyst 业务分析师 (Noun)

eg: The business analyst wrote the requirements.
业务分析师写了需求。

BA 业务分析师 (Noun)

eg: Our BA is running the workshop.
我们的业务分析师在主持工作坊。

data engineer 数据工程师 (Noun)

eg: The data engineer built the pipeline.
数据工程师搭建了这个管道。

data scientist 数据科学家 (Noun)

eg: Our data scientist trained the model.
我们的数据科学家训练了这个模型。

ML engineer 机器学习工程师 (Noun)

eg: The ML engineer deployed the model.
机器学习工程师部署了模型。

DevOps engineer 开发运维工程师 (Noun)

eg: Ask the DevOps engineer to check.
让开发运维工程师检查一下。

cloud engineer 云工程师 (Noun)

eg: We're hiring a cloud engineer.
我们在招云工程师。

security engineer 安全工程师 (Noun)

eg: The security engineer reviewed the code.
安全工程师评审了代码。

QA engineer 质量保证工程师 (Noun)

eg: The QA engineer wrote the test plan.
质量保证工程师写了测试计划。

test engineer 测试工程师 (Noun)

eg: Our test engineer automates the checks.
我们的测试工程师把检查自动化。

support engineer 支持工程师 (Noun)

eg: A support engineer will call you.
支持工程师会给你打电话。

sales engineer 售前工程师 (Noun)

eg: The sales engineer ran the demo.
售前工程师做了演示。

network engineer 网络工程师 (Noun)

eg: The network engineer fixed the switch.
网络工程师修好了交换机。

systems analyst 系统分析师 (Noun)

eg: The systems analyst mapped the process.
系统分析师梳理了流程。

product manager 产品经理 (Noun)

eg: The product manager owns the roadmap.
产品经理负责路线图。

delivery manager 交付经理 (Noun)

eg: The delivery manager tracks the timeline.
交付经理跟踪时间线。

engineering manager 工程经理 (Noun)

eg: The engineering manager leads two teams.
工程经理带两个团队。

UX designer 用户体验设计师 (Noun)

eg: The UX designer ran the user tests.
用户体验设计师做了用户测试。

developer advocate 开发者布道师 (Noun)

eg: Our developer advocate speaks at meetups.
我们的开发者布道师在技术聚会上演讲。

technical writer 技术文档工程师 (Noun)

eg: The technical writer updated the docs.
技术文档工程师更新了文档。

ask 问；请求 (Verb)

eg: Can I ask you something about the API?
我能问你一个关于接口的问题吗？

tell 告诉 (Verb)

eg: Tell the client we'll be late.
告诉客户我们会晚点。

say 说 (Verb)

eg: What did the client say?
客户说了什么？

explain 解释 (Verb)

eg: Can you explain how it works?
你能解释一下它是怎么运作的吗？

discuss 讨论 (Verb)

eg: Let's discuss it at standup.
我们在站会上讨论一下。

talk 谈话 (Verb)

eg: Can we talk about the schedule?
我们能聊聊排期吗？

speak 说话 (Verb)

eg: Can I speak to the manager?
我能和经理谈谈吗？

call 打电话 (Verb)

eg: I'll call the client now.
我现在给客户打电话。

send 发送 (Verb)

eg: Send me the link, please.
请把链接发给我。

share 分享 (Verb)

eg: Can you share the document with me?
你能把文档分享给我吗？

show 展示 (Verb)

eg: Let me show you the dashboard.
让我给你看看仪表盘。

demonstrate 演示 (Verb)

eg: I'll demonstrate the new feature.
我来演示新功能。

present 汇报 (Verb)

eg: I'll present the results on Friday.
我周五汇报结果。

announce 宣布 (Verb)

eg: We'll announce it at the all-hands.
我们会在全员会上宣布。

inform 通知 (Verb)

eg: Please inform the team of the change.
请把变更通知团队。

notify 通知 (Verb)

eg: Notify the users before the outage.
故障前通知用户。

remind 提醒 (Verb)

eg: Remind me to send the invoice.
提醒我发发票。

answer 回答 (Verb)

eg: Can you answer a quick question?
你能回答个简单问题吗？

listen 倾听 (Verb)

eg: Listen to what the client actually needs.
听听客户真正需要什么。

hear 听到 (Verb)

eg: I hear you, but the deadline is fixed.
我明白你的意思，但截止日期是固定的。

understand 理解 (Verb)

eg: I understand the problem now.
我现在明白问题了。

know 知道 (Verb)

eg: Do you know who owns this service?
你知道谁负责这个服务吗？

think 认为 (Verb)

eg: I think it's a caching issue.
我认为是缓存问题。

believe 相信 (Verb)

eg: I believe we can do it.
我相信我们能做到。

guess 猜 (Verb)

eg: I guess we'll find out tomorrow.
我猜我们明天就知道了。

wonder 想知道 (Verb)

eg: I wonder if it's the network.
我在想是不是网络的问题。

remember 记得 (Verb)

eg: Remember to back up first.
记得先备份。

forget 忘记 (Verb)

eg: Don't forget to commit your changes.
别忘了提交你的改动。

realise 意识到 (Verb)

eg: I just realised the flag was off.
我刚意识到开关是关的。

notice 注意到 (Verb)

eg: Did you notice the error in the log?
你注意到日志里的错误了吗？

find 找到 (Verb)

eg: I found the bug.
我找到bug了。

look 看 (Verb)

eg: Look at line forty.
看第四十行。

see 看到 (Verb)

eg: Can you see my screen?
你能看到我的屏幕吗？

watch 观看 (Verb)

eg: Watch the logs while I deploy.
我部署时你盯着日志。

read 阅读 (Verb)

eg: Read the error message carefully.
仔细读错误信息。

write 写 (Verb)

eg: Write a short description.
写个简短的描述。

paste 粘贴 (Verb)

eg: Paste the error into the ticket.
把错误粘贴到工单里。

save 保存 (Verb)

eg: Save your work before the update.
更新前先保存你的工作。

open 打开 (Verb)

eg: Open the file in your editor.
在编辑器里打开这个文件。

close 关闭 (Verb)

eg: Close the ticket once it's fixed.
修好后关闭工单。

create 创建 (Verb)

eg: Create a new branch.
创建一个新分支。

make 做；制作 (Verb)

eg: Can you make a small change?
你能做个小改动吗？

draw 画 (Verb)

eg: Draw the flow on the whiteboard.
把流程画在白板上。

sketch 草绘 (Verb)

eg: Sketch the idea before coding.
编码前先草绘想法。

add 添加 (Verb)

eg: Add a comment to explain it.
加条注释解释一下。

remove 移除 (Verb)

eg: Remove the unused code.
移除没用的代码。

change 修改 (Verb)

eg: Change the timeout to thirty seconds.
把超时改成三十秒。

edit 编辑 (Verb)

eg: Edit the config file.
编辑配置文件。

modify 修改 (Verb)

eg: Don't modify the shared file.
别修改那个共享文件。

adjust 调整 (Verb)

eg: Adjust the layout for mobile.
为手机调整布局。

tweak 微调 (Verb)

eg: I'll tweak the styling.
我来微调一下样式。

improve 改进 (Verb)

eg: We should improve the error messages.
我们应该改进错误提示。

enhance 增强 (Verb)

eg: Enhance the search with filters.
用筛选器增强搜索。

extend 扩展 (Verb)

eg: Extend the class to support tags.
扩展这个类以支持标签。

expand 扩大 (Verb)

eg: We plan to expand the team next year.
我们计划明年扩大团队。

reduce 减少 (Verb)

eg: Reduce the load time.
减少加载时间。

increase 增加 (Verb)

eg: Increase the memory limit.
增加内存上限。

decrease 减少 (Verb)

eg: Response times decreased after the fix.
修复后响应时间下降了。

limit 限制 (Verb)

eg: Limit access to admins.
把访问限制给管理员。

restrict 限制 (Verb)

eg: Restrict the upload size.
限制上传大小。

allow 允许 (Verb)

eg: Allow guests to view the page.
允许访客查看页面。

enable 启用 (Verb)

eg: Enable logging in production.
在生产环境启用日志。

disable 禁用 (Verb)

eg: Disable the old feature.
禁用旧功能。

activate 激活 (Verb)

eg: Activate your account by email.
通过邮件激活账号。

turn on 打开 (Phrase)

eg: Turn on debug mode.
打开调试模式。

turn off 关闭 (Phrase)

eg: Turn off notifications.
关闭通知。

switch on 打开 (Phrase)

eg: Switch on the projector.
打开投影仪。

switch off 关闭 (Phrase)

eg: Switch off the monitor.
关闭显示器。

plug in 插上 (Phrase)

eg: Plug in the charger.
插上充电器。

unplug 拔掉 (Verb)

eg: Unplug the cable and try again.
拔掉线再试一次。

connect 连接 (Verb)

eg: Connect to the office wifi.
连接办公室无线网。

disconnect 断开 (Verb)

eg: The client disconnected suddenly.
客户端突然断开了。

leave 离开 (Verb)

eg: Leave the call when you're done.
完成后离开通话。

attend 参加 (Verb)

eg: Will you attend the workshop?
你会参加工作坊吗？

manage 管理 (Verb)

eg: He manages a team of six.
他管理一个六人团队。

help 帮助 (Verb)

eg: Can you help me debug this?
你能帮我调试这个吗？

assist 协助 (Verb)

eg: I'll assist with the deployment.
我来协助部署。

coach 辅导 (Verb)

eg: I coach the juniors on Fridays.
我周五辅导初级员工。

train up 培训 (Phrase)

eg: We'll train up the new starters.
我们会培训新员工。

teach 教 (Verb)

eg: Can you teach me how to use Docker?
你能教我 Docker 吗？

practise 练习 (Verb)

eg: I practise coding every evening.
我每天晚上练习编程。

study 学习 (Verb)

eg: I'm studying for my cloud exam.
我在为云考试备考。

prepare 准备 (Verb)

eg: Prepare the slides for tomorrow.
准备好明天的幻灯片。

organise 组织 (Verb)

eg: Can you organise the team lunch?
你能安排团队午餐吗?

arrange 安排 (Verb)

eg: I'll arrange a meeting with the client.
我来安排和客户的会议。

coordinate 协调 (Verb)

eg: Coordinate with the design team.
和设计团队协调。

plan out 规划 (Phrase)

eg: Let's plan out the next sprint.
我们来规划下个迭代。

start 开始 (Verb)

eg: Let's start with the login page.
我们从登录页面开始。

begin 开始 (Verb)

eg: We begin testing on Monday.
我们周一开始测试。

finish 完成 (Verb)

eg: I'll finish it by lunchtime.
午饭前我会完成。

wrap up 收尾 (Phrase)

eg: Let's wrap up the meeting.
我们把会议收个尾吧。

continue 继续 (Verb)

eg: Continue working on the ticket.
继续做这个工单。

pause 暂停 (Verb)

eg: Pause the pipeline for now.
先暂停流水线。

stop 停止 (Verb)

eg: Stop the service before the update.
更新前先停止服务。

cancel 取消 (Verb)

eg: Cancel the meeting, please.
请取消这个会议。

abort 中止 (Verb)

eg: Abort the migration.
中止迁移。

hold 搁置 (Verb)

eg: Put the release on hold.
把发布搁置。

wait 等待 (Verb)

eg: Wait for the build to finish.
等构建完成。

speed up 加速 (Phrase)

eg: We need to speed up the queries.
我们需要加快查询。

slow down 减速 (Phrase)

eg: Slow down, I can't follow.
慢一点，我跟不上。

keep 保持 (Verb)

eg: Keep the old version for now.
暂时保留旧版本。

maintain 维护 (Verb)

eg: Who maintains this library?
谁维护这个库?

operate 运营 (Verb)

eg: We operate the platform 24/7.
我们全天候运营这个平台。

handle 处理 (Verb)

eg: Who's handling the release?
谁负责处理发布?

process 处理 (Verb)

eg: Process the payments in batches.
分批处理支付。

solve 解决 (Verb)

eg: We solved it with a small change.
我们用个小改动解决了它。

tackle 应对 (Verb)

eg: Let's tackle the biggest bug first.
我们先应对最大的bug。

address 处理; 解决 (Verb)

eg: We'll address the feedback next sprint.
我们会在下个迭代处理这些反馈。

deal with 处理 (Phrase)

eg: I'll deal with the client call.
客户的电话我来处理。

cope 应付 (Verb)

eg: We can't cope with this many tickets.
我们应付不了这么多工单。

try 尝试 (Verb)

eg: Try restarting the service.
试试重启服务。

attempt 尝试 (Verb)

eg: I'll attempt a quick fix.
我来尝试快速修复。

experiment 实验 (Verb)

eg: Let's experiment with a new approach.
我们用新方法试验一下。

explore 探索 (Verb)

eg: We're exploring a few options.
我们在探索几个选项。

discover 发现 (Verb)

eg: We discovered a security hole.
我们发现了一个安全漏洞。

identify 识别 (Verb)

eg: Identify the slowest queries.
找出最慢的查询。

detect 检测 (Verb)

eg: The tool detects unusual traffic.
这个工具检测异常流量。

spot 发现 (Verb)

eg: Good catch, I hadn't spotted that.
抓得好，我之前没发现。

measure 衡量 (Verb)

eg: We measure success by uptime.
我们用正常运行时间衡量成功。

track 跟踪 (Verb)

eg: Track the changes in Jira.
在Jira里跟踪变更。

document 记录文档 (Verb)

eg: Document the steps you took.
记录你做的步骤。

note 记下 (Verb)

eg: Note the decision in the ticket.
把决定记在工单里。

summarize 总结 (Verb)

eg: Summarize the key points.
总结要点。

outline 概述 (Verb)

eg: Outline the plan before we start.
开始前先概述一下计划。

describe 描述 (Verb)

eg: Describe the problem in detail.
详细描述这个问题。

report back 反馈 (Phrase)

eg: Report back after the meeting.
会后反馈一下。

point out 指出 (Phrase)

eg: Thanks for pointing that out.
谢谢你指出来。

emphasise 强调 (Verb)

eg: Emphasise the security benefits.
强调安全方面的好处。

insist 坚持 (Verb)

eg: The client insists on Friday.
客户坚持要周五。

require 需要 (Verb)

eg: The task requires admin access.
这个任务需要管理员权限。

need 需要 (Verb)

eg: We need more time.
我们需要更多时间。

want 想要 (Verb)

eg: What do you want to do first?
你想先做什么？

prefer 更喜欢 (Verb)

eg: I prefer working in the morning.
我更喜欢上午工作。

like 喜欢 (Verb)

eg: I like the new design.
我喜欢新设计。

love 热爱 (Verb)

eg: I love working with this team.
我很喜欢和这个团队共事。

enjoy 享受 (Verb)

eg: I enjoy solving tricky problems.
我喜欢解决棘手问题。

hate 讨厌 (Verb)

eg: I hate flaky tests.
我讨厌不稳定的测试。

worry 担心 (Verb)

eg: Don't worry, we'll fix it.
别担心，我们会修好的。

hope 希望 (Verb)

eg: I hope the deploy goes well.
我希望部署顺利。

expect 预计 (Verb)

eg: We expect a busy week.
我们预计这周会很忙。

wish 希望 (Verb)

eg: I wish we had more time.
我希望我们有更多时间。

decide 决定 (Verb)

eg: We decided to postpone it.
我们决定推迟。

choose 选择 (Verb)

eg: Choose the option that suits you.
选择适合你的方案。

pick 挑选 (Verb)

eg: Pick a ticket from the backlog.
从待办里挑一个工单。

vote 投票 (Verb)

eg: Let's vote on the tool.
我们对这个工具投个票。

reject 拒绝 (Verb)

eg: The PR was rejected.
这个PR被拒绝了。

refuse 拒绝 (Verb)

eg: They refused to sign off.
他们拒绝签字确认。

avoid 避免 (Verb)

eg: Avoid touching prod on Fridays.
避免周五动生产环境。

prevent 防止 (Verb)

eg: This check prevents bad data.
这个检查防止脏数据。

protect 保护 (Verb)

eg: Protect the customer data.
保护客户数据。

waste 浪费 (Verb)

eg: Don't waste time on this.
别在这上面浪费时间。

spend 花费 (Verb)

eg: We spent two days on this bug.
我们在这个bug上花了两天的时间。

pay 支付 (Verb)

eg: We pay for the licence yearly.
我们每年支付许可证费用。

buy 购买 (Verb)

eg: Can we buy another licence?
我们能再买一个许可证吗？

sell 销售 (Verb)

eg: We sell to schools.
我们向学校销售。

order 订购 (Verb)

eg: I'll order new laptops.
我来订新笔记本。

receive 收到 (Verb)

eg: We received the invoice today.
我们今天收到了发票。

collect 收集 (Verb)

eg: Collect the requirements from users.
从用户那收集需求。

gather 收集 (Verb)

eg: Gather the feedback by Friday.
周五前收集好反馈。

submit 提交 (Verb)

eg: Submit your timesheet by Friday.
周五前提交你的工时表。

sign 签字 (Verb)

eg: Sign the form and send it back.
签好表格再发回来。

file 归档；提交 (Verb)

eg: File the expense claim today.
今天提交报销。

book off 请假 (Phrase)

eg: I've booked off Friday.
我请了周五的假。

take off 休假；请假 (Phrase)

eg: I'm taking off next week.
我下周休假。

work from home 居家办公 (Phrase)

eg: I work from home on Wednesdays.
我周三居家办公。

come in 来办公室 (Phrase)

eg: I'll come in early tomorrow.
我明天早点来。

head out 出发离开 (Phrase)

eg: I'm heading out for lunch.
我出去吃午饭了。

head home 回家 (Phrase)

eg: I'm heading home now.
我现在回家了。

get back 回来 (Phrase)

eg: I'll get back after lunch.
午饭后我回来。

drop in 顺便过来 (Phrase)

eg: Drop in if you're passing by.
路过的话顺便来坐坐。

pop in 顺道来一下 (Phrase)

eg: Pop in and say hi.
顺道来打个招呼。

swing by 顺路拜访 (Phrase)

eg: I'll swing by your desk.
我去你桌那儿一下。

sit down 坐下 (Phrase)

eg: Let's sit down and go through it.
我们坐下来过一遍。

stand up 站起来 (Phrase)

eg: Everybody stand up for the demo.
大家站起来准备演示。

move 移动 (Verb)

eg: Move the meeting to Thursday.
把会议挪到周四。

shift 转移 (Verb)

eg: Shift the focus to security.
把重点转向安全。

swap 交换 (Verb)

eg: Can we swap shifts?
我们能换班吗?

replace with 替换为 (Phrase)

eg: Replace it with the new library.
用新库替换它。

match 匹配 (Verb)

eg: Make sure the totals match.
确保总数一致。

fit 适合 (Verb)

eg: That tool fits our needs.
那个工具适合我们的需求。

suit 适合 (Verb)

eg: Does Tuesday suit you?
周二你方便吗?

work 奏效; 工作 (Verb)

eg: Does it work on mobile?
它在手机上能用吗?

happen 发生 (Verb)

eg: What happened to the build?
构建怎么了?

occur 发生 (Verb)

eg: The error occurs every night.
这个错误每晚都会出现。

appear 出现 (Verb)

eg: The message appears after login.
这条消息在登录后出现。

disappear 消失 (Verb)

eg: The button disappeared.
按钮不见了。

turn out 结果是 (Phrase)

eg: It turned out to be a typo.
结果是个拼写错误。

end up 最终 (Phrase)

eg: We ended up rewriting it.
我们最后把它重写了。

come up 出现; 被提出 (Phrase)

eg: A few issues came up during testing.
测试期间出现了几个问题。

come up with 想出 (Phrase)

eg: Can you come up with a better name?
你能想个更好的名字吗?

figure out 弄明白 (Phrase)

eg: I'll figure out what's wrong.
我来弄明白哪里出了问题。

work out 弄清楚 (Phrase)

eg: Let's work out the details.
我们来把细节弄清楚。

sort it out 把它搞定 (Phrase)

eg: I'll sort it out tonight.
我今晚把它搞定。

set up 设置 (Phrase)

eg: I'll set up the environment.
我来设置环境。

carry out 执行 (Phrase)

eg: We carried out the migration on Sunday.
我们周日执行了迁移。

follow through 落实 (Phrase)

eg: We need to follow through on the plan.
我们需要落实这个计划。

roll out 推出 (Phrase)

eg: We'll roll out the update gradually.
我们会逐步推出更新。

good 好的 (Adjective)

eg: That's a good idea.
这是个好主意。

great 很棒的 (Adjective)

eg: Great work on the release.
发布做得很棒。

excellent 优秀的 (Adjective)

eg: The demo was excellent.
演示非常出色。

fantastic 极好的 (Adjective)

eg: That's fantastic news.
这是个极好的消息。

brilliant 出色的 (Adjective)

eg: Brilliant, that fixes it.
太棒了，这下修好了。

amazing 了不起的 (Adjective)

eg: The new dashboard is amazing.
新仪表盘太棒了。

impressive 令人印象深刻的 (Adjective)

eg: That's really impressive.
那真的很令人印象深刻。

solid 扎实的 (Adjective)

eg: Solid work on the tests.
测试做得很扎实。

decent 不错的 (Adjective)

eg: That's a decent starting point.
这是个不错的起点。

fine 还行的 (Adjective)

eg: The build looks fine to me.
我觉得构建没问题。

okay 还可以的 (Adjective)

eg: Is it okay if I push now?
我现在推送可以吗？

alright 还行的 (Adjective)

eg: Are you alright with the plan?
你对这个计划没意见吧？

perfect 完美的 (Adjective)

eg: Perfect, that's what we needed.
完美，这正是我们需要的。

ideal 理想的 (Adjective)

eg: That's the ideal solution.
这是理想的方案。

best 最好的 (Adjective)

eg: That's the best option.
那是最好的选择。

better 更好的 (Adjective)

eg: This layout is better.
这个布局更好。

worse 更糟的 (Adjective)

eg: Performance got worse after the update.
更新后性能变差了。

worst 最糟的 (Adjective)

eg: That's the worst bug we've had.
那是我们遇到过的最糟的bug。

bad 坏的 (Adjective)

eg: That's a bad idea.
那是个坏主意。

poor 差的 (Adjective)

eg: The quality of the data is poor.
数据质量很差。

terrible 糟糕的 (Adjective)

eg: The wifi's terrible today.
今天的无线网糟透了。

awful 糟透的 (Adjective)

eg: The traffic was awful this morning.
今天早上交通糟透了。

horrible 可怕的 (Adjective)

eg: That code is horrible to read.
那段代码读起来太糟了。

disappointing 令人失望的 (Adjective)

eg: The results were disappointing.
结果令人失望。

frustrating 令人沮丧的 (Adjective)

eg: Flaky tests are so frustrating.
不稳定的测试太让人沮丧了。

annoying 烦人的 (Adjective)

eg: It's annoying that the build is so slow.
构建这么慢真烦人。

tricky 棘手的 (Adjective)

eg: That's a tricky bug.
那是个棘手的bug。

tough 艰难的 (Adjective)

eg: It's been a tough week.
这周很艰难。

hard 困难的 (Adjective)

eg: The problem is really hard to reproduce.
这个问题很难复现。

difficult 困难的 (Adjective)

eg: It's difficult to estimate.
这很难估算。

easy 容易的 (Adjective)

eg: It's an easy fix.
这是个容易的修复。

simple 简单的 (Adjective)

eg: Keep the design simple.
保持设计简单。

straightforward 简单直接的 (Adjective)

eg: The migration was straightforward.
迁移很简单直接。

complex 复杂的 (Adjective)

eg: The logic is quite complex.
逻辑相当复杂。

complicated 复杂的 (Adjective)

eg: It's more complicated than it looks.
这比看起来复杂。

confusing 令人困惑的 (Adjective)

eg: The docs are confusing.
文档让人困惑。

clear 清晰的 (Adjective)

eg: The instructions are clear.
说明很清楚。

unclear 不清楚的 (Adjective)

eg: The requirement is unclear.
需求不清楚。

obvious 明显的 (Adjective)

eg: The cause is obvious now.
原因现在很明显了。

vague 模糊的 (Adjective)

eg: The ticket is too vague.
这个工单太模糊了。

specific 具体的 (Adjective)

eg: Can you be more specific?
你能说得更具体些吗?

detailed 详细的 (Adjective)

eg: Write a detailed description.
写一份详细的描述。

brief 简短的 (Adjective)

eg: Keep the update brief.
更新要简短。

short 短的 (Adjective)

eg: It's a short meeting.
这是个简短的会议。

long 长的 (Adjective)

eg: It's a long list of tasks.
这是个很长的任务清单。

quick 快的 (Adjective)

eg: Let's have a quick chat.
我们快速聊聊。

fast 快速的 (Adjective)

eg: The new server is really fast.
新服务器非常快。

rapid 迅速的 (Adjective)

eg: We've seen rapid growth.
我们看到了快速增长。

speedy 迅速的 (Adjective)

eg: Thanks for the speedy reply.
谢谢你迅速回复。

immediate 立即的 (Adjective)

eg: It needs immediate attention.
这需要立即关注。

urgent 紧急的 (Adjective)

eg: It's urgent, please look now.
很紧急，请现在看。

important 重要的 (Adjective)

eg: It's important to test first.
先测试很重要。

essential 必不可少的 (Adjective)

eg: Backups are essential.
备份必不可少。

crucial 关键的 (Adjective)

eg: That step is crucial.
那一步至关重要。

primary 首要的 (Adjective)

eg: The primary goal is stability.
首要目标是稳定。

secondary 次要的 (Adjective)

eg: That's a secondary concern.
那是次要的顾虑。

extra 额外的 (Adjective)

eg: We need extra time.
我们需要额外的时间。

additional 附加的 (Adjective)

eg: Additional storage costs more.
额外存储费用更高。

spare 备用的 (Adjective)

eg: Do you have a spare cable?
你有备用线吗?

new 新的 (Adjective)

eg: We have a new starter today.
今天我们有位新同事。

old 旧的 (Adjective)

eg: The old system is still in use.
旧系统仍在使用的。

latest 最新的 (Adjective)

eg: Update to the latest version.
更新到最新版本。

recent 最近的 (Adjective)

eg: The recent changes broke the build.
最近的改动搞坏了构建。

current 当前的 (Adjective)

eg: What's the current status?
当前状态是什么?

previous 之前的 (Adjective)

eg: Roll back to the previous version.
回滚到上一个版本。

next 下一个的 (Adjective)

eg: The next sprint starts Monday.
下个迭代周一开始。

last 最后的; 上一个的 (Adjective)

eg: The last release went well.
上次发布很顺利。

final 最终的 (Adjective)

eg: Here's the final version.
这是最终版本。

first 第一的 (Adjective)

eg: That's the first time I've seen it.
这是我第一次看到。

early 早的 (Adjective)

eg: An early start helps.
早点开始有帮助。

late 晚的 (Adjective)

eg: It's a late finish tonight.
今晚要收工很晚。

daily 每日的 (Adjective)

eg: Send a daily update.
发送每日更新。

weekly 每周的 (Adjective)

eg: We have a weekly check-in.
我们有每周例行沟通。

monthly 每月的 (Adjective)

eg: The monthly report is due Friday.
月报周五截止。

quarterly 每季度的 (Adjective)

eg: We plan quarterly.
我们每季度做规划。

annual 每年的 (Adjective)

eg: The annual review is in December.
年度评审在十二月。

regular 常规的 (Adjective)

eg: Regular updates keep everyone informed.
定期更新让大家了解情况。

frequent 频繁的 (Adjective)

eg: Frequent releases are less risky.
频繁发布风险更小。

occasional 偶尔的 (Adjective)

eg: Occasional bugs are normal.
偶尔出现bug是正常的。

rare 罕见的 (Adjective)

eg: It's a rare edge case.
这是个罕见的边界情况。

common 常见的 (Adjective)

eg: That's a common mistake.
那是个常见的错误。

typical 典型的 (Adjective)

eg: It's a typical Monday.
这是个典型的周一。

usual 通常的 (Adjective)

eg: The usual process applies.
适用通常的流程。

normal 正常的 (Adjective)

eg: Is that normal behaviour?
那是正常行为吗？

basic 基础的 (Adjective)

eg: It's a basic feature.
这是个基础功能。

advanced 高级的 (Adjective)

eg: That's an advanced setting.
那是个高级设置。

proper 恰当的 (Adjective)

eg: We need a proper solution.
我们需要一个恰当的方案。

correct 正确的 (Adjective)

eg: Is this the correct URL?
这是正确的网址吗？

right 对的 (Adjective)

eg: You're right, that's the issue.
你说得对，就是这个问题。

wrong 错的 (Adjective)

eg: Something's wrong with the login.
登录出了点问题。

true 真的 (Adjective)

eg: Is it true that we're moving offices?
我们要搬办公室是真的吗？

false 假的 (Adjective)

eg: That was a false alarm.
那是虚惊一场。

real 真实的 (Adjective)

eg: Is this the real data?
这是真实数据吗？

fake 假的 (Adjective)

eg: We use fake data for testing.
我们用假数据做测试。

accurate 准确的 (Adjective)

eg: Are the figures accurate?
数字准确吗？

exact 精确的 (Adjective)

eg: What's the exact error message?
确切的错误信息是什么？

approximate 大约的 (Adjective)

eg: That's an approximate estimate.
这是个大概的估算。

rough 粗略的 (Adjective)

eg: Give me a rough idea.
给我个大概的概念。

ready 准备好的 (Adjective)

eg: Is the build ready?
构建准备好了吗？

done 完成的 (Adjective)

eg: The ticket's done.
工单完成了。

finished 完成的 (Adjective)

eg: I'm finished with the review.
我评审完了。

incomplete 未完成的 (Adjective)

eg: The form is incomplete.
表单不完整。

pending 待处理的 (Adjective)

eg: Two approvals are pending.
有两个批准待处理。

active 活跃的 (Adjective)

eg: Only active users can log in.
只有活跃用户能登录。

inactive 不活跃的 (Adjective)

eg: Remove inactive accounts.
移除不活跃的账号。

closed 已关闭的 (Adjective)

eg: The ticket's closed.
工单已关闭。

enabled 已启用的 (Adjective)

eg: Is logging enabled?
日志启用了吗？

disabled 已禁用的 (Adjective)

eg: The button is disabled.
按钮被禁用了。

public 公开的 (Adjective)

eg: The repo is public.
仓库是公开的。

private 私有的 (Adjective)

eg: Keep the repo private.
保持仓库私有。

shared 共享的 (Adjective)

eg: Use the shared calendar.
用共享日历。

internal 内部的 (Adjective)

eg: It's an internal tool.
这是个内部工具。

external 外部的 (Adjective)

eg: We call an external API.
我们调用外部接口。

global 全局的 (Adjective)

eg: It's a global setting.
这是个全局设置。

central 中央的 (Adjective)

eg: Keep the logs in a central place.
把日志放在集中的地方。

individual 个人的 (Adjective)

eg: Each individual task is small.
每个单独的任务都很小。

automatic 自动的 (Adjective)

eg: The update is automatic.
更新是自动的。

custom 定制的 (Adjective)

eg: We built a custom report.
我们做了个定制报告。

temporary 临时的 (Adjective)

eg: It's a temporary fix.
这是个临时修复。

permanent fix 永久修复 (Phrase)

eg: We need a permanent fix.
我们需要永久修复。

long-term 长期的 (Adjective)

eg: We need a long-term plan.
我们需要长期计划。

short-term 短期的 (Adjective)

eg: This is a short-term workaround.
这是个短期变通方案。

ongoing 持续的 (Adjective)

eg: The work is ongoing.
工作在持续进行。

upcoming 即将到来的 (Adjective)

eg: We have an upcoming release.
我们有个即将到来的发布。

scheduled 已排期的 (Adjective)

eg: It's a scheduled outage.
这是个计划内的中断。

planned 计划中的 (Adjective)

eg: It's planned maintenance.
这是计划内的维护。

unplanned 计划外的 (Adjective)

eg: We had unplanned downtime.
我们有计划外的停机。

possible 可能的 (Adjective)

eg: Is it possible to finish today?
今天能完成吗？

impossible 不可能的 (Adjective)

eg: That deadline is impossible.
那个截止日期不可能达到。

likely 很可能的 (Adjective)

eg: It's likely a caching issue.
很可能是缓存问题。

unlikely 不太可能的 (Adjective)

eg: That's unlikely to happen.
那不太可能发生。

probable 可能的 (Adjective)

eg: It's probable that we'll be late.
我们很可能会晚。

certain 确定的 (Adjective)

eg: I'm certain it worked yesterday.
我确定昨天还是好的。

sure 确信的 (Adjective)

eg: Are you sure it's fixed?
你确定修好了吗？

unsure 不确定的 (Adjective)

eg: I'm unsure about the timeline.
我对时间线不太确定。

confident 有信心的 (Adjective)

eg: I'm confident we'll hit the date.
我有信心我们能赶上日期。

nervous 紧张的 (Adjective)

eg: I'm nervous about the demo.
我对演示有点紧张。

anxious 焦虑的 (Adjective)

eg: He's anxious about the deadline.
他为截止日期焦虑。

worried 担心的 (Adjective)

eg: I'm worried about the budget.
我担心预算。

concerned 担忧的 (Adjective)

eg: We're concerned about security.
我们担忧安全问题。

relieved 松了口气的 (Adjective)

eg: I'm relieved it's finally done.
终于完成了，我松了口气。

happy 开心的 (Adjective)

eg: I'm happy with the result.
我对结果很满意。

glad 高兴的 (Adjective)

eg: I'm glad we caught it early.
我很高兴我们及早发现了。

pleased 满意的 (Adjective)

eg: We're pleased with the feedback.
我们对反馈很满意。

proud 自豪的 (Adjective)

eg: I'm proud of the team.
我为团队感到自豪。

excited 兴奋的 (Adjective)

eg: I'm excited about the new project.
我对新项目很兴奋。

thrilled 激动的 (Adjective)

eg: We're thrilled to win the contract.
我们赢得合同太激动了。

grateful 感激的 (Adjective)

eg: I'm grateful for your help.
我很感激你的帮助。

sad 难过的 (Adjective)

eg: It's sad to see Tom leave.
看到汤姆离开很难过。

upset 沮丧的 (Adjective)

eg: The client was upset about the delay.
客户对延期很不高兴。

angry 生气的 (Adjective)

eg: He was angry about the outage.
他对故障很生气。

tired 累的 (Adjective)

eg: I'm tired after the release.
发布后我累了。

exhausted 精疲力竭的 (Adjective)

eg: The team's exhausted.
团队精疲力竭了。

bored 无聊的 (Adjective)

eg: I'm bored of repetitive tasks.
我对重复性任务感到厌倦。

curious 好奇的 (Adjective)

eg: I'm curious how it works.
我很好奇它怎么运作。

interested 感兴趣的 (Adjective)

eg: I'm interested in the AI role.
我对人工智能岗位感兴趣。

interesting 有趣的 (Adjective)

eg: That's an interesting approach.
这是个有趣的方法。

boring 无聊的 (Adjective)

eg: Data entry is boring.
数据录入很无聊。

funny 好笑的 (Adjective)

eg: That meme was funny.
那个梗图很好笑。

lucky 幸运的 (Adjective)

eg: We were lucky to catch it.
我们很幸运及时发现了它。

unlucky 不走运的 (Adjective)

eg: Unlucky, the server crashed.
真倒霉，服务器崩了。

comfortable 舒服的 (Adjective)

eg: Are you comfortable with the plan?
你对这个计划放心吗？

uncomfortable 不舒服的 (Adjective)

eg: I'm uncomfortable with that change.
我对那个改动不放心。

safe 安全的 (Adjective)

eg: Is it safe to deploy now?
现在部署安全吗？

risky 有风险的 (Adjective)

eg: That's a risky change.
那是个有风险的改动。

dangerous 危险的 (Adjective)

eg: It's dangerous to edit live data.
直接改线上数据很危险。

careful 小心的 (Adjective)

eg: Be careful with production.
操作生产环境要小心。

cautious 谨慎的 (Adjective)

eg: We're being cautious with this release.
我们对这次发布很谨慎。

patient 有耐心的 (Adjective)

eg: Please be patient with the new starters.
请对新员工有耐心。

polite 礼貌的 (Adjective)

eg: Keep your feedback polite.
保持反馈礼貌。

professional 专业的 (Adjective)

eg: The team was very professional.
团队非常专业。

honest 诚实的 (Adjective)

eg: Let's be honest about the risks.
我们对风险要坦诚。

direct 直接的 (Adjective)

eg: I'll be direct, it's not working.
我直说吧，这行不通。

blunt 直率的 (Adjective)

eg: Sorry if I sound blunt.
如果我听起来太直，抱歉。

diplomatic 有外交手腕的 (Adjective)

eg: Be diplomatic in your feedback.
反馈时要有策略。

formal 正式的 (Adjective)

eg: It's a formal process.
这是个正式流程。

informal 非正式的 (Adjective)

eg: Let's have an informal chat.
我们非正式地聊聊。

positive 积极的 (Adjective)

eg: The feedback was positive.
反馈是积极的。

negative 消极的 (Adjective)

eg: Let's avoid negative language.
我们避免消极的措辞。

neutral 中立的 (Adjective)

eg: Stay neutral in the discussion.
讨论中保持中立。

optimistic 乐观的 (Adjective)

eg: I'm optimistic about the launch.
我对上线很乐观。

pessimistic 悲观的 (Adjective)

eg: Don't be so pessimistic.
别那么悲观。

efficient 高效的 (Adjective)

eg: It's an efficient process.
这是个高效的流程。

inefficient 低效的 (Adjective)

eg: The old process is inefficient.
旧流程效率低。

effective 有效的 (Adjective)

eg: That's an effective fix.
那是个有效的修复。

useful 有用的 (Adjective)

eg: The tool is really useful.
这个工具真的很有用。

helpful 有帮助的 (Adjective)

eg: That was really helpful, thanks.
那真的很有帮助，谢谢。

useless 没用的 (Adjective)

eg: The error message is useless.
这个错误提示没用。

valuable 有价值的 (Adjective)

eg: Her feedback was valuable.
她的反馈很有价值。

worth 值得的 (Adjective)

eg: Is it worth the effort?
值得花这个力气吗？

expensive 昂贵的 (Adjective)

eg: The licence is expensive.
许可证很贵。

cheap 便宜的 (Adjective)

eg: It's a cheap option.
这是个便宜的选择。

affordable 负担得起的 (Adjective)

eg: It's an affordable plan.
这是个负担得起的套餐。

free 免费的 (Adjective)

eg: The tool is free to use.
这个工具免费使用。

big 大的 (Adjective)

eg: It's a big change.
这是个大改动。

small 小的 (Adjective)

eg: It's a small tweak.
这是个小调整。

huge 巨大的 (Adjective)

eg: It's a huge improvement.
这是巨大的进步。

tiny 极小的 (Adjective)

eg: It's a tiny bug.
这是个极小的bug。

large 大的 (Adjective)

eg: The file is too large.
文件太大了。

heavy 重的 (Adjective)

eg: The page is too heavy.
页面太重了。

light 轻的 (Adjective)

eg: Use a light version for mobile.
手机用轻量版。

lightweight 轻量的 (Adjective)

eg: We chose a lightweight framework.
我们选了轻量框架。

full 满的 (Adjective)

eg: The disk is full.
磁盘满了。

empty 空的 (Adjective)

eg: The list is empty.
列表是空的。

blank 空白的 (Adjective)

eg: The page is blank.
页面是空白的。

high 高的 (Adjective)

eg: CPU usage is high.
CPU使用率很高。

low 低的 (Adjective)

eg: Battery is low.
电量低了。

strong 强的 (Adjective)

eg: We have strong test coverage.
我们有很强的测试覆盖率。

weak 弱的 (Adjective)

eg: The wifi signal is weak.
无线信号很弱。

stable 稳定的 (Adjective)

eg: The build is stable now.
构建现在稳定了。

unstable 不稳定的 (Adjective)

eg: The connection is unstable.
连接不稳定。

smooth 顺畅的 (Adjective)

eg: The deployment was smooth.
部署很顺畅。

seamless 无缝的 (Adjective)

eg: We want a seamless experience.
我们想要无缝的体验。

tight 紧的 (Adjective)

eg: The schedule is tight.
时间安排很紧。

loose 松散的 (Adjective)

eg: The requirements are quite loose.
需求相当宽松。

rigid 僵化的 (Adjective)

eg: The process is too rigid.
流程太僵化了。

strict 严格的 (Adjective)

eg: The rules are strict.
规则很严格。

quiet 安静的 (Adjective)

eg: It's quiet in the office today.
今天办公室很安静。

cold 冷的 (Adjective)

eg: The server room is cold.
机房很冷。

hot 热的 (Adjective)

eg: It's hot in here.
这里很热。

sunny 晴朗的 (Adjective)

eg: It's a sunny day, let's eat outside.
今天是晴天，我们去外面吃吧。

windy 有风的 (Adjective)

eg: It's really windy today.
今天风很大。

actually 实际上 (Adverb)

eg: Actually, I think it's a DNS issue.
实际上，我觉得是DNS问题。

basically 基本上 (Adverb)

eg: It's basically a config problem.
基本上是配置问题。

currently 目前 (Adverb)

eg: We're currently on version four.
我们目前在用第四版。

eventually 最终 (Adverb)

eg: We'll eventually move to the cloud.
我们最终会迁到云上。

hopefully 希望如此 (Adverb)

eg: Hopefully the fix works this time.
希望这次修复有效。

apparently 据说 (Adverb)

eg: Apparently the server was rebooted overnight.
据说服务器夜里重启了。

obviously 显然 (Adverb)

eg: Obviously, we need to test it first.
显然我们得先测试。

definitely 肯定 (Adverb)

eg: We definitely need more time.
我们肯定需要更多时间。

probably 很可能 (Adverb)

eg: It's probably a caching thing.
很可能是缓存的问题。

maybe 也许 (Adverb)

eg: Maybe we should wait until Monday.
也许我们该等到周一。

perhaps 或许 (Adverb)

eg: Perhaps we could split the task.
或许我们可以拆分任务。

usually 通常 (Adverb)

eg: We usually deploy on Thursdays.
我们通常周四部署。

always 总是 (Adverb)

eg: Always back up before upgrading.
升级前一定要备份。

never 从不 (Adverb)

eg: Never deploy on a Friday arvo.
永远别在周五下午部署。

sometimes 有时 (Adverb)

eg: Sometimes the build just fails.
有时构建就是会失败。

often 经常 (Adverb)

eg: This happens quite often.
这种情况经常发生。

already 已经 (Adverb)

eg: I've already sent the email.
我已经发了邮件。

still 仍然 (Adverb)

eg: The bug is still there.
这个bug还在。

yet 还 (没) (Adverb)

eg: The ticket isn't closed yet.
工单还没关闭。

just 刚刚；只是 (Adverb)

eg: I just pushed the fix.
我刚推了修复。

only 仅仅 (Adverb)

eg: It only happens on Fridays.
只在周五发生。

even 甚至 (Adverb)

eg: Even the tests are failing.
连测试都失败了。

quite 相当 (Adverb)

eg: It's quite a big change.
这是个相当大的改动。

pretty 挺 (Adverb)

eg: It's pretty straightforward.
挺简单的。

really 真的 (Adverb)

eg: It's really slow today.
今天真的很慢。

very 非常 (Adverb)

eg: That's very helpful.
那非常有帮助。

super 超级 (Adverb)

eg: It's super easy to set up.
设置起来超级简单。

totally 完全 (Adverb)

eg: I totally agree with you.
我完全同意你。

absolutely 绝对 (Adverb)

eg: Absolutely, let's do it.
当然，我们就这么办。

exactly 正是 (Adverb)

eg: Exactly, that's the issue.
没错，问题就在这。

roughly 大致 (Adverb)

eg: It'll take roughly two days.
大约需要两天。

approximately 大约 (Adverb)

eg: Approximately ten users are affected.
大约十位用户受影响。

immediately 立即 (Adverb)

eg: Stop it immediately.
立即停止它。

finally 终于 (Adverb)

eg: We finally fixed it.
我们终于修好了。

recently 最近 (Adverb)

eg: We recently upgraded the servers.
我们最近升级了服务器。

lately 近来 (Adverb)

eg: I've been busy lately.
我最近一直很忙。

soon 很快 (Adverb)

eg: We'll ship it soon.
我们很快会发布。

later 稍后 (Adverb)

eg: Let's talk about it later.
我们稍后再聊。

earlier 早些时候 (Adverb)

eg: I mentioned it earlier.
我早些时候提过。

meanwhile 同时 (Adverb)

eg: Meanwhile, I'll check the logs.
同时我去查日志。

however 然而 (Adverb)

eg: However, the deadline hasn't changed.
然而，截止日期没变。

therefore 因此 (Adverb)

eg: Therefore, we should escalate it.
因此我们应该升级上报。

otherwise 否则 (Adverb)

eg: Fix it, otherwise the build fails.
修好它，否则构建会失败。

instead 反而 (Adverb)

eg: Let's use Postgres instead.
我们改用Postgres吧。

anyway 无论如何 (Adverb)

eg: Anyway, let's get back to the task.
无论如何，我们回到任务上吧。

unfortunately 不幸地 (Adverb)

eg: Unfortunately, the fix didn't work.
不幸的是，修复没有奏效。

fortunately 幸运地 (Adverb)

eg: Fortunately, we had a backup.
幸运的是我们有备份。

luckily 幸运地 (Adverb)

eg: Luckily, no data was lost.
幸运的是没有数据丢失。

thankfully 谢天谢地 (Adverb)

eg: Thankfully, it was a small bug.
谢天谢地只是个小bug。

seriously 认真地 (Adverb)

eg: Seriously, we need a fix today.
说真的，我们今天必须修好。

literally 简直 (Adverb)

eg: It's literally taking hours.
这简直花了好几个小时。

generally 一般来说 (Adverb)

eg: Generally, it takes a day.
一般来说要一天。

typically 通常 (Adverb)

eg: It typically takes ten minutes.
通常需要十分钟。

mostly 大多 (Adverb)

eg: It's mostly working now.
现在大部分能用了。

mainly 主要地 (Adverb)

eg: The delay is mainly due to testing.
延迟主要是因为测试。

especially 尤其 (Adverb)

eg: Be careful, especially with prod.
要小心，尤其是生产环境。

particularly 特别 (Adverb)

eg: I'm particularly worried about security.
我特别担心安全。

specifically 具体来说 (Adverb)

eg: Specifically, the login page is broken.
具体来说，登录页面坏了。

quickly 快速地 (Adverb)

eg: We fixed it quickly.
我们很快修好了。

slowly 缓慢地 (Adverb)

eg: The page loads slowly.
页面加载得很慢。

carefully 仔细地 (Adverb)

eg: Read it carefully.
仔细阅读。

properly 正确地 (Adverb)

eg: It's not working properly.
它没有正常工作。

correctly 正确地 (Adverb)

eg: Configure it correctly.
把它正确配置好。

clearly 清楚地 (Adverb)

eg: Explain it clearly.
清楚地解释一下。

easily 轻松地 (Adverb)

eg: You can easily change it.
你可以轻松修改它。

simply 简单地 (Adverb)

eg: Simply restart the service.
只需重启服务。

automatically 自动地 (Adverb)

eg: It updates automatically.
它会自动更新。

manually 手动地 (Adverb)

eg: I'll do it manually.
我手动来做。

regularly 定期地 (Adverb)

eg: Back up regularly.
定期备份。

constantly 不断地 (Adverb)

eg: The requirements are constantly changing.
需求在不断变化。

gradually 逐渐地 (Adverb)

eg: We'll roll it out gradually.
我们会逐步推出。

suddenly 突然 (Adverb)

eg: The server suddenly went down.
服务器突然挂了。

randomly 随机地 (Adverb)

eg: It fails randomly.
它随机失败。

again 再次 (Adverb)

eg: It's broken again.
又坏了。

twice 两次 (Adverb)

eg: I checked it twice.
我检查了两次。

once 一次 (Adverb)

eg: Run it once to test.
运行一次测试。

first of all 首先 (Phrase)

eg: First of all, thanks for coming.
首先，谢谢大家来。

in addition 此外 (Phrase)

eg: In addition, we need a rollback plan.
此外，我们需要回滚计划。

as well 也 (Phrase)

eg: Can you check the logs as well?
你也能查一下日志吗？

too 也；太 (Adverb)

eg: That's too slow.
那太慢了。

also 也 (Adverb)

eg: We also need a backup.
我们也需要备份。

either 也（否定） (Adverb)

eg: I don't know either.
我也不知道。

neither 也不 (Adverb)

eg: Neither of us knew.
我们俩都不知道。

so 所以 (Conjunction)

eg: It's broken, so we're rolling back.
它坏了，所以我们回滚。

because 因为 (Conjunction)

eg: We delayed because of testing.
我们因为测试而延期。

although 虽然 (Conjunction)

eg: Although it works, it's slow.
虽然能用，但很慢。

though 不过 (Conjunction)

eg: It works, though it's slow.
它能用，不过很慢。

while 当；虽然 (Conjunction)

eg: While we wait, let's review the docs.
等待的时候，我们看看文档吧。

whereas 然而 (Conjunction)

eg: Prod is fast, whereas dev is slow.
生产环境很快，而开发环境很慢。

unless 除非 (Conjunction)

eg: Don't deploy unless the tests pass.
除非测试通过，否则别部署。

until 直到 (Preposition)

eg: Wait until the build finishes.
等到构建完成。

since 自从 (Preposition)

eg: We've had issues since the update.
自从更新以来我们就有问题。

before 在……之前 (Preposition)

eg: Test it before you merge.
合并前先测试。

after 在……之后 (Preposition)

eg: We'll deploy after lunch.
我们午饭后部署。

during 在……期间 (Preposition)

eg: The outage happened during the deploy.
故障发生在部署期间。

within 在……之内 (Preposition)

eg: We'll reply within an hour.
我们一小时内回复。

without 没有 (Preposition)

eg: Don't push without a review.
没有评审别推送。

between 在……之间 (Preposition)

eg: Sync between the two systems.
在两个系统之间同步。

among 在……之中 (Preposition)

eg: Among the options, this is best.
在这些选项中，这个最好。

across 跨越 (Preposition)

eg: It works across all browsers.
它在所有浏览器都能用。

through 通过 (Preposition)

eg: Go through the logs carefully.
仔细看一遍日志。

around 大约；围绕 (Preposition)

eg: It'll take around two weeks.
大约要两周。

about 关于 (Preposition)

eg: Can we talk about the deadline?
我们能聊聊截止日期吗？

above 在……之上 (Preposition)

eg: The value is above the limit.
这个值高于上限。

below 在……之下 (Preposition)

eg: Performance is below target.
性能低于目标。

beyond 超出 (Preposition)

eg: That's beyond our scope.
那超出了我们的范围。

towards 朝向 (Preposition)

eg: We're moving towards microservices.
我们在朝微服务方向发展。

despite 尽管 (Preposition)

eg: Despite the delay, we shipped.
尽管延期，我们还是发布了。

regarding 关于 (Preposition)

eg: Regarding your question about billing...
关于你问的计费问题……

according to 根据 (Phrase)

eg: According to the logs, it failed at two.
根据日志，它在两点失败。

due to 由于 (Phrase)

eg: The delay was due to testing.
延迟是由于测试。

thanks to 多亏 (Phrase)

eg: Thanks to Sam, it's fixed.
多亏山姆，问题修好了。

instead of 而不是 (Phrase)

eg: Use Postgres instead of MySQL.
用Postgres而不是MySQL。

in case 以防 (Phrase)

eg: Take a backup in case it fails.
做个备份以防失败。

as long as 只要 (Phrase)

eg: It's fine as long as it's tested.
只要测试过就行。

so that 以便 (Conjunction)

eg: Add logs so that we can debug.
加日志以便我们调试。

in order to 为了 (Phrase)

eg: We upgraded in order to fix the bug.
我们为了修复bug而升级了。

as soon as 一……就 (Phrase)

eg: Tell me as soon as it's done.
一完成就告诉我。

by the end of 在……结束前 (Phrase)

eg: Finish it by the end of the day.
在今天结束前完成。

on time 准时 (Phrase)

eg: We delivered on time.
我们准时交付了。

in time 及时 (Phrase)

eg: We got it done in time.
我们及时完成了。

at the moment 目前 (Phrase)

eg: I'm busy at the moment.
我目前很忙。

right now 现在 (Phrase)

eg: I'm looking at it right now.
我现在正在看。

for now 暂时 (Phrase)

eg: Use this workaround for now.
暂时用这个变通办法。

so far 到目前为止 (Phrase)

eg: So far, no issues.
到目前为止没有问题。

as usual 像往常一样 (Phrase)

eg: As usual, the build is slow.
像往常一样，构建很慢。

in general 总的来说 (Phrase)

eg: In general, the feedback is good.
总的来说反馈不错。

on average 平均来说 (Phrase)

eg: On average, it takes two hours.
平均需要两个小时。

at least 至少 (Phrase)

eg: Give me at least an hour.
至少给我一个小时。

at most 至多 (Phrase)

eg: It should take at most a day.
最多需要一天。

at first 起初 (Phrase)

eg: At first, I thought it was the network.
起初我以为是网络问题。

in the end 最终 (Phrase)

eg: In the end, we rewrote it.
最后我们重写了它。

after all 毕竟 (Phrase)

eg: It works after all.
毕竟它能用。

in fact 事实上 (Phrase)

eg: In fact, it was already fixed.
事实上它已经修好了。

of course 当然 (Phrase)

eg: Of course, I'll help.
当然，我来帮忙。

for example 例如 (Phrase)

eg: For example, use a queue.
例如，用个队列。

such as 比如 (Phrase)

eg: Use tools such as Docker.
使用比如Docker这样的工具。

on the other hand 另一方面 (Phrase)

eg: On the other hand, it's cheaper.
另一方面，它更便宜。

in my opinion 依我看 (Phrase)

eg: In my opinion, we should wait.
依我看，我们应该等等。

to be honest 说实话 (Phrase)

eg: To be honest, I'm not sure.
说实话，我不确定。

to be fair 公平地说 (Phrase)

eg: To be fair, it's a tough problem.
公平地说，这是个难题。

long story short 长话短说 (Phrase)

eg: Long story short, it's a config issue.
长话短说，是配置问题。

speaking of 说到 (Phrase)

eg: Speaking of deadlines, when's yours?
说到截止日期，你的是什么时候？

for what it's worth 不管怎样 (Phrase)

eg: For what it's worth, I think it's fine.
不管怎样，我觉得没问题。

to be clear 说清楚点 (Phrase)

eg: To be clear, this is a draft.
说清楚点，这只是草稿。

just in case 以防万一 (Phrase)

eg: Take a backup just in case.
以防万一先做个备份。

no matter what 无论如何 (Phrase)

eg: Ship it no matter what.
无论如何都要发布。

sooner or later 迟早 (Phrase)

eg: Sooner or later, it'll break.
迟早它会坏。

more or less 差不多 (Phrase)

eg: It's more or less done.
差不多完成了。

one way or another 不管怎样 (Phrase)

eg: One way or another, we'll fix it.
不管怎样，我们会修好它。

today 今天 (Noun)

eg: We're deploying today.
我们今天部署。

tomorrow 明天 (Noun)

eg: The demo is tomorrow.
演示是明天。

yesterday 昨天 (Noun)

eg: It worked yesterday.
昨天还正常。

tonight 今晚 (Noun)

eg: I'll finish it tonight.
我今晚完成。

morning 上午 (Noun)

eg: I'm in meetings all morning.
我整个上午都在开会。

afternoon 下午 (Noun)

eg: Let's meet this afternoon.
我们今天下午见。

evening 晚上 (Noun)

eg: I'm free this evening.
我今晚有空。

night 夜晚 (Noun)

eg: We deploy at night.
我们在晚上部署。

midnight 午夜 (Noun)

eg: The job runs at midnight.
作业在午夜运行。

noon 中午 (Noun)

eg: The all-hands is at noon.
全员会议在中午。

weekend 周末 (Noun)

eg: Have a good weekend.
周末愉快。

weekday 工作日 (Noun)

eg: Support is available on weekdays.
工作日提供支持。

Monday 周一 (Noun)

eg: See you on Monday.
周一见。

Tuesday 周二 (Noun)

eg: The release is on Tuesday.
发布在周二。

Wednesday 周三 (Noun)

eg: Standup moves to Wednesday.
站会改到周三。

Thursday 周四 (Noun)

eg: We deploy on Thursday.
我们周四部署。

Friday 周五 (Noun)

eg: It's Friday, finally.
终于周五了。

Saturday 周六 (Noun)

eg: I'm on call on Saturday.
我周六值班。

Sunday 周日 (Noun)

eg: The patching happens on Sunday.
打补丁在周日进行。

week 周 (Noun)

eg: It's been a long week.
这一周很漫长。

fortnight 两周 (Noun)

eg: We deploy every fortnight.
我们每两周部署一次。

fortnightly 每两周的 (Adjective)

eg: It's a fortnightly release.
这是每两周一次的发布。

month 月 (Noun)

eg: The invoice is due next month.
发票下个月到期。

quarter 季度 (Noun)

eg: We hit our targets this quarter.
本季度我们达成了目标。

year 年 (Noun)

eg: We've been growing all year.
我们全年都在增长。

financial year 财政年度 (Noun)

eg: The financial year ends in March.
财政年度在三月结束。

season 季节 (Noun)

eg: It's our busy season.
这是我们的旺季。

hour 小时 (Noun)

eg: It'll take about an hour.
大约要一个小时。

minute 分钟 (Noun)

eg: Give me a minute.
等我一分钟。

second 秒 (Noun)

eg: It takes a few seconds to load.
加载要几秒钟。

moment 片刻 (Noun)

eg: Just a moment, please.
请稍等片刻。

time 时间 (Noun)

eg: Do you have time for a chat?
你有时间聊聊吗？

date 日期 (Noun)

eg: What's the launch date?
上线日期是哪天？

day 天 (Noun)

eg: It's a busy day today.
今天很忙。

hours 工作时间 (Noun)

eg: Our office hours are eight to five.
我们的办公时间是八点到五点。

business hours 营业时间 (Noun)

eg: Support runs during business hours.
支持在工作时间内提供。

working day 工作日 (Noun)

eg: It takes three working days.
需要三个工作日。

half day 半天 (Noun)

eg: I'm taking a half day on Friday.
我周五休半天。

full day 一整天 (Noun)

eg: The workshop is a full day.
工作坊是一整天。

SDK 软件开发工具包 (Noun)

eg: Download the SDK from the portal.
从门户下载软件开发工具包。

CLI 命令行工具 (Noun)

eg: The CLI makes deployment easy.
命令行工具让部署很轻松。

GUI 图形界面 (Noun)

eg: There's a GUI for the admin tasks.
管理任务有个图形界面。

OOP 面向对象编程 (Noun)

eg: OOP helps organise larger codebases.
面向对象编程有助于组织更大的代码库。

MVC 模型视图控制器 (Noun)

eg: The app follows the MVC pattern.
应用遵循MVC模式。

CRUD 增删改查 (Noun)

eg: The API is basic CRUD.
这个接口就是基本的增删改查。

DTO 数据传输对象 (Noun)

eg: Map the entity to a DTO.
把实体映射成数据传输对象。

GUID 全局唯一标识符 (Noun)

eg: Use a GUID as the ID.
用GUID作ID。

UUID 通用唯一识别码 (Noun)

eg: Each record gets a UUID.
每条记录都有个UUID。

timestamp 时间戳 (Noun)

eg: Add a timestamp to each log entry.
给每条日志加个时间戳。

idempotent 幂等的 (Adjective)

eg: The endpoint needs to be idempotent.
这个接口需要是幂等的。

stateless 无状态的 (Adjective)

eg: Keep the service stateless.
保持服务无状态。

stateful 有状态的 (Adjective)

eg: A stateful service is harder to scale.
有状态的服务更难扩展。

sharding 分片 (Noun)

eg: Sharding spreads the load across servers.
分片把负载分散到多台服务器。

partition 分区 (Noun)

eg: Partition the table by date.
按日期给表分区。

garbage collection 垃圾回收 (Noun)

eg: Garbage collection is causing pauses.
垃圾回收导致了卡顿。

mutex 互斥锁 (Noun)

eg: Protect the resource with a mutex.
用互斥锁保护这个资源。

protocol 协议 (Noun)

eg: Which protocol does it use?
它用哪种协议?

packet 数据包 (Noun)

eg: Capture the packets and have a look.
抓一下数据包看看。

socket 套接字 (Noun)

eg: The socket closed unexpectedly.
套接字意外关闭了。

handshake 握手 (Noun)

eg: The TLS handshake is failing.
TLS握手失败了。

metadata 元数据 (Noun)

eg: Store the metadata separately.
把元数据单独存储。

snapshot 快照 (Noun)

eg: Take a snapshot before the change.
变更前先做个快照。

overhead 开销 (Noun)

eg: The overhead is minimal.
开销很小。

workload 工作负载 (Noun)

eg: The workload has doubled.
工作负载翻倍了。

footprint 占用量 (Noun)

eg: Keep the memory footprint small.
保持内存占用小。

tech stack 技术栈 (Noun)

eg: What's your tech stack?
你们的技术栈是什么?

stack 技术栈; 堆栈 (Noun)

eg: We run the whole stack on Azure.
我们整个技术栈都跑在Azure上。

toolchain 工具链 (Noun)

eg: Our toolchain is pretty modern.
我们的工具链相当现代。

toolkit 工具包 (Noun)

eg: The team has a solid toolkit.
团队有一套扎实的工具包。

emulator 模拟器 (Noun)

eg: Test it on the Android emulator.
在安卓模拟器上测试。

simulator 模拟器 (Noun)

eg: Use the iOS simulator.
用iOS模拟器。

virtualisation 虚拟化 (Noun)

eg: Virtualisation saves hardware costs.
虚拟化节省硬件成本。

hypervisor 虚拟机监控程序 (Noun)

eg: The hypervisor is running out of memory.
虚拟机监控程序内存快耗尽了。

bare metal 裸金属服务器 (Noun)

eg: We still use bare metal for the database.
我们数据库仍然用裸金属服务器。

bit 比特 (Noun)

eg: It's a single bit flag.
这是个单比特标志。

byte 字节 (Noun)

eg: The file is a few thousand bytes.
文件有几千字节。

binary 二进制 (Noun)

eg: Deploy the binary to the server.
把二进制文件部署到服务器。

Unicode 统一码 (Noun)

eg: Make sure it supports Unicode.
确保它支持统一码。

UTF-8 UTF-8编码 (Noun)

eg: Save the file as UTF-8.
把文件存成UTF-8。

encoding 编码 (Noun)

eg: There's an encoding issue in the export.
导出里有个编码问题。

recursion 递归 (Noun)

eg: Use recursion for the tree.
树结构用递归。

pointer 指针 (Noun)

eg: Watch out for null pointers.
小心空指针。

heap 堆 (Noun)

eg: The heap is full.
堆满了。

buffer 缓冲区 (Noun)

eg: Increase the buffer size.
增大缓冲区。

overflow 溢出 (Noun)

eg: We've got a buffer overflow.
我们有个缓冲区溢出。

bug bounty 漏洞赏金 (Noun)

eg: We run a bug bounty programme.
我们有个漏洞赏金计划。

webinar 网络研讨会 (Noun)

eg: I'm attending a webinar on Azure.
我要参加一场Azure网络研讨会。

podcast 播客 (Noun)

eg: I listen to a tech podcast on my commute.
我通勤时听科技播客。

Stack Overflow 开发者问答网站 (Noun)

eg: I found the answer on Stack Overflow.
我在Stack Overflow上找到了答案。

Google it 谷歌一下 (Phrase)

eg: Just Google it.
直接谷歌一下。

release candidate 候选发布版 (Noun)

eg: The release candidate is ready for testing.
候选发布版已可测试。

long-term support 长期支持版 (Noun)

eg: We're on the long-term support release.
我们用的是长期支持版本。

end of life 停止维护 (Phrase)

eg: The framework is end of life.
这个框架已经停止维护了。

minimum viable 最小可行的 (Adjective)

eg: We'll build the minimum viable version.
我们先做最小可行版本。

tech debt 技术债 (Noun)

eg: Tech debt slows us down.
技术债拖慢了我们。

dogfooding 内部试用 (Noun)

eg: We're dogfooding the app internally.
我们在内部试用这个应用。

yak shaving 层层琐事 (Noun)

eg: That was a lot of yak shaving.
那真是层层琐事。

bikeshedding 无谓争论细节 (Noun)

eg: Let's avoid bikeshedding on names.
我们别在命名上无谓争论。

gold plating 过度完善 (Noun)

eg: Stop the gold plating and ship it.
别过度完善了，发布吧。

rubber duck 橡皮鸭调试法 (Noun)

eg: I talked it through with a rubber duck.
我对着橡皮鸭讲了一遍。

rabbit hole 钻牛角尖 (Noun)

eg: I went down a rabbit hole with that bug.
我在那个bug上钻了牛角尖。

silver bullet 万灵药 (Noun)

eg: There's no silver bullet here.
这里没有万灵药。

proof point 佐证 (Noun)

eg: We need a proof point for the client.
我们需要给客户一个佐证。

low effort 低投入 (Phrase)

eg: It's a low effort, high value change.
这是低投入高价值的改动。

high impact 高影响 (Phrase)

eg: Focus on high impact work.
专注于高影响的工作。

on my plate 我手头的事 (Phrase)

eg: I've got a lot on my plate.
我手头事情很多。

circle back 回头再聊 (Phrase)

eg: Let's circle back on this later.
这个我们回头再聊。

park it 先搁置 (Phrase)

eg: Let's park it and come back.
我们先搁置，之后再回来。

take offline 会后再聊 (Phrase)

eg: Let's take this offline.
我们会后再聊这个。

move the needle 产生实质影响 (Phrase)

eg: That won't move the needle.
那不会产生实质影响。

ballpark 大致估计 (Noun)

eg: Give me a ballpark figure.
给我个大概数字。

double down 加倍投入 (Phrase)

eg: We're doubling down on security.
我们在安全上加倍投入。

deep dive 深入探讨 (Noun)

eg: Let's do a deep dive on the logs.
我们深入看看这些日志。

sense check 合理性核对 (Noun)

eg: Can you do a quick sense check?
你能快速核对一下合理性吗？

gut feel 直觉 (Noun)

eg: My gut feel is it's the database.
我的直觉是数据库的问题。

power cut 停电 (Noun)

eg: A power cut knocked out the wifi.
停电让无线网也断了。

brekkie 早餐 (Noun)

eg: Want to grab brekkie before work?
上班前想去吃早餐吗？

lunch 午饭 (Noun)

eg: What are you having for lunch?
你午饭吃什么？

cafe 咖啡馆 (Noun)

eg: Let's work from a cafe today.
我们今天去咖啡馆办公。

water cooler 饮水机 (Noun)

eg: Chat by the water cooler.
在饮水机旁聊聊。

wine 葡萄酒 (Noun)

eg: We opened a bottle of wine to celebrate.
我们开了瓶酒庆祝。

beer 啤酒 (Noun)

eg: Fancy a beer after work?
下班来杯啤酒吗？

friday drinks 周五小酌 (Noun)

eg: Friday drinks are in the kitchen.
周五小酌在厨房。

social club 员工社交俱乐部 (Noun)

eg: The social club organises the events.
员工社交俱乐部组织活动。

Secret Santa 神秘圣诞老人礼物交换 (Noun)

eg: We're doing a Secret Santa this year.
今年我们要做神秘圣诞老人礼物交换。

Christmas party 圣诞派对 (Noun)

eg: The Christmas party is on Friday.
圣诞派对在周五。

end of year 年终 (Noun)

eg: The end of year function is on the fifth.
年终聚会在五号。

table tennis 乒乓球 (Noun)

eg: We've got a table tennis table in the office.
办公室里有张乒乓球桌。

gym 健身房 (Noun)

eg: I go to the gym before work.
我上班前去健身房。

walk 散步 (Noun)

eg: Let's take a walk and talk it over.
我们边散步边聊。

break 休息 (Noun)

eg: Take a break, you've earned it.
休息一下，这是你应得的。

sleep 睡眠 (Noun)

eg: I didn't get much sleep last night.
我昨晚没睡多少。

holiday 假期 (Noun)

eg: I'm off on holiday next week.
我下周去度假。

trip 旅行 (Noun)

eg: How was your trip?
你的旅行怎么样？

travel 出差；旅行 (Verb)

eg: I travel for work once a month.
我每月出差一次。

business trip 出差 (Noun)

eg: I'm on a business trip next week.
我下周出差。

flight 航班 (Noun)

eg: My flight leaves at seven.
我的航班七点起飞。

family 家人 (Noun)

eg: I'm spending time with family this weekend.
这个周末我陪家人。

kids 孩子 (Noun)

eg: I've got to pick up the kids at three.
我三点得去接孩子。

wife 妻子 (Noun)

eg: My wife's visiting this weekend.
我妻子这个周末来看我。

husband 丈夫 (Noun)

eg: Her husband is a builder.
她丈夫是建筑工人。

parents 父母 (Noun)

eg: My parents are visiting this weekend.
我父母这个周末来看我。

weather 天气 (Noun)

eg: What's the weather like today?
今天天气怎么样？

lazy loading 懒加载 (Noun)

eg: Lazy loading cut our initial page load in half.
懒加载让首页加载时间减了一半。

eager loading 预加载 (Noun)

eg: Use eager loading to avoid extra queries.
用预加载来避免多余的查询。

dependency graph 依赖关系图 (Noun)

eg: Check the dependency graph before you upgrade.
升级前先看看依赖关系图。

code smell 代码坏味道 (Noun)

eg: That long method is a code smell.
那个超长方法就是代码坏味道。

code owner 代码负责人 (Noun)

eg: Ask the code owner to approve it.
请代码负责人批准。

static analysis 静态分析 (Noun)

eg: Static analysis flagged a possible null reference.
静态分析标出了一个可能的空引用。

type checking 类型检查 (Noun)

eg: Turn on strict type checking.
打开严格的类型检查。

strongly typed 强类型的 (Adjective)

eg: C# is a strongly typed language.
C#是强类型语言。

immutable 不可变的 (Adjective)

eg: Keep the model immutable.
保持模型不可变。

mutable 可变的 (Adjective)

eg: Mutable state causes subtle bugs.
可变状态会引起难以察觉的bug。

pure function 纯函数 (Noun)

eg: A pure function is easy to test.
纯函数很容易测试。

side effect 副作用 (Noun)

eg: That call has an unexpected side effect.
那个调用有个意外的副作用。

closure 闭包 (Noun)

eg: The callback captures a variable in a closure.
回调在闭包里捕获了一个变量。

event loop 事件循环 (Noun)

eg: A blocking call stalls the event loop.
阻塞调用会卡住事件循环。

websocket WebSocket协议 (Noun)

eg: We use a websocket for live updates.
我们用WebSocket做实时更新。

CORS 跨域资源共享 (Noun)

eg: The request is blocked by CORS.
这个请求被跨域策略拦截了。

content security policy 内容安全策略 (Noun)

eg: Tighten the content security policy.
收紧内容安全策略。

rate limiter 限流器 (Noun)

eg: Add a rate limiter to the public API.
给公开接口加个限流器。

circuit breaker 熔断器 (Noun)

eg: The circuit breaker stops the cascade of failures.
熔断器阻止了故障连锁扩散。

retry policy 重试策略 (Noun)

eg: Our retry policy is too aggressive.
我们的重试策略太激进了。

exponential backoff 指数退避 (Noun)

eg: Use exponential backoff between retries.
重试之间使用指数退避。

dead letter queue 死信队列 (Noun)

eg: Failed messages go to the dead letter queue.
失败的消息进入死信队列。

idempotency key 幂等键 (Noun)

eg: Send an idempotency key with each payment.
每笔支付都带上一个幂等键。

saga 长事务模式 (Noun)

eg: We coordinate the order flow with a saga.
我们用长事务模式来协调订单流程。

CQRS 命令查询职责分离 (Noun)

eg: We split reads and writes using CQRS.
我们用CQRS把读和写分开。

event sourcing 事件溯源 (Noun)

eg: Event sourcing gives us a full audit history.
事件溯源给了我们完整的审计历史。

domain-driven design 领域驱动设计 (Noun)

eg: Domain-driven design helps with a complex domain.
领域驱动设计对复杂业务领域有帮助。

bounded context 限界上下文 (Noun)

eg: Each team owns a bounded context.
每个团队负责一个限界上下文。

clean architecture 整洁架构 (Noun)

eg: We follow clean architecture in the backend.
后端我们遵循整洁架构。

dependency inversion 依赖倒置 (Noun)

eg: Dependency inversion keeps the core independent.
依赖倒置让核心保持独立。

separation of concerns 关注点分离 (Noun)

eg: Separation of concerns keeps the code tidy.
关注点分离让代码保持整洁。

coupling 耦合 (Noun)

eg: Tight coupling makes changes risky.
紧耦合让改动有风险。

cohesion 内聚 (Noun)

eg: High cohesion makes a module easier to understand.
高内聚让模块更易理解。

loose coupling 松耦合 (Noun)

eg: We want loose coupling between the services.
我们希望服务之间松耦合。

dead code 无用代码 (Noun)

eg: Delete the dead code while you're there.
你顺手把无用代码删了吧。

code duplication 代码重复 (Noun)

eg: Code duplication is creeping in.
代码重复问题在蔓延。

god class 上帝类 (Noun)

eg: That god class does everything.
那个上帝类什么都干。

trunk-based development 主干开发 (Noun)

eg: We practise trunk-based development.
我们实践主干开发。

release train 发布列车 (Noun)

eg: Miss this release train and you wait a fortnight.
错过这班发布列车就要等两周。

build cache 构建缓存 (Noun)

eg: The build cache speeds up the pipeline.
构建缓存加快了流水线。

self-hosted runner 自托管运行器 (Noun)

eg: We use a self-hosted runner for private builds.
私有构建我们用自托管运行器。

package feed 包源 (Noun)

eg: Publish it to our internal package feed.
把它发布到我们内部的包源。

config drift 配置漂移 (Noun)

eg: Config drift caused the outage.
配置漂移导致了这次故障。

immutable infrastructure 不可变基础设施 (Noun)

eg: Immutable infrastructure avoids drift.
不可变基础设施避免配置漂移。

sidecar 边车容器 (Noun)

eg: A sidecar handles the logging.
一个边车容器负责日志。

service mesh 服务网格 (Noun)

eg: A service mesh manages traffic between services.
服务网格管理服务之间的流量。

ingress 入口 (Noun)

eg: Configure the ingress for the new service.
为新服务配置入口。

config map 配置映射 (Noun)

eg: Store the settings in a config map.
把设置存在配置映射里。

persistent volume 持久卷 (Noun)

eg: Attach a persistent volume for the data.
给数据挂一个持久卷。

liveness probe 存活探针 (Noun)

eg: The liveness probe keeps failing.
存活探针一直失败。

readiness probe 就绪探针 (Noun)

eg: Add a readiness probe before routing traffic.
导流量前先加个就绪探针。

rolling update 滚动更新 (Noun)

eg: A rolling update avoids downtime.
滚动更新避免停机。

horizontal scaling 水平扩展 (Noun)

eg: Horizontal scaling needs a stateless service.
水平扩展需要无状态服务。

vertical scaling 垂直扩展 (Noun)

eg: Vertical scaling only takes us so far.
垂直扩展的效果有限。

resource limit 资源限制 (Noun)

eg: Set a memory resource limit on the container.
给容器设置内存资源限制。

out of memory 内存不足 (Phrase)

eg: The pod was killed because it ran out of memory.
这个Pod因为内存不足被杀掉了。

crash loop 崩溃循环 (Noun)

eg: The pod is stuck in a crash loop.
这个Pod陷入了崩溃循环。

trace id 追踪ID (Noun)

eg: Include the trace id in the ticket.
把追踪ID写进工单。

correlation id 关联ID (Noun)

eg: Use the correlation id to follow the request.
用关联ID跟踪这个请求。

structured logging 结构化日志 (Noun)

eg: Structured logging makes searching easier.
结构化日志让搜索更容易。

log level 日志级别 (Noun)

eg: Set the log level to debug.
把日志级别设为调试。

log rotation 日志轮转 (Noun)

eg: Log rotation stops the disk filling up.
日志轮转防止磁盘被写满。

sampling 采样 (Noun)

eg: We use sampling to reduce trace volume.
我们用采样来减少追踪数据量。

p95 第95百分位 (Noun)

eg: The p95 latency is over two seconds.
第95百分位延迟超过两秒。

error budget 错误预算 (Noun)

eg: We've burned through the error budget.
我们的错误预算已经用完了。

SLO 服务水平目标 (Noun)

eg: Our SLO is ninety-nine point nine percent.
我们的服务水平目标是99.9%。

sli 服务水平指标 (Noun)

eg: Latency is one of our SLIs.
延迟是我们的服务水平指标之一。

alert fatigue 告警疲劳 (Noun)

eg: Alert fatigue makes people ignore pages.
告警疲劳会让人忽略呼叫。

on-call handover 值班交接 (Noun)

eg: Do the on-call handover on Monday morning.
周一早上做值班交接。

sprint goal 迭代目标 (Noun)

eg: Does this ticket support the sprint goal?
这个工单符合迭代目标吗？

sprint backlog 迭代待办 (Noun)

eg: Add it to the sprint backlog.
把它加到迭代待办里。

product backlog 产品待办 (Noun)

eg: The product owner manages the product backlog.
产品负责人管理产品待办。

increment 增量 (Noun)

eg: Each sprint delivers a working increment.
每个迭代交付一个可用的增量。

timebox 限定时间 (Verb)

eg: Let's timebox the investigation to a day.
我们把调查限定在一天内。

carry over 顺延 (Phrase)

eg: Two tickets carried over to the next sprint.
有两个工单顺延到下个迭代。

cutover 切换上线 (Noun)

eg: The cutover is planned for Saturday night.
切换上线定在周六晚上。

hypercare 上线后重点保障期 (Noun)

eg: We have two weeks of hypercare after go-live.
上线后我们有两周重点保障期。

go/no-go 上线决策 (Noun)

eg: The go/no-go meeting is on Thursday.
上线决策会在周四。

lessons learned 经验教训 (Noun)

eg: Let's capture the lessons learned.
我们把经验教训记录下来。

risk register 风险登记册 (Noun)

eg: Add it to the risk register.
把它加进风险登记册。

critical path 关键路径 (Noun)

eg: That task is on the critical path.
那个任务在关键路径上。

Gantt chart 甘特图 (Noun)

eg: I'll update the Gantt chart.
我来更新甘特图。

utilisation 利用率 (Noun)

eg: Team utilisation is at eighty percent.
团队利用率是百分之八十。

billable 可计费的 (Adjective)

eg: Only billable hours go on the invoice.
只有可计费工时才算进发票。

timesheet 工时表 (Noun)

eg: Fill in your timesheet by Friday.
周五前填好你的工时表。

time tracking 工时记录 (Noun)

eg: Time tracking helps with quoting.
工时记录有助于报价。

burn rate 资金消耗速度 (Noun)

eg: Our burn rate is too high.
我们的资金消耗速度太高了。

runway 资金可用期 (Noun)

eg: We have twelve months of runway.
我们的资金还能撑十二个月。

definition of ready 就绪标准 (Noun)

eg: The ticket doesn't meet our definition of ready.
这个工单不符合我们的就绪标准。

story mapping 故事地图 (Noun)

eg: We did story mapping to plan the release.
我们用故事地图来规划发布。

spillover 溢出工作 (Noun)

eg: We had a lot of spillover last sprint.
上个迭代有很多溢出工作。

Active Directory 活动目录 (Noun)

eg: Users are managed in Active Directory.
用户在活动目录里管理。

group policy 组策略 (Noun)

eg: A group policy locks the settings.
组策略锁定了这些设置。

domain controller 域控制器 (Noun)

eg: The domain controller is offline.
域控制器离线了。

Intune 设备管理 (Noun)

eg: Intune pushes the apps to laptops.
Intune把应用推送到笔记本上。

Entra Entra身份平台 (Noun)

eg: We manage identities in Entra.
我们在Entra里管理身份。

managed identity 托管身份 (Noun)

eg: Use a managed identity instead of a password.
用托管身份代替密码。

service principal 服务主体 (Noun)

eg: Create a service principal for the pipeline.
为流水线创建一个服务主体。

conditional access 条件访问 (Noun)

eg: Conditional access blocks risky sign-ins.
条件访问会拦截有风险的登录。

resource group 资源组 (Noun)

eg: Put everything in one resource group.
把所有东西放进一个资源组。

App Service 应用服务 (Noun)

eg: The site runs on an App Service.
这个网站跑在应用服务上。

service bus 服务总线 (Noun)

eg: Messages go through the service bus.
消息通过服务总线传递。

event hub 事件中心 (Noun)

eg: Telemetry streams into an event hub.
遥测数据流入事件中心。

virtual network 虚拟网络 (Noun)

eg: Put the database in a virtual network.
把数据库放进虚拟网络里。

private endpoint 专用终结点 (Noun)

eg: Access it through a private endpoint.
通过专用终结点访问它。

Power Automate Power Automate (Noun)

eg: A Power Automate flow sends the approval.
一个Power Automate流程发送审批。

Power Apps Power Apps (Noun)

eg: We built the form in Power Apps.
我们用Power Apps做了这个表单。

mailbox 邮箱 (Noun)

eg: Your mailbox is almost full.
你的邮箱快满了。

shared mailbox 共享邮箱 (Noun)

eg: Support emails go to a shared mailbox.
支持邮件发到一个共享邮箱。

distribution list 邮件分发列表 (Noun)

eg: Add him to the distribution list.
把他加到邮件分发列表里。

security group 安全组 (Noun)

eg: Add her to the security group.
把她加到安全组里。

turn it off and on again 关掉再重开 (Phrase)

eg: Have you tried turning it off and on again?
你试过关掉再重开吗？

hard refresh 强制刷新 (Noun)

eg: Do a hard refresh and try again.
强制刷新一下再试试。

incognito window 无痕窗口 (Noun)

eg: Try it in an incognito window.
在无痕窗口里试试。

browser cache 浏览器缓存 (Noun)

eg: Clear your browser cache.
清除你的浏览器缓存。

blue screen 蓝屏 (Noun)

eg: My laptop just showed a blue screen.
我的笔记本刚才蓝屏了。

black screen 黑屏 (Noun)

eg: I'm getting a black screen on startup.
我开机时黑屏。

not responding 无响应 (Phrase)

eg: The app says it's not responding.
应用提示无响应。

force quit 强制退出 (Verb)

eg: Force quit the app and reopen it.
强制退出应用再重新打开。

Task Manager 任务管理器 (Noun)

eg: Open Task Manager and check the memory.
打开任务管理器看看内存。

safe mode 安全模式 (Noun)

eg: Boot into safe mode.
进入安全模式启动。

factory reset 恢复出厂设置 (Noun)

eg: We had to factory reset the phone.
我们不得不把手机恢复出厂设置。

wipe 清除 (Verb)

eg: IT will wipe the laptop before reissuing it.
IT会在重新发放前清除这台笔记本。

loaner laptop 借用笔记本 (Noun)

eg: We'll give you a loaner laptop for now.
我们先给你一台借用笔记本。

swap out 换掉 (Phrase)

eg: We'll swap out the faulty switch.
我们会换掉那台有故障的交换机。

remote session 远程会话 (Noun)

eg: Can I start a remote session?
我能发起远程会话吗？

take control 接管控制 (Phrase)

eg: Can I take control of your screen?
我能接管你的屏幕吗？

error code 错误代码 (Noun)

eg: What's the error code?
错误代码是什么？

screenshot 截图 (Noun)

eg: Send me a screenshot of the error.
把错误的截图发我。

screen recording 屏幕录制 (Noun)

eg: A screen recording would help.
屏幕录制会有帮助。

keyboard shortcut 键盘快捷键 (Noun)

eg: Use the keyboard shortcut to save time.
用键盘快捷键节省时间。

hotkey 热键 (Noun)

eg: Set a hotkey for the screenshot tool.
给截图工具设个热键。

bookmark 书签 (Noun)

eg: Bookmark the dashboard.
把仪表盘加进书签。

refresh 刷新 (Verb)

eg: Refresh the page and try again.
刷新页面再试。

reload 重新加载 (Verb)

eg: Reload the config without restarting.
不重启就重新加载配置。

undo 撤销 (Verb)

eg: Undo the last change.
撤销上一次改动。

right-click 右键点击 (Verb)

eg: Right-click the file and copy the path.
右键点文件复制路径。

double-click 双击 (Verb)

eg: Double-click the installer.
双击安装程序。

status page 状态页 (Noun)

eg: Update the status page during the outage.
故障期间更新状态页。

bug tracker 缺陷跟踪系统 (Noun)

eg: Log it in the bug tracker.
把它记在缺陷跟踪系统里。

issue tracker 问题跟踪系统 (Noun)

eg: Check the issue tracker first.
先查问题跟踪系统。

maintenance page 维护页面 (Noun)

eg: Show a maintenance page during the upgrade.
升级期间显示维护页面。

how's it going 最近怎么样 (Phrase)

eg: Hey, how's it going?
嘿，最近怎么样？

how was your weekend 周末过得怎么样 (Phrase)

eg: Morning! How was your weekend?
早！周末过得怎么样？

any plans for the weekend 周末有什么计划 (Phrase)

eg: Any plans for the weekend?
周末有什么计划吗？

can't complain 挺好的（没什么可抱怨） (Phrase)

eg: How's work? Can't complain.
工作怎么样？挺好的。

not bad 还不错 (Phrase)

eg: How was the demo? Not bad, actually.
演示怎么样？其实还不错。

same old 老样子 (Phrase)

eg: What's new? Same old, same old.
有什么新鲜事？老样子。

keeping busy 一直在忙 (Phrase)

eg: Just keeping busy with the migration.
就是一直在忙迁移的事。

hanging in there 撑着呢 (Phrase)

eg: Hanging in there, it's been a long week.
撑着呢，这周很漫长。

long day 漫长的一天 (Noun)

eg: It's been a long day, mate.
今天可真漫长，哥们。

big week 忙碌的一周 (Noun)

eg: We've got a big week ahead.
接下来我们有忙碌的一周。

coffee run 买咖啡 (Noun)

eg: Anyone want anything from the coffee run?
有人要我顺便买点东西吗？

banter 打趣 (Noun)

eg: There's a lot of banter in this team.
这个团队里经常互相打趣。

gossip 闲话 (Noun)

eg: I don't want to get into the gossip.
我不想掺和那些闲话。

grapevine 小道消息 (Noun)

eg: I heard it through the grapevine.
我是从小道消息听说的。

team lunch 团队午餐 (Noun)

eg: We're having a team lunch on Friday.
我们周五有团队午餐。

team drinks 团队小酌 (Noun)

eg: Team drinks are on after the release.
发布后有团队小酌。

leaving drinks 欢送酒会 (Noun)

eg: Leaving drinks for Tom are on Thursday.
汤姆的欢送酒会在周四。

birthday cake 生日蛋糕 (Noun)

eg: There's birthday cake in the kitchen.
厨房里有生日蛋糕。

work anniversary 入职周年 (Noun)

eg: It's my work anniversary today.
今天是我的入职周年。

whip-round 凑份子 (Noun)

eg: We're doing a whip-round for a gift.
我们在凑份子买礼物。

get-well card 慰问卡 (Noun)

eg: Sign the get-well card for Sam.
给山姆的慰问卡签个名。

water cooler chat 茶水间闲聊 (Noun)

eg: We had a quick water cooler chat.
我们在茶水间简单聊了聊。

small talk 闲聊 (Noun)

eg: I'm not great at small talk.
我不太擅长闲聊。

icebreaker 破冰活动 (Noun)

eg: We started with an icebreaker.
我们以一个破冰活动开场。

inside joke 内部梗 (Noun)

eg: That's an inside joke on our team.
那是我们团队的内部梗。

dad joke 冷笑话 (Noun)

eg: He tells a dad joke every standup.
他每次站会都讲个冷笑话。

Monday blues 周一综合征 (Noun)

eg: I've got the Monday blues.
我得了周一综合征。

hard out 非常；拼命地 (Adverb)

eg: We've been working hard out all week.
我们整周都在拼命地干。

a bit of a mission 有点费劲 (Phrase)

eg: It's a bit of a mission to set up.
设置起来有点费劲。

hard yakka 苦活 (Noun)

eg: Migrating that data was hard yakka.
迁移那批数据是个苦活。

dodgy 不靠谱的 (Adjective)

eg: The wifi in that room is dodgy.
那个房间的无线网不靠谱。

sus 可疑的 (Adjective)

eg: That email looks a bit sus.
那封邮件看起来有点可疑。

sussed 搞明白了的 (Adjective)

eg: I've finally got it sussed.
我终于搞明白了。

stink 不公平的；糟糕的 (Adjective)

eg: That's stink, we worked all weekend.
真糟糕，我们整个周末都在干活。

flash 高档的；炫酷的 (Adjective)

eg: That's a flash new dashboard.
那是个很炫的新仪表盘。

onto it 已经在处理 (Phrase)

eg: I'm onto it, back shortly.
我在处理了，马上回来。

give it heaps 全力以赴 (Phrase)

eg: Let's give it heaps and finish today.
我们全力以赴今天完成。

pull your head in 收敛一点 (Phrase)

eg: He told them to pull their heads in.
他叫他们收敛一点。

bugger all 几乎没有 (Phrase)

eg: There's bugger all documentation.
文档几乎没有。

dob in 告发 (Phrase)

eg: Nobody wants to dob in a workmate.
没人想告发同事。

cactus 完蛋的；坏了的 (Adjective)

eg: The old server is cactus.
那台旧服务器报废了。

wee 小的 (Adjective)

eg: Just a wee change to the config.
只是对配置做个小改动。

wee bit 一点点 (Phrase)

eg: I'm a wee bit nervous about the demo.
我对演示有一点点紧张。

buggered 坏了的；累坏了的 (Adjective)

eg: The build server is buggered.
构建服务器坏了。

stuffed 坏了的；完蛋的 (Adjective)

eg: We're stuffed if the backup fails.
如果备份失败我们就完了。

yeah right 才怪 (Phrase)

eg: Finish by lunch? Yeah right.
午饭前完成？才怪。

chin up 打起精神 (Phrase)

eg: Chin up, we'll fix it tomorrow.
打起精神，明天我们会修好。

right as rain 完全没事 (Phrase)

eg: Restart it and it'll be right as rain.
重启一下就完全没事了。

take the mickey 取笑 (Phrase)

eg: They're taking the mickey out of my typo.
他们在拿我的拼写错误开玩笑。

rip-off 坑钱的东西 (Noun)

eg: That licence price is a rip-off.
那个许可证价格简直是坑钱。

ta 谢谢 (Interjection)

eg: Ta for the update.
谢谢你的更新。

no stress 别担心 (Phrase)

eg: Can you redo it? No stress.
你能重做吗？没压力。

all sweet 一切都好 (Phrase)

eg: All sweet, I've sorted it.
一切都好，我搞定了。

chuffed 很高兴的 (Adjective)

eg: I'm chuffed with the test results.
我对测试结果很满意。

mean 很棒的 (Adjective)

eg: That's mean, nice work.
太棒了，干得好。

give it a burl 试一试 (Phrase)

eg: I'll give it a burl this afternoon.
我今天下午试一试。

run it past 征求意见 (Phrase)

eg: Run it past the team lead first.
先征求一下团队负责人的意见。

on the ball 反应敏捷 (Phrase)

eg: She's really on the ball with the alerts.
她对告警处理得很及时。

give me a bell 给我打个电话 (Phrase)

eg: Give me a bell when you're free.
你有空时给我打个电话。

give me a buzz 给我打个电话 (Phrase)

eg: Give me a buzz if it breaks again.
如果又坏了就给我打电话。

keep me posted 随时告诉我进展 (Phrase)

eg: Keep me posted on the deploy.
部署情况随时告诉我。

sounds good 听起来不错 (Phrase)

eg: Sounds good, let's do it.
听起来不错，就这么办。

works for me 我这边可以 (Phrase)

eg: Thursday works for me.
周四我这边可以。

makes sense 有道理 (Phrase)

eg: That makes sense, thanks.
有道理，谢谢。

fair point 说得有道理 (Phrase)

eg: Fair point, let's test it first.
说得有道理，我们先测试一下。

good call 决定得好 (Phrase)
